

Quarter Ending: 9/30/17

### CHILDREN'S TELEVISION PROGRAMMING COMMERCIAL CERTIFICATION

WXIA ("Station") certifies that all 12-and-under children's TV programs carried during this quarter on its primary and multicast streams were formatted so that, as a matter of standard policy and practice, the programs would not exceed the "commercial matter" time limits of 73.670(a) of the FCC's rules: Weekdays: 12 minutes in any clock-hour children's programming (6 minutes in a stand-alone half-hour program); Weekends: 10.5 minutes in any clock-hour children's programming (5.25 minutes in a stand-alone half-hour program). Programming promos, with certain exceptions, count as commercial matter.

<u>Program Title</u>
<u>11.1 - WXIA - none</u>
<u>11.2 - WIZ-TV / Weather Nation - none</u>
<u>11.3 - Justice Network - none</u>

1. Network-provided commercial limit certifications are attached in Appendix A.
2. Station certifies that there were no time periods during the quarter in which the "commercial matter" time limits stated above were exceeded during 12-and-under children's programming.

  X                                
Yes                              No

If no, provide details of each such instance in Appendix B.

3. Station certifies that, during the quarter, it has complied with the commercial requirements of Sections 73.670(b), (c) and (d) of the FCC's rules regarding the display of Internet website addresses during 12-and-under children's programming.

  X                                
Yes                              No

If no, provide details in Appendix C.

I hereby state, under penalty of perjury, that the foregoing is true, correct and complete to the best of my knowledge, information and belief.

Dear Affiliate Partner:

To assist you in complying with the reporting requirements for children's television and the requirement that stations air "core" educational and informational children's programming, we are providing you with episode-specific descriptions ("**The More You Know**" educational and informational programming block) as set forth in the attached Quarterly Children's Programming Report for the 3rd quarter of 2017. The report includes information that will be helpful in preparing FCC Form 398. Please note that we have not included the specific dates and times for each of the programs as that information may be station-specific.

This report is divided into the following categories:

1. Educational Objectives and Show Summaries: **The More You Know** both for programs broadcast in the 3rd quarter of 2017 and those planned for the 4th quarter of 2017. Of note, *Heart of a Champion with Lauren Thompson* was retitled *The Champion Within* on September 30, 2017, for the start of the new 2017-2018 broadcast season.
2. Core Programming: Regularly scheduled programming furnished by the NBC Network that is specifically designed to serve the educational and informational needs of children ages 13-16. Each of these programs is identified on-air as educational and informational with the "E/I" icon and is similarly identified to the national listing services. To assist stations with the preemption report section of FCC Form 398, we have added specific episode numbers. Please note that the target age range for **The More You Know** programming is identified as 13-16 years old.
3. Other Programming: Programming furnished by the NBC Network that contributes to the educational and informational needs of children 16 and under, but is not specifically designed to meet the educational and informational needs of children.
4. Public service announcements targeted to children 16 and under.
5. Non-broadcast efforts that enhance the educational and informational value of NBC Network programming to children.

The regularly-scheduled children's programming and promotional content furnished to you by the NBC Network during the 3rd quarter of 2017 complied with the commercial limits of the Children's Television Act, and 47 C.F.R. §§ 73.670(a)-(d), provided that you broadcast and distributed such programming as furnished to you by NBC, and did not add any promotional or advertising content thereto other than as directed by NBC via weekly postings on APT.

If you have any questions about these reporting requirements, please feel free to call us.

*Note Regarding FCC's Video Description Rules:* The programs supplied in **The More You Know** block are video-described to provide a better viewing experience for blind or visually impaired children. Under the FCC's video description rules that became effective on July 1, 2015, full-power affiliates of the ABC, CBS, Fox and NBC networks that are located in the top 60 television markets must provide 50 hours per calendar quarter of video-described programming during prime time or in children's programming. A video described program may be counted toward the 50 hours when it is originally aired and on one re-airing. Although much of the programming aired with video description is likely to be newly produced, stations may count any program they are airing for the first or second time with video description after the effective date, even if the program aired on that station without video description prior to the effective date. Similarly, a station may count programming toward its 50-hour obligation even if that programming has aired elsewhere with video description, as long as it is airing with description for the first or second time on that station.

**3rd QUARTER 2017**  
**EDUCATIONAL OBJECTIVES and SHOW SUMMARIES**  
**[AGE TARGET 13-16]**  
**July 1, 2017 – September 30, 2017**

In the 3<sup>rd</sup> Quarter of 2017, NBC continued airing The More You Know Educational/Informational programming block, designed for older adolescent children, ages 13-16. Each of the six shows has a hosted format, featuring non-fiction, informative programming that extends NBC's iconic The More You Know brand to Saturday mornings. The audience views inspiring stories about the environment, social change, health and wellness, and community engagement.

Of note, *Heart of a Champion with Lauren Thompson* was retitled *The Champion Within* on September 30, 2017, for the start of the new 2017-2018 broadcast season.

**THE VOYAGER WITH JOSH GARCIA**

*The Voyager with Josh Garcia* is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. *The Voyager with Josh Garcia* takes viewers on an exciting and immersive journey around the globe with world traveler and host, Josh Garcia. Each episode gives audiences access to the world's most incredible destinations as Josh seeks out the truly authentic experiences one can only find when shown by a knowledgeable and passionate guide. In each episode, Josh learns how to prepare an authentic, regional meal, visits a local artisan to learn about their trade and craft, and samples the culture while learning about the heritage of the region's population, showing viewers what is so unique about each city he visits. *The Voyager with Josh Garcia* brings viewers on an enthralling adventure to explore the people and cultures that make our world so breathtaking.

