## **Communities in Schools Interview Julia Bergen**

Communities in School is a program in Santa Fe that helps public school students that come from low-income households realize they can reach their greatest potential. The mission of Communities in Schools was discussed and many stories of how children's lives are changing everyday with their support. Children without community support are more at risk for missing school, dropping out and failing to earn a high school diploma. By helping these vulnerable students stay in school and succeed in life, we are building a stronger, healthier and more economically stable community here in Santa Fe.
