Director of Engineering  
Lockwood Broadcast Group  
3914 Wistar Road  
Richmond, VA 23228

April 11, 2020

Dear Bob,

The letters announcing the delay of KTEN to begin testing and/or broadcasting on it's new channel were mailed on April 03, 2020 to 110 medical facilities within KTEN's predicted coverage area.

Enclosed is a copy of the Medical Notification Letter, a list of the addresses, and proof of mailing stamped by the US Post Office in Orlando, Florida.

RF Notifications will store the undeliverable letters returned by the USPS until 6 months after KTEN's transition is complete. If at any point they are required please let us know and we will send them to you ASAP. Please note that the average return rate is generally eight to ten percent and letters are typically returned due to: the facility relocating and forwarding has expired, the name was changed, the facility refused to accept the letter, or the operation merged with, or was acquired by another company.

The returned letters along with the total list of facilities notified and the proof of mailing will be evidence of your sincere attempt and good faith effort to identify and notify health care operations in your coverage area. Please place these documents in your Public File.

In closing, it has been a pleasure to serve you and your station, and I look forward to helping you with any other notification needs as they arise in the future.

Sincerely,

Lisa Sockett  
COO – RF Notifications

### UPDATED NOTIFICATION - PLEASE READ

**Due to the Covid19 virus limiting the availability of installation crews, the completion date for KTEN's frequency change is now delayed. - Please see below for new dates.**

Dear Administrator or Biomedical Engineer,

KTEN has retained RF Notifications, a broadcast TV consultant, to notify you of the impending change of the Station's digital television channel in your area.

We are notifying you of this channel change because patients at your facility may use biomedical telemetry devices that operate in the television broadcast band and may be affected when this change takes place.

As early as April 18<sup>th</sup>, 2020, KTEN may begin testing their new DTV broadcast transmission equipment on UHF channel 17. This testing is in preparation for full time operations to commence on or about May 18<sup>th</sup>, 2020. During this testing phase KTEN's current channel will remain on-air.

Certain biomedical telemetry devices have been allowed to use unoccupied TV channels in their area on a **secondary basis**, according to the rules of the Federal Communications Commission (codified at 47 CFR 15.242 (a)(1)). If interference to or from these devices arises with regard to the TV broadcast service, the devices must cease operation on that channel. It is the responsibility of the medical facility or operator of the device to identify and retune its equipment to an alternative non-interfering channel.

The purpose of this letter is to provide you information and give you reasonable opportunity to resolve any issues. It will be important for you to discuss these changes with your technology supplier, especially if there is a possibility that biomedical devices used in your facility are likely to malfunction when KTEN changes TV channel operations. **If you plan to replace your biomedical equipment, we urge that you purchase equipment designed to operate in the frequencies set aside for medical use.**

The contact information for the broadcast executive in charge of the TV station, along with the commencement date, TV channel and frequency band for each station are listed on the attached page(s). Please contact the individual listed on the attached page who is associated with the specific channel, if you wish for more information or want to report anticipated or actual interference problems.

Kind Regards,

Lisa Sockett, COO - RF Notifications

RF Notifications

## Relevant Technical Information

This notice is being sent to announce that KTEN-TV will change its DTV broadcast transmission to UHF channel 17 as described below.

In order to prevent interruption in patient care, please review the following pertinent information for the new facilities and compare to your telemetry equipment immediately. This is the only notice you will receive.

### KTEN-TV

Virtual Channel	10	(the channel position on the viewers' TV receiver)
New DTV Channel	17	(the actual broadcast channel)
Frequency:	488-494	MHz
Earliest Testing date:	04/18/2020	
Scheduled full time operations on or about:	05/18/2020	
Effective Radiated Power:	1000	kW
Antenna Location:	34-21-34.0 N 96-33-35.0 W	
Antenna Height	Above Ground	424 meters
(center of radiation)	Above Mean Sea Level	692.3 meters
	Above Average Terrain	426 meters
