

That's great. Unfortunately, all my friends that I grew up with and I would be potential clients. They straightened out so I had to figure out what what is in the long now you many years of you been practicing law for 25 years 25 years while and then allow it. So what made you want to go into law. Well, I just wanted to help people is great and the community that that I think is underserved in some way. Of course we did have the great Matt Connor and some other attorneys that were outstanding that were there times that we underserved and I wanted to help. This is right. That may sound realize I could help in a number of different ways by helping people with traffic matters. People who got in trouble. People had been in automobile ranks equally needed wills and estates, and sometimes people just need some advice and I think the most valuable about an attorney can give sometimes is to say you don't have a cat. I say be honest about it. To give an honest assessment about okay and in many cases it's not particularly the area of law that you specialize in, then you can direct them to somebody that you know they can help them. Well, here is an important left. Okay like you know what you're doing. You keep a straight for that you absolutely know you and I think that's important. No one that you that the rules of ethics allow you to take a case that you're not particularly well-versed in if you can become confident in that area or if you associate someone who does that particular kind of law and I've never been one to let my ego get in the laugh. I feel like I'm in over my hand in terms of a confidence standpoint and I'm always willing to associate someone or to send someone to find someone who knows more about, I am giving example in wills and estates. There's a certain amount of people have been blessed enough to accumulate my wealth then and they want to do a trust and I don't feel comfortable doing that as somebody who just does that kind of work all the time and so what areas I knew you briefly touched on that little while ago. So what areas do you practice law in well numerically I do criminal law numerically now. Traffic your routine traffic tickets. DWIs on people that get charged with attracting factions and factions that they don't go to court. For example, I handle cases where people abandon Rex automobile wrecks. That's very rewarding to a lot of people get hurt, they lose or source of income and there's a lot of collateral damage done when someone gets hurt and a lot of the work and also help people with their estate plan. And that's pretty rewarding as well to see people come in and God knows we all put off our state because we don't like to think about our mortality in the satisfaction that comes from from people when they leave plan okay now and then I got I got a got a game plan. I have made some decisions that take off the potential partner for my loved ones to make it weekly. I got excellent staff on Karen Lam, runs that she is my brains and Maria is been with me now about two years and their wonderful there well I am fortunate that way to say this, I am sent to my staff so that they're not listening but but I am nothing without their efforts really keep me straightened Making to where I get to practice law and do what I do when I'm okay at and and then they handle quite a bit of the burden. That's wonderful. So we've already established the fact that you do handle traffic matters. You have clients with revoked licenses that seem that they will never really get their license back. Well now that you know. Yes, the short answer to that is yes and believe it or not that greenery rewarding area. I have some good luck and a lot of that has to do with the District Attorney's Office willing to recognize that some people coming and that have let things accumulate and then work with you towards putting the light at the end of that tunnel. Let me give you an example. Let's say

that you innocently miss the traffic ticket can happen sometimes and then you're like well I no one sent me anything in. I've moved so the letter that DMV send you saying your license is revoked. You may not get in let's say you get a traffic ticket can you realize I forgot to go to court at one time_paid this ticket well pay that you get off congratulations are to be revoked for another year and then if you're revoked many get that notice and you get another ticket because people have to work to support her family and sometimes they make a very difficult decision. I'm not saying it's right to drive when they don't have a lot right now but there's a point that they come in and they say okay cards on the table. I need to drive and have some success with figuring out exactly what was the source of the problem. Let's go back in time and handle the one thing that calls everything else to be revoked and let's play your make sure your court costs are paid. Let's strike any family to appear fees that may be there, and it's expensive but it is really important for folks to know that it may sleep hopeless want the world would it cost you to go in and handle as much of the things that you can and we were fortunate to have a DAs office that is really good about working with with folks that allow that. Now that's good. So how many of these types of clients do you have during the year, on average, persons with traffic tickets. A person with charges of being revoked on charges of being revoked all goodness shaky and at least while it's hard to number on it because it is just so polite to understand what no number of individual cases. I would estimate a lot okay and my intercourse. My career of people that I've helped out some difficult medical situation. The one that people go out of their way to pat me on the back of the restaurant to stay in ATM that you don't know what this meant to me and my family and I mean I now married with kids there. They weren't horror regular jobs and if it never happened except for you handling this ticket and that's not to pat myself on the back is really to pat himself on the back because they they they took the actions and they did everything they needed to do to get back to where they were driving off what we want, what I was writing rewarding variance for you, for your team to be able to allow that to happen in and see those people when you're out in the public area. So what were going to get right back. We can take a break here and right now we've got to Timothy C. Morris your legal connection 102B South St. and when he's here and he's talking about some matters that are appropriate for all of us and I will get right back with him right here in just a couple minutes right here on FYI family medical supply and operated by Billy and Joey chart provides a complete range of medical supplies from home oxygen, wheelchairs, hospital beds, diabetic supplies, respiratory medications for daily living and other related supplies that one may need for all types of medical necessity. What separates family medical supply from the other medical equipment companies is the dedication of their friendly and responsive staff, along with the retail walk in stores. They have position in North Carolina to serve and be a part of the quite possibly have the largest selection of medical equipment and supplies in North Carolina family medical supply is located on 1120 W. Broad Street. They are open Monday through Friday 9 AM until 5:30 PM family medical can be contacted at 91089234 32 again 910 892 34 32 citizen family living facility presents community barbershop 24 hours emergency monitor chair to help to 1130 WP why be so FYI for two nineteenths and this afternoon we are privileged to have Tim. See Timothy C. Morris your legal connection. He's calling in from Wilmington understand is that where you're at today okay and were talking about matters of law, and particularly traffic DWIs Rex being able to bring people back to their

