## **Ascertainment of Community Needs Issues List** **01 October 2015 – 31 December 2015**

1. Veteran's Issues
2. Current Issues in Secondary and Post-Secondary Education
3. Developments in Science and Technology
4. Human Impact on the Planet
5. Interaction Between Cultures
6. Women in Literature
7. Youth Influence on Culture

## **(Section 1.) Veterans Issues**

Title: Veterans Day Special Pt. 1

Time: 5:00 AM

Duration: 20 minutes

Source: The Moth

Date: Wed., 11 Nov 2015

- After returning from active duty in the Middle East, a marine searches for new meaning. Includes interstitial music selected locally by KNHC music department.

Title: Veterans Day Special Pt. 2

Time: 5:20 AM

Duration: 20 minutes

Source: The Moth

Date: Wed., 11 Nov 2015

- A 97-year old woman describes training young men for World War II combat as a WASP; a father being deployed to Iraq must find a way to explain it to his children. Includes interstitial music selected locally by KNHC music department.

Title: Veterans Day Special Pt. 3

Time: 5:40 AM

Duration: 20 minutes

Source: The Moth

Date: Wed., 11 Nov 2015

- A World War II soldier from Wisconsin serves with the segregated 93<sup>rd</sup> Infantry Division in the South Pacific. Includes interstitial music selected locally by KNHC music department.

Growing food for the Mars mission... Saving lives with emergency braking in cars...  
 Therapy for Pulmonary hypertension... Digital Europe – Deutsche Bahn puts data online

Produced and presented by Gudrun Heise

### TOPICS

## Growing Food for the Mars mission

Films like "The Martian" have caught our imagination, and NASA is well ahead, developing the Orion program, with the stated aim of putting people on Mars. But feeding the astronauts would be one of the greatest challenges. A team of researchers in Norway are working on it.

Report: Fabian Schmidt

### AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## German Future Award: Radar sensors in cars

Just a few years ago, radar sensors for cars were very expensive. One team nominated for the Future Prize developed affordable systems for cars which brake automatically if there is an obstruction.

Report: Fabian Schmidt

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## German Future Award: Therapy for pulmonary hypertension

Pulmonary hypertension is a rare disease affecting only about 50 in a million people. It involves an increase of blood pressure in the lungs. But, there is a new class of substances that can save lives.

Report: Fabian Schmidt

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## Digital Europe: Deutsche Bahn puts data online

Deutsche Bahn, Germany's national railway, is taking the first tentative steps to make some of its data open for others to use. This move could bring major benefits for passengers and the company.

In the studio: Kate Hairsine, Digital Europe correspondent

Weapons that think for themselves, encryption technologies blamed for Paris attacks, DNA blood tests for Down syndrome, and a botchy, sputtering start for 3D printing.

Produced and presented by Conor Dillon

## TOPICS

### Should autonomous weapons be banned?

Weapons that "think" for themselves and can kill without human intervention - the technology has arrived. Barry McKay reports on potential implications for the future of terrorism and how governments are trying to catch up.

Report: Barry McKay, Melbourne, Australia

## AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

### Encrypted communications and terrorism

Encryption technologies are under fire as political leaders worldwide say they've helped enable terrorists to plan attacks in Paris. So where's the middle ground between our right to secure communications and our desire to stop future terror attacks? Digital Europe correspondent Kate Hairsine tells DW why encryption is more necessary than

ever.

Listen to the interview with Digital Europe correspondent Kate Hairsine

AUDIOS AND VIDEOS ON THE TOPIC

Listen to the interview

## DNA blood tests for Down syndrome in Germany

DNA blood tests for Down syndrome remain controversial in Germany. The practice was legalized in 2012 - despite opposition from human rights groups and religious institutions. Yet the consequent decision about whether or not to terminate a pregnancy remains a tough one for any expectant parent. Kait Bolongaro brings us one family's

story from the German hamlet of Altenglan.

