Program 17-01  
Air Week 01/01/17-01/07/17

Producer Reed Pence  
Production Director Sean Waldron

2:02 SEGMENT 1: ICU INEFFICIENCY

12:25

Synopsis: With monitors surveying every part of patients' bodies, hospital intensive care units appear to be a model of high tech. But systems engineers say ICU's are actually models of inefficiency because few of those high tech devices talk to each other. Experts discuss how ICU's could be improved to save lives.

Host: Reed Pence. Guests: Dr. Peter Pronovost, Senior Vice President for Patient Safety and Quality, Johns Hopkins Medicine and Director, Armstrong Institute for Patient Safety and Quality; Dr. Brian Pickering, intensive care anesthesiologist, Mayo Clinic, Rochester, MN

Compliance issues covered: health care; technology; science and engineering; economics; business and industry

15:29 SEGMENT 2: REVERSING THE SHORTAGE IN PRIMARY CARE DOCS

7:36

Synopsis: Most people rely on their primary care doctors first when they need health care. But a shortage in primary care doctors is only getting worse. Some medical schools have been successful in keeping their grads in primary care. We talk to an expert from one of them to see how it's done and if other schools can replicate their success.

Host: Nancy Benson. Guest: Dr. Elizabeth Baxley, Sr. Assoc. Dean for Academic Affairs and Prof. of Family Medicine, Brody School of Medicine, East Carolina Univ.

Compliance issues covered: health care; public health; economics; education

2:02 SEGMENT 1: STONED DRIVING: HOW CAN POLICE TELL?

12:15

Synopsis: With recreational marijuana use legal in eight states and 29 permitting medical pot use, there will be more drivers on the road who are potentially under the influence of marijuana. However, police have no way to determine who is dangerous and who is not, as blood levels of marijuana's active ingredient are often meaningless. Experts discuss the problem and new scientific discoveries about marijuana impairment.

Host: Reed Pence. Guests: Dr. Marilyn Huestis, Prof. of Toxicology, Univ. of Maryland School of Medicine; Dr. Tom Marcotte, Assoc. Prof. of Psychiatry and Co-Director, Center for Medicinal Cannabis, Univ. of California, San Diego.

2:02 SEGMENT 1: PEANUT ALLERGIES AND KIDS: CHANGING THE RULES

12:58

Synopsis: Peanut allergies in children have skyrocketed to the point that many schools ban foods containing them. Now studies show previous advice is wrong. Rather than keeping kids away from peanuts to protect them, parents should give most infants peanuts from an early age. An allergy expert who is co-author of new guidelines explains.

Host: Reed Pence. Guest: Dr. Matthew Greenhawt, Asst. Prof. of Pediatrics, Allergy and Immunology Section, Children's Hospital, Colorado and Univ. of Colorado School of Medicine, and Chair, Food Allergy Committee, American College of Allergy, Asthma and Immunology

2:01    SEGMENT 1: ANTIBIOTICS AND FARM ANIMALS: NEW RULES

12:18

Synopsis: Antibiotic resistance may mean some infections are untreatable in the future. To combat this bacterial evolution, new federal rules went into effect on January 1 that restrict use of antibiotics in food animals, where the majority of US antibiotics are consumed. Critics worry the rules don't go far enough. Experts on both sides of the issue discuss.

Host: Reed Pence. Guests: Dr. David Wallinga, Senior Health Officer, Natural Resources Defense Council; Dr. Ramanan Laxminarayan, Director, Center for Disease Dynamics, Economics and Policy and former member, White House antibiotics panel; Dr. Liz Wagstrom, Chief Veterinarian, National Pork Producers Assn; Katie Roth, dairy farmer, Platteville, WI
