Title: Our Race Reality: Inside Small Town America

Issue: Minority/Ethnic

Description of program:

Hosted by FOX 29 News Anchor Bill Anderson, this special takes an in-depth look at the town of Franklinville, NJ, which was recently in the news for showing some residents standing along the side of the road as a "Black Lives Matter" march was going down the street. The counter-protestors were holding up Confederate flags and mocking the death of George Floyd by acting out the moment where a policeman knelt on his neck and killed him. Many residents feel they gave their town a bad name and disagreed with these counter protestors. FOX 29 returned to the town to talk to residents about whether or not they feel that racism is a problem in their community.

Title: Our Race Reality: Health & Equity

Issue: Minority/Ethnic

Description of program:

Hosted by FOX 29 Medical Reporter Joyce Evans, this special takes an in-depth look at healthcare disparities among African-American communities. Black Americans face generations of systematic racism in the US Healthcare system. Raw, unflinching and honest, Black doctors and patients tell it like it is and like you've never heard it before. What's the real deal about why Black men don't go to the doctor? Why have generations of doctors not been giving their Black patients the right care from the exam room to the prescription tablet? Why don't Black communities have the same access to fresh, healthy food that could help keep some smaller issues from being life-threatening problems, and what's being done about it? It may be hard to hear... you may not like it. But it's the truth and something needs to change. People are dying.

The special first teaches viewers the definition of anti-Semitism, then expands on that explanation by reflecting on the past and the Holocaust, examining the present and Black and Jewish relations, and looking toward the future and how young people plan to transcend Judaic traditions and pass them along to the next generation.
