

KOTA/KEVN FCC for October through March 2022

Gray Television Rapid City continued its commitment to covering issues impacting the local community across its platforms KOTA-TV and KEVN-TV.

During the last quarter, that included emphasis on numerous issues including:

- Fires – both wildfires and home fires. These fell in environmental and public safety categories
- With our state lawmakers in session, we covered ongoing legislative issues
- Continuing efforts to establish medical marijuana rules
- Public Health stories continued to include COVID information, mental health and drug addiction
- Economic issues relating to job openings and the area's homeless population. Local tourism and construction played major roles in the area's economy as well.