Report: Kate Bolongaro, Altenglan, Germany

AUDIOS AND VIDEOS ON THE TOPIC

Listen to the report

## 3D printing takes flight

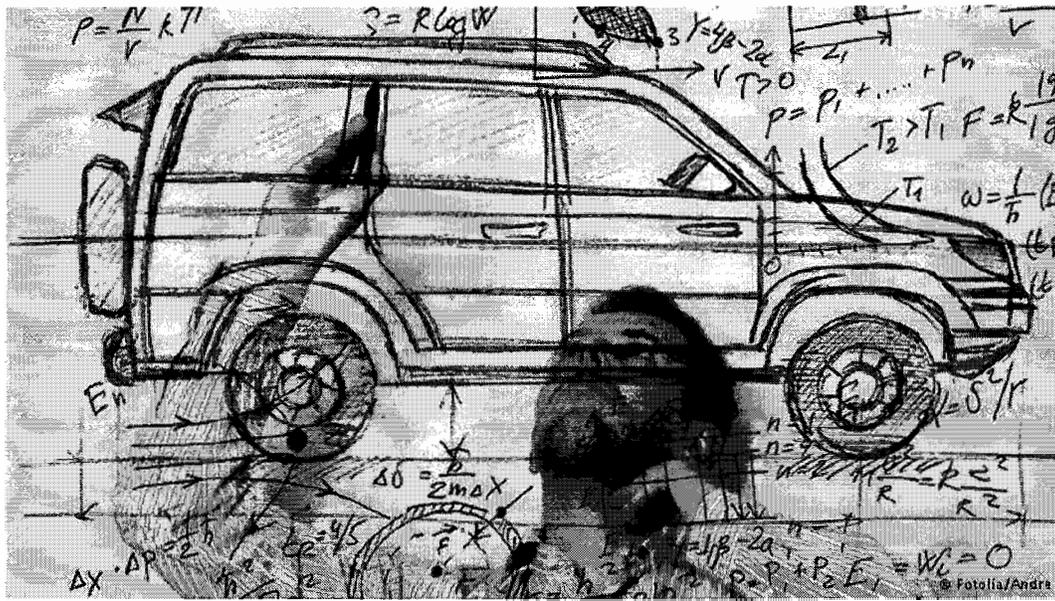

The 3D printing revolution is well underway, but its beginnings were a bit rough around the edges. DW's Fabian Schmidt visited a few 3D printing pioneers nominated for the upcoming the German Future Prize.

Report: Fabian Schmidt, Bonn, Germany

The new Satellite Sentinel-3A ...mine-sniffing rats ... Investigatory powers bill ... a show in full armour

Produced and presented by Gudrun Heise

### TOPICS

## The new Satellite Sentinel-3A

Earth Observation Satellites provide us with lots of free and open data. The next satellite in line to join the Copernicus program is the Sentinel-3A satellite. It's due to launch in early December.

Report: Zulfikar Abbany, Cannes

### AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## Mine-sniffing rats

In Cambodia unexploded ordnance or UXOs buried in the ground still kill or maim dozens of people every year. Now the government is using rats to detect those weapons.

Report: Michael Sullivan, Cambodia

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## Digital Europe: Investigatory powers bill

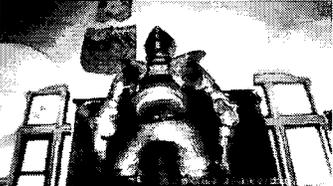

The United Kingdom could become the first democracy in the world to collect all the internet data of its citizens if its new draft investigatory powers bill gets voted into law.

In the studio: Kate Hairsine, Digital Europe correspondent

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the interview](#)

## Heavy metal – a show in full armour

Two Austrian-based dancers created a show performed entirely in full armour. They downloaded an app that provides a training program. It's called "you are your own gym".