**WILDERNESS VET**

*Wilderness Vet* is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. *Wilderness Vet* follows veterinarian Dr. Michelle Oakley, and features compelling stories from one of the most rugged areas on the planet, the Yukon. Dr. Oakley travels to homes, farms, and wildlife preserves across the Yukon to help animals in need, while balancing life at her home clinic. Providing a glimpse into a fascinating career choice, *Wilderness Vet* will show viewers the hard work and dedication involved in the rescue and rehabilitation of animals, while imparting tips to help keep all furry friends healthy.

**JOURNEY WITH DYLAN DREYER**

***Journey with Dylan Dreyer*** is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. ***Journey with Dylan Dreyer*** is a wondrous celebration of nature. Hosted by meteorologist Dylan Dreyer, this series features breathtaking cinematography that will bring viewers up-close and personal with creatures big and small, from the black bears of Montana to polar bears in the Arctic. Audiences will have a unique platform to see animals living in their natural habitat, and will learn about the circle of life along the way. ***Journey with Dylan Dreyer*** also explores natural wonders of the world, including the migration of 1.5 million animals traveling over 500 miles across the Serengeti in Tanzania and Kenya. Viewers will uncover these amazing facts of nature, and learn why it's so important to protect Earth's natural resources and all its inhabitants.

### **NATURALLY, DANNY SEO**

***Naturally, Danny Seo*** is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. ***Naturally, Danny Seo*** is a series about seeking a healthier lifestyle by learning the science behind eating well, exercising your mind and body, and caring for our planet. Host Danny Seo is a leading authority on eco-friendly living, and has devoted his career to the idea that caring for the environment can go hand-in-hand with enjoying time with family and friends, sharing delicious and healthy meals, while creating an environmentally friendly home. In each episode of ***Naturally, Danny Seo***, viewers will be introduced to inspiring ideas from fun and healthy recipes, to easy and sustainable crafts. Viewers will learn how to embrace a natural lifestyle, easily and beautifully, along with quick tips on green living.

### **GIVE**

***Give*** is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. ***Give*** introduces viewers to the world of philanthropy through the stories of small charities making a big impact. The series features Jenna Bush Hager, actor Blair Underwood, and other passionate celebrity philanthropists from film and television, music, sports, or business who are all on a mission to inspire others to do good. In each episode of ***Give***, one of these celebrity ambassadors will visit two charities that are dedicated to inspiring change in their communities. We'll discover what makes these charities effective, learn what each needs to make an even bigger impact, and surprise them with a gift to help continue their good work. Audiences will meet the inspiring individuals and volunteers behind each organization to see how they do their part to make the world a better place, learning compassion and the value of giving back along the way.

### **HEART OF A CHAMPION WITH LAUREN THOMPSON** (July 1, 2017 – September 23, 2017)

***Heart of a Champion with Lauren Thompson*** is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. ***Heart of a Champion with Lauren Thompson*** features the powerful and inspiring stories that exemplify what it really means to be a true champion. Hosted by Lauren Thompson, the series introduces viewers to people who have overcome obstacles while leading transcendent moments from the world of sports. From beating the odds to play the game they love, to giving back to the communities that supported them, the featured athletes will share their own stories and personal triumphs. Viewers will learn the value of good sportsmanship, and the dedication it takes to excel at the highest level. Win or lose, ***Heart of a Champion with Lauren Thompson*** proves that a champion is not only defined by their speed, strength, and agility, but by their grit, resiliency, and heart.

**THE CHAMPION WITHIN** (September 30, 2017)

*The Champion Within* is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. *The Champion Within* features the powerful and inspiring stories that exemplify what it really means to be a true champion. Hosted by Lauren Thompson, the series introduces viewers to people who have overcome obstacles while leading transcendent moments from the world of sports. From beating the odds to play the game they love, to giving back to the communities that supported them, the featured athletes will share their own stories and personal triumphs. Viewers will learn the value of good sportsmanship, and the dedication it takes to excel at the highest level. Win or lose, *The Champion Within* proves that a champion is not only defined by their speed, strength, and agility, but by their grit, resiliency, and heart.

**THE VOYAGER WITH JOSH GARCIA**

**MEDITERRANEAN MELTING POT [VJG114]**

Host Josh Garcia's ship stops in Marseille, France where a local chef invites Josh and his shipmates to take part in the world-famous culinary tradition of bouillabaisse, a flavorful fish stew. Josh tries his hand at a famous local beach game called *petanque*, and visits a soap factory where he makes his very own personalized “Soap of Marseilles”. First, Josh visits a fish market with a local chef to see the real Marseille. He is served bouillabaisse, the most famous dish in Marseille, and experiences the flavors of the region. Then, he heads to the shore where he gets schooled in a famous pastime, the game of *petanque*. *Petanque* is a game that consists of skill and focus to toss steel balls closest to the target, the *cochonnet*, a small wooden ball. Finally, Josh gets a hands-on experience at a local soap factory where he learns the science behind world-famous Marseille soap.

**[Educational Message: Learning a new outdoor game can bring great joy and relaxation. Not only does it get you outside in nature, but it can also connect you with new friends.]**

