Re: Reduced Power Operation, WKXA-FM, Findlay OH, Facility ID 5849

On Thursday, May 2, 2019, WKXA-FM took its main transmitter out of service to perform routine maintenance. Upon completion of this maintenance, our chief engineer experienced difficulty in powering the main transmitter to full power. WKXA-FM is currently operating on its backup transmitter at a power level of approximately 50% of its licensed power. Work continues to identify the main transmitter issue and notification will be again be made once the main transmitter returns to service.

Questions can be directed to Kurt Heminger at 419.427.8077 or kurtheminger@findlayoh.com.

Sincerely,

Kurt Heminger
