Allan, does the report we submitted have the § 73.1590 info he is asking for? If so, perhaps easiest would be to forward my email with the attached report to him. He was not on the original email and thus would not have been copied when I responded.

This guy sounds like the did not get the report that I submitted on 1/8/24... I can do a call at 10 Eastern/9 Central but I have a hard stop at 10:30.

Subject: Fwd: Complaint Regarding KSCV's Broadcast Frequencies (#6671025)

Kathleen/Allan:
Let's jump on a call about this in the morning. Would 9 Central work?

Eben

Subject: Complaint Regarding KSCV's Broadcast Frequencies (#6671025)

Greetings,

On 30 December 2023, the Federal Communications Commission received a complaint regarding broadcast radio station KSCV, 90.1 FM. The Complainant reported: "On Saturday, December 30, 2023, at approximately 1300 CST, KSCV's broadcast signal was observed to be occupying the entire bandwidth from 89.85 MHz to 90.35 MHz".

I request that you please provide me KSCV's equipment performance measurements (a requirement of CFR Title 47 § 73.1590). I also welcome anything else that you may care to provide regarding the issue presented in the subject complaint.

Kind regards,
John J. "Johnny Joe" Geraghty
