

**RADIO DISNEY LOS ANGELES
KRDC(AM) 1110/ K256CX(FM) 99.1
ISSUE/PROGRAM REPORT
FOURTH QUARTER 2017**

SECTION I – INTRODUCTION

Radio Disney Los Angeles – KRDC(AM) 1110 and K256CX(FM) 99.1 (hereinafter “the Station”) - is located in Pasadena, CA and carries programming produced by Radio Disney Country dedicated to high quality, wholesome country music entertainment that is beneficial to children, families, and the communities in which we serve.

During the fourth quarter of 2017, the Station broadcast a public interest program called *The GreenSense Show* produced by GreenSense Media.

The GreenSense Show strives to build better communities by helping citizens to take care of the environment through a variety of means. The Station ran the show on Sundays in October, November, and December of 2017 at 6:30AM. Details regarding these programs are included in Section II of this report.

The Station broadcast public service announcements (“PSA’s”) of fifteen, thirty, and sixty seconds in length on a variety of topics relating to children and young adults. These PSAs are provided by the Ad Council, a private, national non-profit organization that marshals talent from the advertising and communications industries, the facilities of the media, and the resources of the business and non-profit communities to produce, distribute and promote public service campaigns on behalf of non-profit organizations and government agencies in issue areas such as improving the quality of life for children, preventative health, education, community well-being, environmental preservation, and strengthening families. This quarter, the Station broadcast 276 PSAs in a variety of day parts. Details regarding these PSAs are included in Section III of this report.

SECTION II – PROGRAM DESCRIPTIONS

GREENSENSE WITH ROBERT COLANGELO

Sunday 10/1/17

PROGRAM TITLE: World Water Week Wrap-up/Heroic Food

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday October 1, 2017

SOURCE: Green Sense Media

A 40-percent population increase by 2050 means the demand for water used in growing crops and feeding livestock will increase dramatically too. How can we be sure fresh water for food will be available? That and other issues were part of World Water Week which recently wrapped up in Stockholm. Peter McCornick's the Executive Director of the Daughtery Water for Food Global Institute at the University of Nebraska.

Heroic Food helps men and women returning from military service who can face unemployment, social dislocation, a loss of a sense of purpose and lowered self esteem by preparing them for careers in sustainable farming, agricultural trades, and food entrepreneurship. Heroic Food director Leora Barish is our guest.

Tom Appel of Consumer Guide Automotive has a road test of the Jeep Compass fuel-saving SUV.

GREENSENSE WITH ROBERT COLANGELO

Sunday 10/8/17

PROGRAM TITLE: Climate change threatening coffee/New Nissan Leaf

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday October 8, 2017

SOURCE: Green Sense Media

Climate change could drastically affect the coffee harvest around the world. A new study written in part by Dr. Taylor Ricketts, director of the Gund Institute for Environment at the University of Vermont says that could be the case. To tell us more, we're joined by Dr. Ricketts.

Tom Appel, publisher of Consumer Guide Automotive has news on a new all-electric Nissan Leaf all-electric car which is being redesigned for the 2018 model year. He and Robert also have a road test of the hybrid Chrysler Pacifica minivan.

GREENSENSE WITH ROBERT COLANGELO

Sunday 10/15/17

PROGRAM TITLE: Sculpture from landfills/Corporate Social Responsibility Update

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday October 15, 2017

SOURCE: Green Sense Media

Landfills are where most of the stuff that doesn't rot, or we can't recycle or reuse, ends up. But that may be changing. Inge Suijs is an artist from the Netherlands who uses landfill materials in her sculpture. Her sculptures are helping to raise awareness on how it could be used in numerous other ways.

While the top levels of government may not see the benefits of social responsibility when it comes to the environment, big companies see it differently. More and more, they're realizing Corporate Social Responsibility (or CSR) is better for the bottom line. Leon Kaye writes for TriplePundit, a global media platform covering people, planet and profit.

Plus, our regular food correspondent, Chef Mareya Ibrahim has a healthy Thai pumpkin curry recipe for the fall season.

GREENSENSE WITH ROBERT COLANGELO

Sunday 10/22/17

PROGRAM TITLE: Steel's environmental advantages/Washed Ashore art project

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday October 22, 2017

SOURCE: Green Sense Media

Steel has been long the material of choice for carmakers. In recent years, aluminum's been on the rise as they try to make cars lighter in weight. But even more recently, environmental advantages of steel are getting greater notice when it comes to long-term sustainability. We're joined by David Anderson from the Steel Market Development Institute.

