#### 4th QTR. 2023 - CHILDREN'S PROGRAMMING: AGES 13-16

Saturday @ 6AM	America's Heartland	A magazine-format show about American farming features stories of the hard-working men and women who produce food, fuel and fiber for the world, discussing the traditions of farming and ranching and the innovations that are making them better.
Saturday @ 6:30AM	Science Now	"Science Now" is a weekly half-hour series showcasing science stories in today's world. Each episode features topics from space exploration to plant biology to the latest in high technology advances. The series is aimed at young teenagers (13-16 years of age), seeking to enhance their scientific knowledge and encouraging them to seek further studies in scientific research.
Saturday @ 7AM	Xploration DIY Sci	Produced primarily for the 13-16 target audience, XPLOATION DIY Sci will inspire and educate audiences of all ages. Host, science educator, and leader in the field of professional educational training - Steve Spangler – encourages the discovery of scientific concepts through experiments viewers can do at home. With a fun, relaxed attitude, Steve will take viewers through step-by-step demonstrations of do-it-yourself experiments that amaze but which also relate back to solid principles of science. XPLOATION DIY Sci is a half-hour weekly E/I series produced with the intention of increasing and expanding our target audience' interest in the field of STEM education. This series will help kids understand how they can discover the principles of science with items they can find in their very own home.
Saturday @ 7:30AM	Xploration: Nature Knows Best	Host and marine biologist, Danni Washington, exudes energy as she relates how technology all around us was inspired by nature and how modern innovators are continuing with this practice. We will fly around in airplanes inspired by birds, whirl around in helicopters influenced by the dragonfly, and even jump from a few vehicles to illustrate how wingsuits were invented based on the flying squirrel! But engineers aren't the only scientists looking toward nature. We will also meet with biologists studying the behavior patterns of ants; architects who design "living buildings"; and roboticists who are making their designs bigger, stronger, and faster based on animals. This series will help kids to understand how getting outside and taking a look around can help them make the next great discovery! Xploration Nature Knows Best is a half-hour weekly E/I series produced with the intention of increasing and expanding our target audience' interest in the field of STEM education.