Bacteria on the ISS? ...WHO study on meat... Post Polio Syndrome ...Net neutrality in the EU ... Green talents

Produced and presented by Gudrun Heise

## TOPICS

### Bacteria on the ISS - how dangerous are they?

Dangerous bacteria in the International Space Station? An article published in the Microbiome Journal listed some potentially hazardous microbes floating around the microgravity environment.

Interview: Conor Dillon / Ralf Möller

## AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the interview](#)

### "Don't eat meat" - a WHO-study has caused quite a stir

A study by the WHO about the danger of eating meat was published last week. It came to the conclusion that processed meat such as sausages, bacon and ham cause cancer. Do we have to stop eating red meat altogether?

Report: Brigitte Osterath (voiced by Helen Seeney)

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## Post Polio Syndrome

World Polio Day is held on the 28th of October. Vaccination is the only protection against an infection with the Polio virus. The disease can cause paralysis and the symptoms could come back after decades.

Report: Gudrun Heise (voiced by Samantha Early)

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## Digital Europe: Net neutrality in the EU

The EU has passed a new telecommunications law that has drawn a lot of criticism. Amongst other things, it is supposed to regulate net neutrality, making the internet equal for and fair for everyone.

In the studio: Kate Hairsine, Digital Europe correspondent

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the interview](#)

## Competition for "Green Talents"

Last Friday the German Federal Ministry of Education and Research awarded prizes to 28 young scientists from 21 countries. The "Green Talents" research has made a valuable contribution to environmental protection.

A Thirty Meter Telescope on sacred Hawaiian ground, a Czech smartphone for the visually impaired, where you can ride your rideable technologies (or not), and German kids plan the "city of a future."

Produced by Nicole Goebel

Presented by Conor Dillon

## TOPICS

## On holy ground - Hawaii's Thirty Meter Telescope

The Thirty Meter Telescope, slated to be the world's largest, has scientists lining up to perform deep-space research. But at the base of Mauna Kea, protestors - or "protectors," as they call themselves - consider it a blight on their sacred mountain. DW's Brigitte Osterath reports from Big Island, Hawaii.

Report: Brigitte Osterath, Hawaii, USA

Presented by Gudrun Heise

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## BlindShell, a smartphone for the visually impaired

Researchers in the Czech Republic are developing a very special kind of smartphone, designed first and foremost for blind users. Laura Postma has this report from Prague on why the manufacturers and users say it's better than comparable apps.

Report: Laura Postma, Prague, Czech Republic

AUDIOS AND VIDEOS ON THE TOPIC

[SP2015-44 BlindShell phone - MP3-Stereo](#)

## 'Rideables' hit legal potholes

Urban transportation is being redefined through e-skateboards, e-unicycles and, yes, hoverboards - with some weird and wacky gadgets in between. Digital Europe correspondent Kate Hairsine tells you where you can and can't ride them.

Interview with Digital Europe correspondent Kate Hairsine

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the interview](#)

## German kids: 'City of the future' needs skate parks

It was supposed to be an exercise in forward thinking. But when a German government program involved young people in urban planning, the answer they got was "skateboards." DW's Fabian Schmidt has this report.

Report: Fabian Schmidt, Bonn, Germany

In this week's Spectrum: alien megastructures in our galaxy?...foraging for mushrooms with an app...fighting Dengue Fever in India...the decorated cricket's sex life and Prague's Signal Festival of Light.

Presented and produced by Nicole Goebel

Additional Producers: Conor Dillon, Gudrun Heise

## TOPICS

### Alien megastructures in our galaxy?

There is a star in our very own galaxy that might have "alien megastructures" circling around it. Sounds crazy? Well, it probably is. It's unlikely that the Age of the Aliens has come to the milky way just yet.

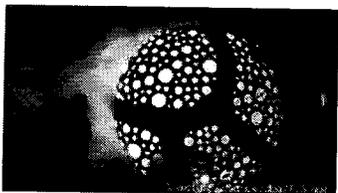

Report by Conor Dillon

#### AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

The Czech capital Prague has just hosted to the third annual "Signal festival of light." It

## Prague's Signal Festival of Light

showed more than 20 installations including video-mappings and light projections. It's a brilliant showcase for the use of technology in art.