Art can be a positive way to draw attention to crises. One of them is the global marine crisis and artist Angela Haseltine Pozzi. For the past six years, her project Washed Ashore has processed tons of plastic from Pacific beaches to create monumental art to awaken the hearts and minds of people to this problem.

GREENSENSE WITH ROBERT COLANGELO

Sunday 10/29/17

PROGRAM TITLE: Greenest cities in America/Lymphatic Filariasis treatment in Haiti

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday October 29, 2017

SOURCE: Green Sense Media

While sustainability and green are part of the national conversation, what matters more is what individual cities have been doing to green up. And, if you check out this new list, how well they're doing varies widely. Jill Gonzalez is an analyst with WalletHub which published the new list of the Greenest Cities in America. It includes the 100 largest cities in the US and ranks them.

Next to mental illness, lymphatic filariasis is the leading cause of disability in the world. Many of us have never heard of it, but it is an often overlooked tropical disease. And, food is a way to prevent it. It's been tried with great success in Haiti thanks to a program with the University of Notre Dame. We're joined by James Reimer who's with the Notre Dame Haiti program.

GREENSENSE WITH ROBERT COLANGELO

Sunday 11/5/17

PROGRAM TITLE: Climate Change & mental health/Energy via water evaporation

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday November 5, 2017

SOURCE: Green Sense Media

We all probably first learned about the cycle of evaporation when we were in grade school - how water evaporates into the atmosphere, forms clouds, falls as rain or snow, and eventually evaporates again.

This could be source of energy that rivals wind and solar power and is, as yet, untapped. Dr Ahmet-Hamdi Cavusoglu with Columbia University is one of four researchers who've been looking into this.

We've heard a lot about how climate change is having and will continue to have an effect on our physical environment around us and on our own physical bodies. More research is showing how it'll have an effect on our own mental well being. Dr. Susan Clayton of Wooster College is one of the authors of a study that looks into how changes in the climate brings about changes in our psychological health.

GREENSENSE WITH ROBERT COLANGELO

Sunday 11/12/17

PROGRAM TITLE: Fuel-saving transmission innovation/Fuel subsidies/NexLoop irrigation

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday November 12, 2017

SOURCE: Green Sense Media

Car and light truck transmissions are now getting 10 speeds and beyond as a way to save fuel, thanks to a joint innovation between Ford and GM. Consumer Guide Automotive Publisher Tom Appel joins us.

The cheaper it is to fill up your car at the pump, the worse it is for the environment. And, in many cases the reason gas is cheaper is thanks to government fuel subsidies in a lot of countries, including the US.

Paul Burke with Australian National University's been doing research on fuel subsidies and how they lead to greater pollution.

By 2050, there could be 9 billion people on the planet with 70 percent of them living in cities. Urban agriculture is a way to feed many of them, but the issue of getting water into those indoor farms and greenhouses has been dealt with in an innovative way with the inventor we're about to meet. Jacob Russo with NexLoop is our guest.

GREENSENSE WITH ROBERT COLANGELO

Sunday 11/19/17

PROGRAM TITLE: Safety of autonomous cars/Simplifying food labels

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday November 19, 2017

SOURCE: Green Sense Media

Autonomous cars, which would not only save fuel because they'll hopefully be better drivers than people...they could also save lives. And, we're closer that we might think to be able to experience this benefit. David Groves is the author of a new study for the RAND Corporation that looks at safety benefits of autonomous cars.

Food labels like "Use by," "Display until," and "Best before," are meant to help us understand how long our food might last. But, because there's no standard to how they're labelled, it leads to a lot of confusion and a lot of food being thrown out because people assume it's gone bad. In order to reduce food waste, several major food companies have now committed to simplifying the labelling system by 2020. Ignacio Gavilan is Director of Sustainability with the Consumer Goods Forum.

GREENSENSE WITH ROBERT COLANGELO

Sunday 11/26/17

PROGRAM TITLE: Inspiring students to be green entrepreneurs/Freshwater sponges & pollution

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday November 26, 2017

SOURCE: Green Sense Media

In order for America to succeed, the chains of educational tyranny needs to be broken. How that might be done is by making innovators into entrepreneurs. Dan Dawes is Entrepreneur-in-residence at the Purdue Foundry at Purdue University doing just that.

A living organism that few people might not realize even exists might be able to teach us something about clean water. A new effort to study freshwater sponges is now underway because of the way they filter water in natural ecosystems. University of Minnesota researcher Tony Schroeder is our guest.

