Section 1 - Issues

Townsquare Media provides its listeners with programming and public service announcements that address the issues of concern to our local community. The stations have identified the following issues as significant issues facing the community this quarter.

1. **Winter Effect on Wildlife:** Southern Idaho has seen an enhanced increase in the moose population while chronic wasting disease and heavy winter melt could devastate the deer population. The Quagga Mussel project also had a huge impact on the Snake River fish population.
2. **School Resource Officers:** What does it take to become a school resource officer (SRO) and how do they feel about the idea of teachers carrying guns at school?
3. **Winter Effect on the City:** Why the city only plows certain roads during the winter and what residents should do to report a pothole if they encounter one. Tips were also given on flooding safety for drivers and homeowners.
4. **Idaho Aquifer and Reservoir Levels:** Many of the reservoirs in Southern Idaho are at ideal levels for spring irrigation but the main aquifer appears to be shrinking.
5. **Lava Ridge Project:** The plan to build a wind farm on BLM land continues to be a controversial topic in The Magic Valley. How the windmills will affect aviation, protected animals, and local sites is a great concern.
6. **ATV Trail Use in the South Hills:** The Twin Falls County Sheriff reminded ATV and snowmobile drivers that tags are required for their transportation and abuse of the groomed trails could come with a hefty fine.
7. **Magic Valley Population Growth:** The area is experiencing record-breaking construction which is driving up housing costs and depleting old farms and fields.
