Blue ridge communications have started adding extra fees to use their broadband service. I am a paying customer and already pay a monthly fee to use their services and do not think that it is right that they are trying to charge us for something that we already pay for .As The FCC isn't it your job to make sure that the people who use these services are treated fair and what these companies charge are legal fees? i think it is definitely something to look into.

Mary Pontious
Consumer Complaints

Serve Ticket#: 526148
Last Name: Parks

Dear Mary Pontious,

Mr. Park's complaint is that he feels he already pays for broadband service and there should be no additional charges.

History: Our residential internet service has had bandwidth allowances for over ten years. Originally, the bandwidth allowance was based on the level of service and the average subscriber used less than 15GB per month.

In 2009, as bandwidth usage grew, we measured bandwidth usage between the peak hours of 5pm - 11pm and raised the bandwidth allowance to 250GB for all levels of service. Less than 1% of the customers were affected and they were charged \$1.00 per GB over the 250GB.

Effective September 1, 2015, we modified the bandwidth policy by measuring the usage levels continuously and increasing the allowance by level of service, as follows :

	Speed	Bandwidth Allowance
1)	1.5mbps	150 GB downstream
2)	5mbps	300 GB downstream
3)	10mbps	400 GB downstream
4)	15mbps	500 GB downstream
5)	60mbps	600 GB downstream
6)	100mbps	700 GB downstream

Customers who exceed the monthly allowance are charged \$10 for each additional 50 GB.

Notice: We notified the customers of this change by bill message and amendment to the Blue Ridge policies on our web page. Additionally, we email customers if they reach 75% and 90% of their bandwidth allowance. (Like the wireless phone providers do) We also provide a link to our website where the customer can monitor their bandwidth daily usage and what their current total bandwidth usage is for the month. For the first month of the new program (September 2015), we did not impose any usage fees but alerted the customer that we would begin doing so the following month. Importantly, bandwidth usage is independently measured and reported by a 3rd party.

Reason: Many customers do not realize that we pay for bandwidth on a usage basis. There is a vast discrepancy between the average and extreme user. Currently, the average user consumes 67 GB per month (well below even the lowest allowance) but we have seen extreme users consuming Terabytes of data. We believe that it would be unfair to the average user to raise rates to pay for the increased costs caused by the extreme users. We believe the bandwidth allowances selected are fair (our estimates are less than 3% of subscribers will exceed a data allowance) and that we give the extreme users notice and the opportunity to monitor their usage to avoid unexpected spikes in their bill.

Customers sometimes confuse the data allowances with prohibited blocking or throttling. Data allowances are neither and have been permitted, if not encouraged, by regulatory policy. Data allowances are the fairest method to allocate the variable cost of internet service. We are finding that many of the customers complaining about the bandwidth plans are using well under their data allowance and will not be affected. We will be contacting our customers who have made complaints and make sure they understand what their bandwidth usage has been, and how to check their usage on our website for daily and total bandwidth usage.

Please let me know if you have any further questions.

Sincerely,

Jeff Crandall
Director of Operations
Blue Ridge Communications