Report by Rob Cameron, Prague

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## Digital Europe - foraging for mushrooms

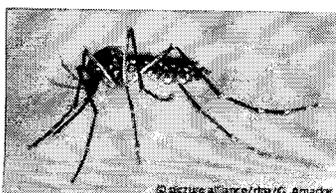

Forests in Europe are teeming with mushrooms in autumn. Time to go foraging. But how do we know which ones are edible? There are apps for that but as our Digital Europe Correspondent Kate Hairsine explains they often don't deliver.

Kate Hairsine, Digital Europe Correspondent

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the interview](#)

## Dengue Fever in India

Dengue Fever is one of the fastest growing viral infections in the world. The WHO estimates there are roughly 50 million dengue infections worldwide every year. India is in the grip of its worst dengue fever outbreak in years, but there is no reliable vaccine yet.

Report by Murali Krishnan

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## The sex life of the decorated cricket

Female spiders and the Praying Mantis devour their male partner after having sex. Other insects choose a less drastic way - the decorated cricket, for example, delivers prey to his female instead.

Report by Fabian Schmidt

From the neutrino Nobel Prize in Norway to the India-based Neutrino Observatory in Tamil Nadu. We also take a look at antibiotics in poo, the EU Court of Justice's ruling against US tech firms and at robots in Nigeria.

Presented by Conor Dillon and produced by Gudrun Heise.

## TOPICS

### Neutrinos - let there be mass

Why is it important that neutrinos have mass? Physics expert Johannes Blümer tells DW why discoveries about the subatomic particle's properties warranted the 2015 Nobel Prize in Physics.

Produced by Gudrun Heise, presented by Conor Dillon.

## AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the interview](#)

### India goes underground in neutrino hunt

An ambitious project in southern India will capture the country's first neutrino readings within two decades. It will also cost the country 25 times as much as its successful Mangalyaan Mars Mission. So why do it? DW correspondent Murali Krishnan talked to the scientists to find out more.

Report: Murali Krishnan, Chennai, Tamil Nadu, India

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## Probing poo for antibiotics

Have you ever wondered how valuable your feces might be? Maybe you've had to give a doctor a stool sample? As DW's Jessie Wingard reports, a group of researchers in the Netherlands are using stool samples to study the growing resistance of bacteria to antibiotics.

Report: Jessie Wingard

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## Digital Europe: US no 'safe harbor' for EU data

Facebook and other tech giants can't send data back to the US anymore, says a ruling by the EU Court of Justice. As DW's Digital Europe correspondent explains, however, the judgment might be a touch broad in its scope.

Interview: Kate Hairsine & Conor Dillon

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the interview](#)

## Nigerian kids learn robot tech

How to ensure kids play a role in your country's technological future? Introduce them to robots - and early. DW's Sam Olukoya reports from Lagos, Nigeria on a project helping children from low-income households.

Report: Sam Olukoya, Lagos, Nigeria

Data transmission via laser...refugees in science jobs...an ark Noah for seeds...Digital Europe: consumer rights act

Produced and presented by Gudrun Heise

## TOPICS

## A new way of data transmission

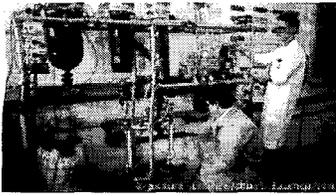

Lasers have been around for decades, but what you might not know is that they're rather good at transmitting data – but not perfect. In the Czech city of Brno some scientists are working on making laser communication more reliable.

Reporter: Rob Cameron, Brno

## AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## Refugees in science jobs

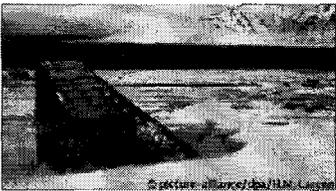

Amongst the thousands of refugees who have come to Germany there are highly qualified people like doctors, chemists, scientists. Will they get the opportunity of working in their former profession?