**WILDERNESS VET**

**WHEN MOM'S AWAY [WDV114]**

On this episode of Wilderness Vet, while Dr. Oakley is away traveling she visits a family with a black Labrador Retriever, named BooBoo, who has a mysterious weight gain problem. After examining BooBoo, Dr. Oakley believes the ailing dog is suffering from hypothyroidism. BooBoo will be treated with medication and remain active until the excess weight is lost. Since her treatment, BooBoo has already lost an incredible 35 pounds and is well on her way to a healthier life. Next, with Dr. Oakley on the road, her husband Shane decides to use the opportunity to teach their daughters some outdoors skills. Today's first

lesson is chopping wood. Shane teaches the girls how to carefully chop logs into firewood and he explains to them the importance of self-reliance. Next, Shane takes the girls out to the riverbank to have them learn how to build a shelter, knowledge that can be life-saving in the extreme Yukon elements. The Oakley daughters learn to use teamwork in order to complete the natural shelter in a short amount of time. Next up, Dr. Oakley has an appointment with a Shih Tzu, Bitsy, who has a large mass growing from her stomach. Concerned about the possibility of cancer, Dr. Oakley suggests that Bitsy be treated at larger clinic in Juneau to have the mass surgically removed. Back at home, Shane is taking the girls out for one last outdoor skills test – building a fire. Hypothermia is a serious problem and can be life threatening if not treated quickly. Finally, back at the Bald Eagle Foundation, Dr. Oakley is visiting a Eurasian eagle-owl named Hans. Eurasian eagle-owls are one of the largest owl species in the world. Dr. Oakley successfully takes the blood sample that will be tested to ensure Hans is in good health.

**[Educational Message: It's important to learn the value of teamwork. Spending time with your siblings can be invaluable.]**

### **JOURNEY WITH DYLAN DREYER**

#### **ANTARCTIC [JDD114]**

Join host Dylan Dreyer at the end of the world as she explores the frozen, forgotten continent of Antarctica. We'll witness the incredible wildlife that survives in the most extreme environment on Earth, meet the scientists working to understand the growing threat of climate change, and learn about the early explorers who made the first brave attempts to reach the South Pole. Antarctica, the frozen and lonely wilderness at the bottom of the world, is the largest uninhabited place on Earth. First, we'll learn about the group of people who were the first to successfully reach the Antarctic and helped to build the foundations of Antarctic scientific exploration. Next, we'll meet with a group of Weddell seals, one of the first animals studied in Antarctica, who live further south than any other mammal on Earth. Next, we'll learn more about Emperor penguins and their ability to survive in the extreme Antarctic conditions. Finally, we'll team up with a group of scientists that are studying the effect of climate change on the South Pole. Here we learn how the sea ice around the continent waxes and wanes over time. In winter, Antarctica nearly doubles in size and the expanse of coldness effects climate over the entire globe. Next, we see how scientists use core drills to remove samples from the ice. Finally, we learn about the history of The Antarctica Treaty, an agreement among foreign nations to protect Antarctica as a place of peace and science.

**[Educational Message: Antarctica is a symbol of human curiosity and courage. Learning to appreciate science can make a big impact on our lives.]**

### **NATURALLY, DANNY SEO**

#### **BROTH BAR [NDS114]**

Host Danny Seo makes homemade bone broth, an old-fashioned health remedy, and learns that you can save time peeling vegetables by leaving on the skin. Bone broth contains glucosamine, which helps protect your joints and relieve joint pain. Next, Danny cooks up gluten-free cookies. Gluten is a mix of proteins

responsible for the elastic texture of dough, and can be substituted by using coconut flakes. Then, he turns trash into treasure by upcycling plastic caps and old boxes into jewelry and works of art. Finally, he shares tips on how to be green while travelling in your car.

**[Educational Message: Bone broth is an easy way to get a daily dose of micronutrients in one serving--micronutrients are chemical elements required for growth and development. Eating clean means avoiding processed foods. Use your imagination when looking at something you may consider trash; you have the ability to use it as way to express yourself artistically and create something unique.]**

**GIVE**

**GIVE TO LIFTING FAMILIES AND KIDS OUT OF HOMELESSNESS AND POVERTY IN ORANGE COUNTY, CALIFORNIA [GBU114]**

Kat Graham, Actress and Singer, goes to Orange County, California to visit two organizations that support low-income and homeless children and their families with comprehensive, long-term services designed to interrupt inter-generational cycles of poverty. Using the story that she's there doing research for a project on philanthropy, Kat starts with a visit to the Wooden Floor Foundation, which has transformed the lives of over 80,000 children and youth with high-level dance instruction, academic and family counseling services and more. Deeply moved by the commitment Wooden Floor makes to its students Kat wants to help with everything she has. But first she makes a trip to see the Illumination Foundation, an organization that provides targeted medical, workplace and living assistance to homeless families and individuals, and those at risk of becoming homeless. At the organization's Santa Ana Children's Resource Center, Kat sees the Illumination Foundation's mission in action. Children and teens receive homework help, emotional and life-skills counseling, healthy food and a break from crowded and unsafe living conditions. In the end Kat makes the tricky decision of how to divide a generous gift the PIMCO Foundation between them.

**[Educational Message: Philanthropic organizations that create safe spaces for individuals to learn and grow ultimately give those individuals an opportunity to develop life-long healthy practices, whether through financial literacy or dance therapy. ]**

**HEART OF A CHAMPION**

**VISIONARIES [HOC127]**

David Brown, the fastest blind sprinter in the world, shows how he trains to win gold at the paralympics, which require blind sprinters to race tethered to guides. Golfer Justin Rose pays tribute to his father who passed away from cancer. We see how a rescued bald eagle, a bird whose vision is 4-8 times stronger than that of the average human, gets a second chance at life by becoming the mascot for the Crystal Palace soccer team. Finally, we see how Nascar driver Ryan Reed continues to race despite having diabetes, a disease in which the body has high levels of glucose in the blood.

**[Educational Message: Don't underestimate someone by the way they look, what they can't do, how old they are, or hardships they have faced. You can still be great at something even if you don't fit the mold. Viewers learn how blind sprinters race in the Paralympics, how pro-golfers study their**

**KUNG FU MASTER [VJG115]**

Host Josh Garcia visits the port of Hong Kong where a local foodie takes him on an unforgettable tour of the city's nearly extinct foods, and Josh bravely tries some interesting dishes. Josh receives a lucky fortune at an ancient temple, and then gets a Kung Fu lesson from a master. First, Josh visits some of the oldest temples in Hong Kong and meets a cultural expert to learn the history and practices associated with Buddhism and Taoism. Then, Josh heads into town to learn how a craftsman is incorporating local materials into daily life, and he connects with a local foodie to try some unique dishes. Finally, he meets a living legend who trained under the same master as Bruce Lee and tries his hand at Kung Fu. The art of Kung Fu is said to be thousands of years old and dates back to the legend of Wing Chung, a nun who created the art to conquer an evil opponent.

