This decline is especially prevalent among Hispanics, given that only 50% of Hispanic youth participate in outdoor recreation, compared to 62% of youth overall. The Discovering Nature campaign's Spanish language segment features real Hispanic families as they escape from the stress of their daily lives in a journey to the forest. FARMER-CNFA0199000/H	PSA	Dec	7	:30	The new Child Hunger PSAs highlight how food banks work collaboratively with their communities to bring surplus food to children and families in need, including working with farmers, grocery workers, food bank employees and volunteers. The new campaign, which includes television, radio, print, outdoor and digital PSAs, is an extension of the Hunger Prevention campaign, first launched in 2008. Additionally, a supportive PSA effort promotes the Summer Food Service Program, a service administered by many Feeding America food banks across the country, which provides children who rely on subsidized meals during the school year with free and nutritious meals over the summer. The campaign draws attention to the fact that, "summer isn't fun when you're hungry" and encourages parents to visit feedingamerica.org/summer meals to find free meals for their children through their local Feeding America food bank.
