

Cancer Services
2014 Public File

Cancer Services, your local United Way cancer agency was created over sixty years ago to help fight cancer in our community. During that time a dedicated team of professionals and volunteers has provided programs to fuel the progress that has been made. Priority one is caring support for cancer patients and families with financial, emotional and other concerns. Services may include rides to medical appointments, funds for urgent bills, support groups, counseling, yoga and zumba classes and wigs to name a few. All services are free and confidential. Cancer services also promotes cancer free lifestyles thru school, work and group sites, motivating individuals to protect there health. They help people with tobacco use, give presentations along with collaborating on initiatives like family one on one wellness day at the Midland Mall each year. Call Cancer Services today at 835-4841 to schedule a program or receive patient assistance. You'll learn first hand that they truly do give help for today, hope for tommorrow. This is a community reminder from WMPX and WMRX.