**[Educational Message: Visiting ancient landmarks can give you a glimpse into ancient practices and schools of thought. Ancient culture transforms in modernity through monuments, sculptures, and rituals.]**

**WILDERNESS VET**

**1 HOOF, 2 HOOVES, 3 HOOVES, 4 [WDV115]**

On this episode of Wilderness Vet, Dr. Oakley is no stranger to working with large animals. From performing exams on feisty sheep, to helping a donkey with an infestation, or saving a Caribou with a troublesome limp, it's no wonder she's one of the best veterinarians in the Yukon. First up, Dr. Oakley's mission is to sedate and examine a bull Caribou who has been limping. Dr. Oakley and Randy Hallock from the Yukon Wildlife Preserve team up to accomplish the task. After multiple attempts over two days to sedate the animal, Dr. Oakley and team successfully dart the injured Caribou. Dr. Oakley performs a full body exam on the Caribou and takes a closer look at the injured leg. She determines that trimming the Caribou's toes and providing arthritis medication will relieve pressure on the bull's joints and help increase its mobility. Next, Dr. Oakley is performing a physical on a Dall sheep. To get up close for the examination, Dr. Oakley will have to sedate the sheep with a blow dart. After a successful hit, Dr. Oakley and team examine the sheep, provide vaccines, and a trim its hooves. Finally, Dr. Oakley makes a house call to a new patient and finds a sick donkey named Jane. Dr. Oakley discovers that Jane has a puzzling skin problem and hair loss. After careful examination, Dr. Oakley finds that Jane has a lice problem, and she prescribes a dusting powder to treat and rid Jane of her infestation.

## **JOURNEY WITH DYLAN DREYER**

### **ADRENALINE RUSH [JDD115]**

Join host Dylan Dreyer as she explores the ultimate rush of Skydiving. Hold your breath - as we jump out of airplanes with professional thrill-seekers and rocket toward the earth with a parachute and a prayer. Finally, we'll recreate a parachute designed by Leonardo da Vinci over 500 years ago. First, we'll meet a team of skydivers and discover more about the daring and risky sport. Over 500,000 people make a total of three million skydives in the United States every year. Discover how skydivers control their bodies during flight and maintain a clear focused mind during an overwhelming sensation of freefall. We'll find out how air rushing underneath the parachute creates low pressure above it, creating a lift that breaks the jumper's fall. Next, we'll learn about the history and science behind wingsuits, parachutes and other flying concepts that trace all the way back to Leonardo da Vinci. We'll discover more about the numerous inventions that Leonardo da Vinci once conceived and how many similar concepts exist today. Next, we'll follow a group as they attempt to recreate one of the da Vinci concepts into a reality. Finally, with the help of Oxford University, we'll discover first-hand how a team of scientists accurately and successfully re-create Leonardo da Vinci's bold parachute design.

**[Educational Message: The risks we take every day can sometimes become meaningful moments of our lives. Taking risks and thinking differently can challenge us to be the best versions of ourselves. ]**

## **NATURALLY, DANNY SEO**

### **BLAZING NEW PATHS [NDS124]**

Host Danny Seo meets our country's green pioneers, groundbreaking artisans creating from nature and entrepreneurs building businesses with and for animals. First, Danny travels to Oregon and participates in the process of making salt. Salt is created by boiling seawater, allowing it to evaporate to form salt crystals, and then dehydrating it for a few days. Although the finished product seems simple, salt comes in different forms, such as table, finishing and grinding salts. Plus, each can be infused with different flavors, like garlic. Next, Danny uses flowers to create botanical art, and he visits the Dog Café and explores a new way to pick a pet. Then, Danny travels to Rhode Island and participates in the process of harvesting honey. To collect the honey, beekeepers use smoke, which confuses bees, making them more docile; however, beekeepers harvest only the surplus honey and leave enough for the bees to survive. Finally, Danny travels to Oregon and meets the Martinez family, who have been creating hand-crafted leather products since 1962. He helps make a leather tote and learns how to cut, stamp, sew, and shape the bag and straps. The straps are usually made of English bridle leather, which is stronger and won't stretch.

**[Educational Message: Nature is one of the best sources to provide food, art and many ingredients to use in diverse ways. Salt can be cultivated from seawater, and flowers can be used in an expressive way to make art. Nature plays an active role in creating honey-- worker bees fly about 500 miles in their lifetime, using the position of the sun to navigate back to their hives. Products can be tanned naturally by using barks, leaves, berries and roots.]**

## **GIVE**

### **GIVE TO PEOPLE BRIDGING THE GENERATIONS [GBU115]**

Film and television star Camilla Belle visits two innovative organizations making a big impact with people of all ages. Camilla starts the day at ONEGeneration, an organization that is both a senior care provider and a preschool where elders assist teachers as care-givers, in a partnership that reaps benefits for everyone involved. After spending the morning painting with a lively group of children and seniors, Camilla heads over to SPARK, an organization that provides mentoring to help 7th, 8th and 9th graders set goals and transition successfully to high school. Camilla joins a group of tweens working with volunteer mentors from HULU, and witnesses how attention from these professionals helps the youngsters recognize their own potential and promise. Now, Camilla is faced with the difficult job of dividing a \$100,000 grant from the Eisner Foundation between the two charities. In the end she gives each organization a gift to help them build inter-generational bonds that help everyone.