GREENSENSE WITH ROBERT COLANGELO

Sunday 12/03/17

PROGRAM TITLE: Renewable gift wrapping/Rebuilding green communities in Rust Belt cities

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday December 3, 2017

SOURCE: Green Sense Media

Americans throw away 25% more trash between Thanksgiving and New Years than any other time of year. It adds up 25 million tons of garbage or about 1 million extra tons per week. Much of it, from holiday gift wrap that we use once and throw away. Heather Baez had the idea to green up gift wrapping with GG Wrap.

Once-great industrial cities that have deteriorated face unique challenges which are being met by people with the right spirit, attitude, and entrepreneurship. Raymond Garcia of Hammond, Indiana is working to green up his city by revitalizing neighborhoods.

GREENSENSE WITH ROBERT COLANGELO

Sunday 12/10/17

PROGRAM TITLE: Renewable energy from waves/Green cars at the LA Auto Show

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday December 10, 2017

SOURCE: Green Sense Media

Renewable energy in the form of solar and wind has made great strides in recent years. But one that's also making progress is wave energy, something that's being tested where the waves are in short supply. Dr. Patrick Cross is a specialist with the Navy Wave Energy Test Site in Hawaii.

The Los Angeles Auto Show wrapped up a few weeks ago and Consumer Guide Automotive Publisher Tom Appel has a look at some of the green car tech. he discovered there.

GREENSENSE WITH ROBERT COLANGELO

Sunday 12/17/17

PROGRAM TITLE: Pintail Power/2017 Hurricane Season

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday December 17, 2017

SOURCE: Green Sense Media

A new hybrid way to generate power which combines solar, traditional power generation and molten salt thermal energy storage could bring big results when it comes to generating and storing energy while bringing down pollution. We're joined by Dr. William Conlon, CEO of Pintail Power.

The devastating 2017 hurricane season ended last month with 17 named storms, 10 of which grew to hurricane status. Six of them were major hurricanes, two of them category 5. To help us understand this record-setting year, we're joined by hurricane specialist Eric Blake with the National Oceanic and Atmospheric Administration.

GREENSENSE WITH ROBERT COLANGELO

Sunday 12/24/17

PROGRAM TITLE: 2017 in Green Cars/Climate Engine

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday December 24, 2017

SOURCE: Green Sense Media

With a look back on Green Cars for 2017 – sales, new technology and other trends in EVs, hybrids and high-mpg cars – we're joined by Consumer Guide Automotive publisher Tom Appel.

As much of the national conversation over climate change seems to be mainly over whether or not it's real, anyone and everyone who can get online can use ClimateEngine.org to research all kinds of climate data - current and historic. Here to tell us more is John Abatzoglu with the University of Idaho and co-principle investigator of Climate Engine.

GREENSENSE WITH ROBERT COLANGELO

Sunday 12/31/17

PROGRAM TITLE: Lime Bike/Solar power highways

PROGRAM LENGTH: 28 minutes

DATE AIRED: Sunday December 31, 2017

SOURCE: Green Sense Media

Bike Sharing has been around in a handful of US cities for a few years: bikes are stored on a docking station where you pay the daily fee, it unlocks a bike for you to ride and you return it to another docking station later on. The latest innovation comes within the last few months from LimeBike, which has a dockless system and is now in 30 cities across the US. the bikes can be dropped off and picked up anywhere. We're joined by Colin McMahon with LimeBike.

Everyday objects that we pass by and pay little attention to can be used to generate energy. One example are noise barriers along highways that could also be fitted with solar panels to generate electricity. It's something they're looking into along The Ray, a high-tech stretch of highway in Western Georgia that's a proving ground for green tech. We're joined by Allie Kelly, executive director of The Ray.

SECTION III – PSA DESCRIPTIONS

SERIES TITLE: PSA
PROGRAM TITLE: Adoption/Foster Care
PROGRAM LENGTH: :15
DATE AIRED: 10/03/17 – 11/12/17
TIME AIRED: various times (14 total)
FORMAT: recorded
DESCRIPTION: There are 112,000 children in the US foster care system that are waiting for adoptive families. Using a humorous angle to communicate the seemingly challenging task of adopting a child from foster care, the PSAs reassure prospective parents that even if they are not “perfect,” they can provide the stability and security that older youth in foster care need and deserve. The PSAs direct audiences to visit adoptuskids.org or to call 1-888-200-4005 (English) or 1-877-236-7831 (Spanish) to receive the latest information about the foster care system and the adoption process.

