KINK's Brett Reckamp has an exclusive, in-depth interview with Jayson & Misti from Cresswell, Oregon. We hear their unique story which is a lengthy one. Jayson was a Marine and Army Medic. He was wounded multiple times - once severely. Yet, he continued to make his way back out onto the battlefield to help injured soldiers. After he returned from all his tours, Jayson was left with a slew of lifetime physical, mental and emotional conditions. He has too many injuries to list. One of his passions is dog training. Jayson uses it as therapy for himself and for other veterans suffering from PTSD. Even though 11 of Jayson's former soldiers have actually ended their lives by dying by suicide, he continues to counsel them with the use of dogs. He also volunteers at his local elementary school. Things were going well for the family until the huge "Snowmaghedden" storm caused a large tree to topple over right into their house. It split it in half. They turned to a contractor who ended up being shady. Instead of fixing their home, he ended up making it inhabitable while charging them tens of thousands of dollars. Then, along came a building inspector from Cottage Grove named Jason Bush. He is also a veteran and immediately decided to organize an effort to try and rebuild the Southmayd's home. He has been bringing together contractors, suppliers, builders and volunteers and has managed to get some support. A Go Fund Me page has been created. Jayson & Misti are not the type of people who are usually on the receiving end of things - they usually donate their time and are giving people things. This time, however they are the ones accepting charitable donations. An outpouring of love and donations are beginning to come in.