**[Educational Message: Philanthropic organizations that provide intergenerational programs offer opportunities for people from older and younger generations to participate in mutually beneficial activities. Intergenerational programs can provide meaningful connections between seniors and young children and can help build strong communities of care.]**

## **THE VOYAGER WITH JOSH GARCIA**

### **EUROPE TOP TO BOTTOM [VJG116]**

Host Josh Garcia revisits some of his favorite journal entries from his tantalizing tour of Europe. First up, in Stockholm, Sweden, Josh learns to blow glass from a master artisan. Glassblowing dates back 2000 years and made its way to Sweden in 1600 A.D. Next, in Bergen, Norway, Josh takes a bite of a local favorite, the reindeer hot dog, and tastes the local flavor palate that combines the sweet and savory. Lingonberries are used to add sweet flavor to some local dishes. Then, in Barcelona, Josh is blown away by the local castellers who build a massive human pyramid, a cultural tradition that's been performed for over three hundred years and was named Masterpieces of the Oral and Intangible Heritage of Humanity by UNESCO. Finally, in Aix-

en-Provence, France, Josh meets a figurine maker who's at the top of his game making *santons*, a craft that dates back to the French Revolution.

**[Educational Message: When traveling you can seek out local cultural art forms and practices that are native to that region. Many cultural practices date back thousands of years and sometimes it can feel like you are getting a glimpse at how things were made in the past.]**

### **WILDERNESS VET**

#### **A VET FOR ALL PETS [WDV116]**

On this episode of Wilderness Vet, Dr. Oakley is visited at her home clinic by a 15-year-old Golden Retriever named Rose. Two years ago, Dr. Oakley examined Rose for a growth on her side. Today, the growth has rapidly increased in size, which worries Dr. Oakley that it may be cancerous. Removing the tumor surgically is one option, but for an older dog it's risky a procedure. Dr. Oakley decides to take a biopsy and blood sample to determine whether or not the tumor is malignant or benign. Next, Dr. Oakley is visited by Miracle, a seasoned sled dog with several small growths on his body. After examining the growths, Dr. Oakley decides to take a fine needle biopsy and a blood sample to determine the severity of the lumps. The blood results soon come in to reveal that Miracle's masses are benign. Next, Dr. Oakley heads to Haines, Alaska to the HARK Animal Shelter. Here the shelter's manager, Steve Vick, takes in orphaned and feral animal to find them adoptive homes. Today, Dr. Oakley is coming to help with a feral cat. Next, Dr. Oakley heads to the outskirts of town where some farmers noticed their pigs have a severe itch. Constant scratching and dry scaly skin are symptoms of Sarcopic mange, a highly contagious disease. The team puts the pigs in a pen and carefully corners them with wood panels, so that Dr. Oakley can safely treat each pig with medication. Dr. Oakley and team finally complete their mission and treat the mange before it spreads further. Since Dr. Oakley is already on site, the farmers want her to take a look at their new piglets. Dr. Oakley provides exams and vaccines on the piglets, while also separating and neutering the male pigs. Doing this is an important safety measure as the males will eventually grow into massive boars, weighing hundreds of pounds and sporting sharp tusks. Dr. Oakley successfully examines and treats all piglets on the farm.

**[Educational Message: Caring for pets and animals can be a rewarding career path. It's important to treat animals with compassion and respect.]**

### **JOURNEY WITH DYLAN DREYER**

#### **OCEAN OASIS [JDD116]**

Join host Dylan Dreyer on a journey to the coastline of Baja California to witness the awesome power of nature and the amazing wildlife struggling for survival in a harsh land. We'll explore the breeding grounds of the mighty elephant seal, ride alongside migrating blue whales, discover the brightly colored beauty of coral reefs, and dive deep with majestic manta rays and hungry sharks. Baja California is a hot, dry peninsula over 700 miles long and located below the state of California. On land, the climate varies considerably from snowcapped mountains to scorching deserts. However, the most influential feature of Baja California is the surrounding ocean, where an oasis of wildlife is waiting to be explored. First, we join

a group of biologists and naturalists to discover this ancient land like never before. Here, we'll get a first-hand look at the magnificent Baja sea life such as whales, porpoises, sharks, manta rays, and moray eels. Also, we'll travel to the island of Rasa and witness over half a million migrating sea birds that return to the island every year. Next, we'll meet a colony of elephant seals and learn more about the species and the communities that inhabit the Baja beaches. We'll also discover more about the land mammals and reptiles that call Baja California home. Finally, we join a group of whale watchers to experience an up close and very personal interaction with a gentle giant.

**[Educational Message: The seas and the deserts will endure without us, but we cannot survive without them. Our oceans support and sustain all life on Earth, and it's important that we play a part in keeping our waters clean. ]**

**NATURALLY, DANNY SEO**

**ECO-GROOMING [NDS116]**

Host Danny Seo cooks up a healthy shrimp dinner and learns how food, such as ginger and basil, can rejuvenate your body. Ginger can help relieve digestive problems such as nausea, and basil contains disease-fighting antioxidants and properties that can help fight viruses and infections. Next, Danny explores eco-friendly ways to keep your dog healthy and clean. Using eco-friendly shampoos that contain natural ingredients, like coconut oil, instead of petroleum-based surfactants provides greater benefits for a dog's skin. A surfactant is a compound that reduces the surface tension between water and oils. Then, Danny finds new uses for old sweaters-- Americans throw away about 13 million tons of textiles every year. Finally, he creates an all-natural citrus cleaner by combining citrus peels and vinegar.