SERIES TITLE: PSA
PROGRAM TITLE: Father Involvement
PROGRAM LENGTH: :30
DATE AIRED: 10/01/17 – 12/31/17
TIME AIRED: various times (76 total)
FORMAT: recorded
DESCRIPTION: According to an Ad Council survey, 86% of dads spend more time with their children today than their own fathers did with them. However, a majority of dads (7 out of 10) also reported that they could use tips on how to be a better parent. To inspire and support fathers everywhere, the Ad Council, U.S. Department of Health and Human Services, and the National Responsible Fatherhood Clearinghouse have launched a new series of public service advertisements (PSAs) that remind dads that “it only takes a moment to make a moment.”

SERIES TITLE: PSA
PROGRAM TITLE: Financial Literacy – Gift to Future Me
PROGRAM LENGTH: :60
DATE AIRED: 10/03/17 – 12/31/17
TIME AIRED: various times (42 total)
FORMAT: recorded

DESCRIPTION: Young adults ages 25 to 34 are often making critical decisions about starting families, buying houses and paying off student loans. Unfortunately, they struggle to save: Four in 10 said they have a hard time socking away even \$25 a week. Partnering with the American Institute of Certified Public Accountants (AICPA), the Ad Council launched the Feed the Pig campaign in 2006 to help young people focus on creating their own financial stability. The 2013 campaign, developed by ad agency KBS+, shows young adults that some of their peers are making smart money management decisions—and succeeding in saving money. The campaign uses humor, showing young people lavishly spending—eating lobster, getting massages, even feeding their own horse—while lamenting that they are living paycheck to paycheck.

SERIES TITLE: PSA
PROGRAM TITLE: Learning & Attention - Directions
PROGRAM LENGTH: :15 and :60
DATE AIRED: 10/01/17 – 10/29/17
TIME AIRED: various times (18 total)
FORMAT: recorded
DESCRIPTION: Learning and attention issues can look different to children and their parents. On one side, a child may see numbers, letters, and sounds that don't make sense, or distractions that prevent them from focusing. On the other side, parents and teachers may see the child as unmotivated, disinterested, poorly behaved, or simply not that intelligent. The PSAs bring to life these “two sides” of the learning and attention issues story by depicting both the parent and child perspective and encouraging parents that, “when you can see it from their side, you can be on their side.”

SERIES TITLE: PSA
PROGRAM TITLE: Meals on Wheels
PROGRAM LENGTH: :15 and :60
DATE AIRED: 10/02/17 – 12/30/17
TIME AIRED: various times (49 total)
FORMAT: recorded
DESCRIPTION: Simply by dedicating their time to serving seniors in need, volunteers can make an incredible difference. With 1 in 6 seniors already facing the threat of hunger and the senior population projected to double by 2050, Meals on Wheels has a pressing need to recruit new volunteers. The new campaign, “America, Let's Do Lunch”, invites Americans to “donate their lunch break” to deliver meals to seniors in need. Visit AmericaLetsDoLunch.org to sign up to volunteer with Meals on Wheels in your local community.

SERIES TITLE: PSA
PROGRAM TITLE: Discovering Nature: Show & Tell
PROGRAM LENGTH: :30
DATE AIRED: 10/05/17 – 12/30/17
TIME AIRED: various times (38 total)
FORMAT: recorded
DESCRIPTION: Over 80% of Americans live in cities. Fortunately, families don't have to leave the city to take their kids on an adventure to the forest. These new PSAs show parents and caregivers of tweens (ages 8-12) how accessible outdoor spaces are even when living an urban area. Through exploration of the green spaces and parks right in their neighborhoods, parents and their children can still feel connected to nature and ultimately create a lifelong interest in spending time in nature. Discovertheforest.org

SERIES TITLE: PSA
PROGRAM TITLE: Texting and Driving: Driving Blind
PROGRAM LENGTH: :30
DATE AIRED: 10/01/17 – 12/31/17
TIME AIRED: various times (39 total)
FORMAT: recorded
DESCRIPTION: Texting and driving is dangerous – that's a fact. More than nine in ten Americans believe sending (94%) and reading (91%) texts while driving is dangerous. This campaign targets drivers ages 16 – 34 and reinforces the idea that even though people feel impervious to the dangers of texting and driving, they aren't. Nobody is special enough to text and drive.
