WWTV-WWUP

1. Extreme Winter Weather—Northern Michigan has seen some extreme winter weather this year. From feet of snow to record highs, our team of meteorologists look at how this all relates to climate change, and the long lasting impacts. We talk with communities as they try to how to handle their infrastructure as it is being impacted by this extreme winter weather.
2. Change in Michigan Leadership—for the first time in 40 years Michigan Democrats control the state House and Senate. As well as having a Democrat in the Governor's, Attorney Generals and Secretary of State's office. This dramatic change will have a monster trickledown effect for the state for years to come. We dive into how the Dems took control, what lead to it, what big agenda items they look to make over the next couple of years.
3. Historic Gas Prices—High gas prices are impacting everyone across the country, but Northern Michigan has been especially impacted. Our area thrives off tourism and agriculture, without travelers we lose jobs and businesses. Farmers are also now having to budget for higher fuel costs as they tend to their farms and transport their products. We sit down with these industries as they face another road block as they try to recover from the pandemic.

This is a reminder that your 2022 fourth quarter issues/program lists, covering programming from October 1-December 31, 2022, must be uploaded to your online public inspection file on or before **January 10, 2023**. As a reminder, your issues/programs list must reflect programs that have provided the station's most significant treatment of community issues during the preceding quarter. The list should include the issues identified as important to the community of

license and surrounding area, a brief narrative explaining why those issues were chosen, a narrative of the programming that addressed the issue, the program's title, duration, and the time and date of the airing.

As a reminder, each licensee is required to certify at the time of renewal that it has timely uploaded compliant issues/program lists to its public inspection file. Failure to comply with this requirement can result in a delay of your renewal application being granted, a Consent Decree imposed compliance program with periodic required FCC reports, and, in severe circumstances, with the renewal application being denied and your license being revoked.