**[Educational Message: Being conscious to incorporate everyday, nutritious ingredients, like ginger and basil, into meals is a great way to ensure overall health and increased energy. Just as you should maintain your own health, it's important to ensure your pet has a healthy lifestyle as well. Baths provide a great chance to assess the dog's overall condition, check teeth, and wipe out ears and eyes. Finding new ways to repurpose old clothes is a great way to use your imagination and help reduce textile waste.]**

**GIVE**

**GIVE TO HELPING YOUNG PEOPLE BREAK INTO THE TECH WORLD [GBU116]**

Jenna Bush Hager visits two San Francisco area organizations that are dedicated to preparing young kids of color to enter the high tech industry. Jenna begins at Hidden Genius and joins kids who are taking part in their "Immersion Program" which is a 15-month boot camp that provides computer science, software development and leadership training. The second organization is Code 2040 which creates pathways to educational, professional and entrepreneurial success in technology for kids of color. Jenna learns how the program has given young people the confidence and the skills needed to compete for the jobs of the future. Inspired by both charities, Jenna must determine how to divide \$25,000 from the Ford Fund between them and, in the end, surprises each organization with a generous gift.

**[Educational Message: Philanthropic organizations working with youth of color to empower them to reach higher can pave the way for a new wave of industry professionals of color. Empowering youth to have the skills and confidence necessary to succeed can make for a stronger workforce in the future. ]**

**HEART OF A CHAMPION**

**STAYING THE COURSE [HOC129]**

Golfer Bubba Watson shares the story of adopting his son and how it has impacted his life on and off the golf course. Next, Kelsey DiClaudio shares her story about being in a wheelchair and being the only female player on the U.S. sled hockey team; sled hockey players use double-blade sleds that allow the puck to pass beneath the sled. Then, we see how a young Nascar driver, Erik Jones, trains to excel in his field. Last, we see how thoroughbred horses prepare for races at horse school.

**[Educational Message: Having a hobby is a great way to establish an outlet when obstacles come your way. Obstacles can set you back from achieving your goals, but that doesn't mean it is impossible— if you work hard, you can progress to where you want to be. Viewers learn about the process of adoption, young female athletes aspiring to be professionals in sled hockey, steps that aspiring drivers can take to join the profession, and how racehorses are trained.]**

**THE VOYAGER WITH JOSH GARCIA**

**TUSCAN FUN [VJG117]**

Host Josh Garcia visits Florence, Italy, the birthplace of the Renaissance and kicks the day off by searching for the world's most expensive food with a four-legged expert. Josh takes to the hills to forage for truffles. Then, Josh drops in on a local artisan to learn the fine-artform of marbling paper and he give it a shot. At the city's oldest gelato shop, he learns to make the tasty treat from scratch from a third generation gelato-maker. Gelato is a traditional Italian dessert made from milk, sugar, and eggs. For a grand finale, Josh gets a lesson in opera before catching a show at the birthplace of the art form to see (and hear) how the real pros hit all the notes.

**[Educational Message: The sheer beauty of a place can be a striking experience. Noticing the architectural details of old, historic buildings can sometimes feel like a journey into the past.]**

**WILDERNESS VET**

**ANIMAL AMBASSADORS [WDV117]**

On this episode of Wilderness Vet, Dr. Oakley is making her rounds examining the many unique creatures that call zoos and wildlife organizations home. First up, Dr. Oakley and her daughters are heading to the Southeast Alaska Fair to perform veterinarian demonstrations with some of the farm animals. State fairs offer an opportunity to help educate people about animals in a fun community setting. Dr. Oakley takes this time to help educate children about animals such as goats and ponies. Next up, Dr. Oakley heads to the

Alaska Zoo to visit a porcupine, named Peggy Sue, in need of some serious dental work. Dr. Oakley first administers a sedative to help calm the porcupine and protect the team from its dangerous quills. After successfully sedating the animal, Dr. Oakley carefully trims the porcupine's incisors. Next, Dr. Oakley is heading to a small family farm, home to an alpaca in need of a foot trimming. After a difficult time restraining the alpaca, Dr. Oakley successfully trims the animal's feet and helps the farmers finish shearing the valuable alpaca fiber. Next, Dr. Oakley visits The Learning Farm, a place where kids can come and learn all about farming in Alaska. The farm's owner recently discovered several unexpected litters of bunnies. Rabbits can have multiple litters in a year, so if they don't find the male rabbit soon, this farm will have more bunnies than it can handle. Dr. Oakley examines all rabbits on the farm and discovers two more pregnant female rabbits. Eventually, Dr. Oakley locates the male culprit and recommends the rabbit be neutered to prevent further litters. Finally, Dr. Oakley is heading to the Calgary Zoo in Canada, where she first started out as an intern. Dr. Oakley's patients are eight baby meerkats that are in need of a general health exam. The goal is to exam the meerkats, draw a blood sample, and microchip them for identification. Dr. Oakley and team successfully treat the patients and all meerkats are given a clean bill of health.

**[Educational Message: Zoos and wildlife organizations allow people to get up close and learn about different specie. Keeping these animal ambassadors in good health is always a top priority.]**

### **JOURNEY WITH DYLAN DREYER**

#### **PEOPLE OF THE WORLD [JDD117]**

Join host Dylan Dreyer on a tour of some of the most unique, fascinating, and remarkable cultures on planet Earth. We'll visit River People living in the rainforests of the Amazon Basin, explore the nomadic life of Nepali people on the Great Plains of Asia, witness the effects of climate change on the Inuit people of the Arctic, and discover the ancient Massai people on the Serengeti Plains of Eastern Africa. We'll first follow Julio Mamani, the brave medicine man from the Andes Mountains, as he travels thousands of miles to reach the Amazon River. Also, we'll join Harvard University Ethnobotanist Dr. Mark Plotkin, as he, too, looks for life saving remedies along the greatest river in the world. Here we'll learn more about the remarkable connection between the plants and the indigenous people of the Amazon forest. Next, we'll travel to the Serengeti Plains, the last refuge for the greatest concentration of migrating mammals remaining on the planet. We'll witness the arduous struggle for survival against predator and prey, for the diverse wildlife of Africa. We'll learn more about the Massai people, once the most formidable warriors in East Africa, and how they defend their cattle and families with spears to this day. Next, we travel to the arctic to learn more about a group of scientists studying the environment to discover more about the impact of climate change. Using special instruments and monitors, the team can measure the density of the ice and determine the rate at which it's melting. Also, we learn more about the native Inuit tribes that have inhabited the arctic region for many years. Finally, we visit the land of Tibet, which is home to Mount Everest and the highest plateau in the world.

