Description: DIE, TFU-20GTH/VP-R 6T140 Beam Tilt: 0.75 Degrees Electrical

Major lobe directions 33 153 273

(degrees true):

Antenna Coordinates: North Latitude: 39 deg 43 min

> West Longitude: 84 deg 15 min 18 sec

Transmitter output power: As required to achieve authorized ERP.

Maximum effective radiated power (Average): 525 kW

27.2 DBK

Height of radiation center above ground: 343 Meters

Height of radiation center above mean sea level: 616.1 Meters

Height of radiation center above average terrain: 351 Meters

Antenna structure registration number: 1013716

Overall height of antenna structure above ground (including obstruction lighting if any) see the registration for this antenna structure.

Special operating conditions or restrictions:

The grant of this construction permit is subject to the condition that, with ample time before commencing operation, you make a good faith effort to identify and notify health care facilities (e.g., hospitals, nursing homes, see 47 CFR 15.242(a)(1)) within your service area potentially affected by your DTV operations. Contact with state and/or local hospital associations and local governmental health care licensing authorities may prove helpful in this process. During this pre-broadcast period, you must provide all notified entities with relevant technical details of your operation, such as DTV channel, targeted on-air date, effective radiated power, antenna location, and antenna height. You are required to place in the station's public inspection file documentation of the notifications and contacts made and you may not commence operations until good faith efforts have been made to notify affected health care facilities. During this pre-broadcast period and for up to twenty (20) days after commencing operations, should you become aware of any instances of medical devices malfunctioning or that such devices are likely to malfunction due to your DTV operations, you must cooperate with the health care facility so that it is afforded a reasonable opportunity to resolve the interference problem. At such time as all provisions of this condition have been fulfilled, and either upon the expiration of twenty (20) days following commencement of operations or when all known interference problems have been resolved, whichever is later, this condition lapses.

*** END OF AUTHORIZATION
