BEACH TV PROPERTIES, INC.
CHILDREN'S TV PROGRAMMING REPORT AMENDMENTS

I, Ken Davis, Executive Director of Operations for both Beach TV of South Carolina, Inc., licensee of stations WGSC-CD (Facility ID 4349) and WGSJ-CD (Facility ID 4350), Murrells Inlet, South Carolina; and Beach TV Properties, Inc., licensee of WPCT-TV (Facility ID 4354), Panama City Beach, FL, WAWD-TV Fort Walton Beach, FL (Facility ID 54938), WPFN-CD, Panama City, FL (Facility ID 4351), WDES-CD, Destin, FL (Facility ID 4353), WCAY-CD, Key West, FL (Facility ID 4352), and KNOV-CD, New Orleans, LA (Facility ID 64048) (Beach TV of South Carolina and Beach TV Properties collectively referred to herein as "Beach TV"), hereby certify as follows:

Beach TV takes its Children's TV responsibilities *very* seriously. Review was made of all of the Children's TV reports for all of the stations filed during the current license term. In addition to the issue brought to Beach TV's attention by the FCC staff in the reports filed in 2018 and beyond (see below), a few clerical errors (arising from the different number of weeks in a given quarter) were found and have been corrected in the revised reports.

Beginning in 2018 Beach TV changed the producer of episodic children's programming aired on the Beach TV stations. During the period from 2018 to the present, these stations aired Children's Programming on Monday, Tuesday and Wednesday at 12:30pm and 1:30pm. In these time slots, Beach TV rotates six different episodic shows received from Telco Productions. While Beach TV believes that all of the stations were in compliance with the FCC's Core Programming obligations as prescribed by FCC rules *at all times during the license term*, the way that we reported the airing of these programs was confusing and made it difficult for the FCC to confirm that Beach TV complied. The reports as originally filed showed the days/times Children's Programming was regularly scheduled but did not make clear the days/times a particular Program actually aired. This was an administrative error. Since the same programming airs in each of the Beach TV markets, a single template is used to prepare its Children's Programming reports. As a result, the issue corrected in the 2018-2019 revised reports was perpetuated in all markets.

Attached are amended quarterly reports corrected to show the actual time aired and the frequency which each program aired.