Reporter: Fabian Schmidt, Bonn

AUDIOS AND VIDEOS ON THE TOPIC

Listen to the report

## An ark Noah for seeds

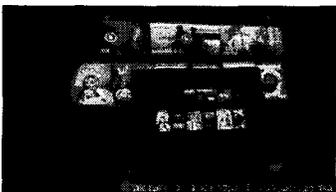

It's a scenario often explored in science fiction: a post-apocalyptic world. Everything is destroyed. The survivors have to start all over again including growing plants. Luckily, the world has a back-up. It's called the "Svalbard Global Seed Vault" in Norway.

Reporter: Michael Marek, Svalbard

AUDIOS AND VIDEOS ON THE TOPIC

Listen to the report

## Digital Europe: consumer rights act in the UK

There's potentially some good news for people in the UK who download eBooks or stream music. As of the first of October, there is a new legislation that gives consumers clear rights to repair or replacement of faulty digital content.

In the studio: Kate Hairsine, Digital Europe correspondent

**The Best Of Our Knowledge #1315**

Wednesday, December 02, 2015 11:00 PM

In 2012, the New York Times Magazine published a detailed story about the sexual abuse of students at the Horace Mann School, an upscale private college preparatory school in the Bronx. As you might expect, the story got a lot of attention...but has prompted very little change.

Today on the Best of Our Knowledge, we'll talk to the author of that article who has expanded the story into a new book called "*Great Is The Truth: Secrecy, Scandal, and the Quest for Justice at the Horace Mann School*".

---

There are still 36.9 million people living with HIV globally and about 2 million new infections a year. Overall rates might be declining but amongst young people in some parts of the world they are still climbing. On today's show, we take a whistle-stop tour of the globe to mark World Aids day and examine the situations of young people and aids in four regions of the world.

Host &amp; Producer: Emma Wallis

## Risky business? Using PrEP in the US

In the US, some who are considered at high risk of contracting HIV are taking a pill called PrEP. It stands for pre-exposure prophylaxis and aims at stopping the infection taking hold in the event of exposure. It is partly modeled on the medication used to control the virus once someone is infected. Lena Nozizwe went to meet Ken who

takes PrEP regularly and he told her his story.

This week's Pulse is about men, women – and what lies between. What happens when you don't identify with the gender you were assigned at birth? In Kenya, one activist is fighting for the right to be transgender. In the US, a brand-new homeless shelter welcomes transgender kids. And in Afghanistan, girls can be raised as boys because their parents really wanted a son.

Host &amp; producer: Anne-Sophie Brändlin

## TOPICS

---

### When daughters are raised as sons in Pakistan

There's a tradition among the Pashtun people that when a couple without a son gives birth to a daughter, they simply dress their daughter as the son they wish they had. This cross-dressing culture means girls enjoy all the freedom boys have in society – from going to school to playing sports. It's no wonder that many refuse to suddenly

become a woman as a teenager when it's time to marry them off.

Report: Mudassar Shah, rural Pakistan, presented by Neil King

## AUDIOS AND VIDEOS ON THE TOPIC

---

[Listen to the report](#)

## From attempted suicide to transgender activist in Kenya

Audrey Mbugua is a young, well-known transgender activist in Kenya who has been battling for years to be recognized as a woman. In an interview she explains how an attempted suicide turned her into a warrior for the rights of transgender people, why transgender people are still stigmatized and pigeonholed in Kenyan society and

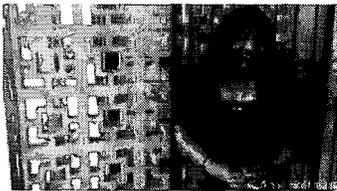

why even her name is a contentious issue there.