**[Educational Message: The world we recognize today is billions of years in the making. By helping to preserve and protect the environment we will leave behind a better world for future generations.]**

## **NATURALLY, DANNY SEO**

### **GOING GREEN & SAVING GREEN [NDS125]**

Host Danny Seo's saving the planet and saving money with ingenious ways to solve pesky household problems, keeping plants hydrated, and saving energy while racking up big bucks. First, Danny creates spider repellent by using essential oils, which are distilled from various parts of plants like seeds, bark and stems. Next, Danny explains that by adding red pepper flakes to birdseed, it keeps squirrels away but doesn't bother birds because birds can't taste red pepper flakes. Then, Danny teaches how to water can travel through twine, making it to be a great way to water your plants while you're away; and he plants beans in re-used egg cartons and yogurt containers to create a mini greenhouse. A greenhouse effect happens when the sun warms the air and soil while the sealed container traps heat and moisture inside. Finally, Danny teaches that using reusable water bottles can help prevent waste that's created by plastic water bottles, and that using surge protectors and LED light bulbs will help save energy.

**[Educational Message: A great way to save money is by getting creative and using household products in different ways as a solution for common problems. Spiders detect smell with scent sensitive hairs located on their legs, so incorporating scents, such as lavender, is a great way to repel them. Twine can be used to keep plants hydrated; and red pepper flakes in bird feeders can be a good deterrent for squirrels without affecting birds. Giving items new purposes can help create something unique, save money and prevent waste.]**

## **GIVE**

### **GIVE TO HELPING YOUNG MEN OF COLOR ACHIEVE THEIR POTENTIAL [GBU117]**

Emmy Award winning actor Sterling K. Brown visits two Los-Angeles area organizations that mentor young men of color, helping them break negative cycles and make change for themselves and their communities. Sterling begins at Brotherhood Crusade, where he joins a therapeutic activity in which young men are able to speak freely about the past and articulate their visions for the future. The second organization is Social Justice Learning Institute, which serves youth of color through an array of programs designed to support them in school, guide them toward personal success, and help them to recognize their power to make positive change where they live. Impressed and moved by both charities, Sterling must now determine how to divide \$25,000 from the California Community Foundation between them. In the end he gives each organization a generous gift in support of their work.

**[Educational Message: Empowering individuals and mentorship is an important part of community building. When you inspire someone to be their best self, you can empower them to take responsibility for themselves, their community, and their future.]**

Airdate: 7/22/2017

Time:

Duration: 30:00

## **HEART OF A CHAMPION**

### **OVERCOMING THE ODDS [HOC130]**

We see how Nascar driver Kyle Busch overcomes a frightening wreck to excel in racing. Next, we see how Stacy Lewis works hard to play golf despite having scoliosis, a lateral curvature in the normally straight vertical line of the spine. Then, we learn about the legacy of Indiana University's diving

program, which started in 1959, and how young divers are trained to become Olympians-- dives are typically judged based on three elements: the approach, the flight and the entry. Lastly, we see how Se Ri Pak, the youngest Women's Open champion ever in 1998, paved the way for women's golf in South Korea.

**[Educational Message: Don't be afraid to be the first to do something or to try something again— your ambition can have a lasting impact on others and inspire future trailblazers. Don't let a setback scare you from trying again. Viewers learn about safety in Nascar racing, how to train to become a female golfer, what it takes to become an Olympic diver, and the growth of women's golf in South Korea.]**

### **THE VOYAGER WITH JOSH GARCIA**

#### **LITTLE ISLAND, BIG FLAVOR [VJG118]**

Host Josh Garcia is ashore in Singapore, the world's only island city-state, and is immersed in the exotic melting pot of people and cultures. At a floating restaurant, he takes on a spicy national dish called Chili Crab. Then, a local actress introduces Josh to handmade flower garlands in the city's Little India district, and Josh seeks out specially beaded shoes as a birthday gift for his niece. First up, Josh travels with a local foodie to a floating restaurant where they are serving up the national dish that, according to local legend, was created in the 1950s by the wife of a fisherman who became tired and bored with eating plain steamed crab. Later, back on the island, Josh visits Little India where he heads to a bazaar and learns to make traditional flower garlands, which play a big role in local Indian culture. Then, Josh heads into town to learn another beautiful handicraft, and later meets up with a local chef to experience Singapore's true melting pot, its street food scene.

