

## Exhibit 5 MULTIPLE OWNERSHIP STUDY

1TV.Com, Inc. is the licensee of two AM stations and an FM station as well as the permittee of a new AM station, all of which are located in Arizona. These facilities are as follows:

Call Sign	City of License	Facility ID	Frequency and Power
New (AM)	Ajo, AZ	129589	1340 kHz; 250 W unlimited
KBSZ(AM)	Apache Junction, AZ	11217	1260 kHz; 320 W day; 50 W night
KIKO-FM	Claypool, AZ	11894	97.3 MHz; 6 kW
KIKO(AM)	Miami, AZ	72477	1340 kHz; 1 kW

Stations KIKO-AM/FM operate as a AM/FM combination in Claypool/Miami, Arizona. Stations KIKO-AM/FM are relatively small powered stations which are located some 40 miles from KBSZ in Apache Junction. Station KBSZ also operates with relatively small power. There is no prohibited overlap between Stations KIKO-AM/FM and Station KBSZ. The new AM authorization in Ajo, Arizona is another relatively low powered station. Ajo, Arizona is some 130 miles southwest of Phoenix. Again, there is no prohibited overlap with the proposed signal of this station with either of the three operating stations owned by 1TV, Com, Inc.

It should be pointed out that even if overlap had existed between KIKO-AM/FM and KBSZ, KBSZ is located in the Phoenix metro market which has some 55 AM and FM broadcast station licensed to that market (see BIA Research, Inc.'s Media Access Pro Data Base). Accordingly the current local radio ownership rules permit 1TV.Com, Inc. to have a cognizant interest in eight commercial radio stations (with five in the same service in Phoenix metro). 1TV.Com, Inc. has only one cognizable interest in the Phoenix metro.

For reasons set forth herein the grant of this application to modify the facilities of KBSZ is fully consistent with the local radio ownership rules.