Interview: Anne-Sophie Brändlin

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the interview](#)

## Giving trans youth a shelter in the United States

Homelessness is a big problem for transgender youth in the United States. It's estimated that up to 40 percent of all homeless youth in the US are LGBTQ. And often they don't have any place to go as shelters are usually segregated by gender. That's why Ruby Corado, a trans-woman from El Salvador, recently founded a shelter

specifically for queer and trans youth in Washington DC.

Whether you're chasing your dreams and hit a few hurdles along the way, or you are fleeing war, have lost everything and have no hope in sight – random acts of kindness – often by total strangers - can be the trigger for hope and often change. This week on Pulse we head out in search of people trying to do that little bit extra to help the underdog.

Presenter & Producer: Jessie Wingard

## TOPICS

## Trying to make it big in Jo'burg

'Life never explains' - that's the title of a brand-new South African book. It's not a thick one but it sure packs a punch: it's a story that happens again and again to many young people across the world. Kerstin Welter met the young author in Johannesburg and learned that between being a hustler and a radio host there's sometimes just a

small leap. And, one or two helping hands.

Report: Kerstin Welter, Johannesburg, South Africa

## AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## Greeks help refugees in unusual ways

In the past month, more than 450,000 refugees have crossed the Mediterranean Sea to arrive in Greece. The Greek state is overwhelmed by these record numbers and it is often young Greek citizens who are trying to fill the gaps and help out where they can. Because of the ongoing financial crisis in Greece, many Greeks can't give as much

as they like. So they are finding alternative ways to help.

On today's show, we're going to be delving into your conscious and un-conscious to explore the wonderful worlds of sleep and dreams. From the refugees with waking dreams for their futures, to those crazy symbols and scenarios that we've all had whilst asleep. And when we are asleep, are we really getting enough of it? Would students get better grades if they were able to start school later?

Host & Producer: Emma Wallis

## TOPICS

### Refugee dreams

Many of the people streaming into Europe are children and young people. The trip is long and exhausting, at times frustrating. So dreams are perhaps the one thing which keeps them holding on. Natalie Carney traveled along with some of these young people to find out just what they are dreaming about on their long journey.

Report: Natalie Carney, Balkan Route, Europe

## AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the report](#)

## The meaning of dreams

Do you have crazy dreams? Have you ever dreamt of dancing dogs or raspberry jam? Tigers on your bed perhaps? or do you spend your dreamworld running away? How important are dreams to us and what an earth do they mean? Justina Lasley is a dream expert. She runs the Institute for Dream Studies in the US and has written

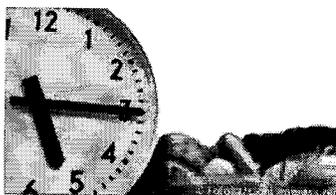

a book, *Wake up to your Dreams*.

Interview: Emma Wallis

AUDIOS AND VIDEOS ON THE TOPIC

[Listen to the interview](#)

## Dreaming of sleep

We can all identify with that horrible moment when the alarm bell rings and you have to drag yourself out of bed for work and school. And the earlier that time is, the worse it is, particularly when you're a teenager. That's why some researchers are thinking that in order for teens to get better grades at school, they should actually be allowed to

sleep longer.

Report: Anny Celsi, LA, USA

## Bringing education to kids from low income communities in India

Dropping out of school is a real problem in India today. In fact, four percent of children never even start school, almost 60 percent don't complete primary school and 90 percent don't complete school at all. The statistics are staggering, but one young Indian woman is fighting the odds and started a non profit organization that focuses on

educating children from low income communities.

## Generation Change: Young teacher brings his lesson to remote island

Principe is an idyllic island in the middle of the Atlantic Ocean off the West coast of Africa. It might sound like paradise but for the few thousand young people living there, there just isn't much to do. There's no university and until two years ago there wasn't even a high school on the island. But Dmitri, a 27-year-old teacher, is trying to

improving the educational system on the island.