driving privileges and all sorts of things lessee handles other types of law and so were to get into that, so you know what happens when people get into Rex, and I know you handle those types of cases and I'm sure it's a very times trying, but very rewarding when you're able to get a settlement that is agreeable to everyone, and I don't think anyone on and if you've ever been in an action that you cannot know that orienting and I'll tell you my little story I was driving through the one IGA parking lot and I had 45 young men in the car and asked me what I was only for five young ones in the car. Well I don't know what I was doing well in the car, but they were all talking at one time and I had my mind strike and I wasn't going but about 5 miles an hour concrete poles and I thought to call Jones that tackled was only 5 miles. Now imagine going 30 or what have you. And what happened. I had a friend recently that they got into a wreck wherein collision back in really good and any contact MathWorks and eat and he just did not want what they cannot do other drivers fault if they are at fault and you are entitled under the laws of some type of recovering it all common sense is not like people trying to get the lottery out I think is a perception out there about these shyster lawyers that will bring unnecessary losses will your into what you the first thing you need to do is not talk with the insurance company and there's reasons for that because some of the statements that are given why they appear to be, in the sun an innocuous little bit they can come back to bother you. For example, if I called you after racking unit right now you don't. But you might be in a lot of pain but around here. We sell the plane about to let you fill out whatever that could be used to demonstrate that after the rent you want to play instruct people don't be polite, don't talk with the insurance company. They have a right to get your statement later, under just well, but then you have them come in and have them sign a fee agreement. I go over every line and that the agreement and I notify the insurance company to now deal with me. I tell the clients they have to to job someone get better in number to stay in touch with me and when they get better I begin the process of negotiating with the insurance company after I do my own investigation including statement from the person in the rank witnesses talk with law enforcement. I get action report. I take pictures of the scene pictures of the car and then you begin a negotiation process so that is not a thing and write you this is part of the process is going through so I guess it is a lot of information that you have to collect there is one of the things that a lot of people are entitled to something called med. The no-fault insurance policy on your own policy if you were at fault you can collect whatever your meant amount between one and \$2000 and I know a lot of publications, give you a hint that house they 10 or \$15 on med pay about. You can choose not to have met absolutely every single time I get as much med playing a sellout about snowfall and then you look and determine how much coverage is available. A lot of people to get in Rex and it's their fault. They don't mean for it to be their fault but everyone has a right under their own insurance policy have an attorney represent you may represent your interest. Good thing I don't fault the absurdity process, but what I gather all the information I determine then how do I value the case and under the law, you're entitled to your lost wages at work that makes sense. No one would dispute that. And then your medical bills that are that you incurred and then. Also anything and that were kind of like some people went some time, but it's like this. If I put an ad in the paper and I said hey would you like to be in a rack and roll down the hill and will will pay you for your lost wages and for your medical bills. No one in the right to do that because a series of gold

on that hill. The ambulance ride is not exactly comforting, and in the pain that you go through. As a result of imperfect process evaluation in my theory of goal was always being I am prepared to try everything okay because you have to bring that preparation into your negotiating to get a fair recovery. And that's what it's about. You want to play their Bizzell's advocate within the system and I do okay is wonderful to hear we are going to be slowly getting running out of time and one of the most important areas of law that you seem to have that you enjoy handling exposes wills for people really enjoy that and I would play as far as that goes, it just gives peace of mind and we do power of attorney health care power of attorney and living wills or declaration of a desire for natural that he called and that and really that's you making the decision ahead of time so that when a loved one may have to make a difficult decision about your health care you've Artie told him what you want and it and believe me when people leave out of my office and I and I always put their wills and Hunt County Courthouse that that's that's a good day for me and so I'm I have a general practice and pride goes before fall. They statement. I am proud of that and I thought you had one thing to this Thanksgiving season and there's not another person on this planet that has been more lucky than I have attached from so many people from neighbors from teachers from loved ones from people that encourage me. Trust me to let me help them out on serious matters in matters that are not so serious that I want. I want everyone that you know during this Thanksgiving time is my body more thankful based on how fortunate I am and I'll say only on a just a note of my faith. I'm just thankful that there's a loving God and and I'm thankful that I have the ability to to seek knowledge through that and I never lose sight of where you know where my origins are from my folks are just very grateful and also great for WP why they for all that you guys so much. I just have one question about wills do people need to update a wheel when the ice mature when there's a life circumstance like somebody gets remarried or something. Well, you might want to reconsider some aspects of it got us a great question. Like for example if I were married. I'm not now, but if I were married and I won the lottery. Well, then I'm willing to get rid of the wife, and I think also that lowering the I'm getting a lot anytime is a life change if you lose a loved one. If you have some kids that you given that-year-old that your putting something your will for and one of those children may be not behaving like they sure could use problem or if there's a change or if you've accumulated some additional land for some additional well and you want to say what you and I like to give money to my church. I like to get money to two different source to a charity encourage people at least once a year to just think about think about what I need to be on my wheel and nothing unusual about very easy to do a cop and a cop. The simple change in a wheel. What is it called again. I couldn't quite understand what is called a title for the IL causal okay okay it just means a quick little change okay well that's good information and glad to do your able to allow people to hear this because we are here to support the public and I'm glad you're feeling very blessed this season in the happy good that you're able to call in and talk to us today. The pleasures line. I greatly appreciate having friends over there. Lots of old gray anyone needs an attorney for so they can certainly call me and I'll be glad to talk with okay and you been listening to Tim Morrison brother Morris your legal connection wanted to Be South St. in Erwin and you need to give a call sometime. His numbers 910-897-2105 and again thank you Tim and I'm sure will be tickled to have you back sometime pretty soon yes sir. Have a wonderful day. Barbershop 24 monitor care to
