| Summary: | North Carolina has long been a battleground for democracy. So far, 27 people in the state have been indicted in connection with the effort to overturn the 2020 election on January 6th. No body of legislators has fought more fiercely to maintain Republican supermajority power in a demographically 50/50 state. On April 28, 2023, in a rare reversal of recent precedent, the new Republican majority on the North Carolina Supreme Court struck down a previous ruling that threw out gerrymandered voting maps. And in this term, the Supreme Court will decide on Moore v Harper, a case that could give state lawmakers unchecked power over how elections are held — and even who gets to vote. In this episode, Laura Flanders sits down with the NC Attorney General Josh Stein and Hilary Harris Klein, lead attorney on the North Carolina case along with veteran civil rights attorney and law professor, Irving L. Joyner to discuss what these cases mean for democracy and voters of color. What does a better vision of democracy look like? Durham is home to the Pauli Murray Center for History and Social Justice, named after the human rights activist whose work was integral to the Civil Rights Movement. Murray's legacy lives on today, inspiring organizers who are determined to "bring the promise of democracy to life," as Angela M. Thorpe, the center's Executive Director, puts it. Serena Sebring, the Executive Director of Blueprint NC, shares what's needed to build Murray's vision of a multiracial democracy. What's at stake? And who's pushing back? |