**[Educational Message: Singapore is a melting pot of Indian, Malay, and Chinese cultures. Visiting a melting pot of cultures can be a great opportunity to see how culture transforms and transcends time and space.]**

### **WILDERNESS VET**

#### **BIG ANIMALS, BIG PROBLEMS [WDV118]**

On this episode of Wilderness Vet, Dr. Oakley revisits some of her biggest patients. First, Dr. Oakley heads to the Yukon Wildlife Preserve to check up on a musk-ox with an unknown illness. Dr. Oakley utilizes a clever technique in order to lure the musk-ox and tranquilize the animal for examination. Dr. Oakley carefully examines the musk-ox's kidneys and provides vaccinations while also retrieving a blood sample. Next, Dr. Oakley heads to meet Doug Twiss at Half Breed Creek Corral, where a herd of wild horses are being cared for. These horses are slated to be moved to a pasture in Alaska, but before they can leave, Dr. Oakley needs to run some blood tests to make sure they're disease free. Next, Dr. Oakley and her daughters, Sierra, and Maya head to a reindeer farm in Anchorage, Alaska to check in on a reindeer suffering from "chipmunk cheeks." This condition occurs when food impacts in the reindeer's cheeks and cannot provide nutrition for the animal. Dr. Oakley removes the impacted food and uses a float to file down the reindeer's molars. Finally, Dr. Oakley visits a local alpaca farm to perform physical exams, vaccinations, and deworming. Viewers will learn more about the unique alpaca and why the non-native species is bred and

raised in Alaska. Dr. Oakley successfully examines and treats each alpaca and all are given a clean bill of health.

**[Educational Message: We must strive to think big when setting our goals. Life's too short to think small.]**

Duration: 30:00

### **JOURNEY WITH DYLAN DREYER**

#### **TROPICAL RAINFOREST [JDD118]**

Join host Dylan Dreyer on an exploration of the tropical rainforests of the world. We'll discover a collection of amazing creatures that climb, fly, and slither their way through the deep jungle. We'll meet scientists at the front lines of rainforest conservation, and we'll venture to the tops of the world's tallest trees to connect with animals unlike anything you've ever seen before. First, we'll learn more about our rainforests, such as how they are responsible for nearly 30% of all oxygen on our planet, and how as much as 75% of all species on Earth call our rainforests home. Here, we'll observe and learn more about the many insects, reptiles, and other creatures who inhabit this region and how they adapt for survival. Next, we'll learn about the indigenous groups of people that live within the rainforests. Even today, the government of Brazil believes there as many as 60 uncontacted tribes living in the Amazon rainforests. Next, we'll learn more about the countless mammals that inhabit the forests, like sloths, jaguars, and various primates. Next, we witness the incredible survival skills of the leafcutter ants, witnessing how they harvest leaves and feed them to certain types of fungus. As the fungus breaks down the chewed leaves, the leaves are converted back to food for the ants. Next, we'll follow an ecologist who is studying the canopies of the rainforests. Her goal is to determine the importance of certain plant species thriving in the canopy. It's a dangerous job but a rewarding one as well. Finally, we'll learn more about our own impact on the world's rainforests.

**[Educational Message: Protecting our world's natural resources is of utmost importance. We must respect nature and do our part for future generations.]**

Airdate: 7/29/2017

Time:

Duration: 30:00

### **NATURALLY, DANNY SEO**

#### **BEE KEEPING [NDS118]**

Host Danny visits a bee farm, teaches how food can help relieve health symptoms, upcycles bottles into gift boxes, and creates do-it-yourself spider repellent. First, Danny travels to Rhode Island and participates in the process of harvesting honey. To collect the honey, beekeepers use smoke, which confuses bees, making them more docile; however, beekeepers harvest only the surplus honey and leave enough for the bees to survive. Next, he joins Amie Valpone in the kitchen to make cabbage and mango salad and learn about the benefits of using organic produce, which is cultivated without using pesticides or synthetic fertilizers. Cabbage is an excellent source of vitamin K, vitamin C and dietary fiber; and mangos are a good source of fiber, vitamin A and folic acid. Then, he finds new ways to re-use plastic water bottles. Americans throw away approximately 2.5 million plastic bottles every hour. Danny turns old bottles into gift boxes through decoupage, the art of decorating something with paper cut-outs. Finally, Danny creates spider repellent by using essential oils, which are distilled from various parts of plants like seeds, bark and stems.

**[Educational Message: Although harvesting honey seems like a simple process, much of the labor is done by the bees. However, we should be mindful of using certain pesticides and the impact it can have on bees—one bee with pesticide on its body can cause widespread destruction in a colony. A healthier diet can help relieve some chronic illness symptoms. You can recycle plastic bottles while also learning a new technique to create a reusable gift box. An easy way to repel spiders is by combining the scents of oils, which spiders dislike, such as rosemary, lemongrass and thyme.]**

**GIVE**

**GIVE TO SAVE RAINFORESTS AND THE ANIMALS WHO DEPEND ON THEM [GBU118]**

In this special GIVE episode, NBC News Host and Correspondent Jenna Bush Hager crisscrosses the country to visit two organizations – and two visionary young leaders – using technology to protect the environment. Jenna begins with the Gabby Wild Foundation, the brainchild of activist and veterinary student, Gabby Wild. While Gabby cares for injured animals at Cornell University, her foundation places cameras in trees in the rainforests of Sumatra to monitor endangered elephants and defend them from poachers. Amazed by Gabby’s passion and accomplishments, Jenna is determined to help, but she has another organization to visit first. Across the country in Northern California, Jenna encounters Topher White and his foundation Rainforest Connection. Using discarded cell phones, Topher has engineered a device called The Guardian which he mounts high in the rainforest canopy in countries from Cameroon to Bolivia. By “listening” for the sound of chainsaws and trucks, and sending out real-time alerts to local forest protectors, The Guardian is a first line of defense for the world’s rainforests. In this way Rainforest Connection aims to stop illegal logging and halt deforestation, the leading cause of climate change. Blown away by all she has seen and learned, Jenna must now decide how to divide a \$25,000 gift from Mountain Hardware between the two organizations.

**[Educational Message: It doesn’t matter your age, if you are passionate about something, you can take action to raise awareness for that cause. ]**

Time:

Duration: 30:00

**HEART OF A CHAMPION**

**TEENAGE DREAMS [HOC131]**

We see how a motorsports fabricator started a camp for children with congenital heart defects, which can affect the structure of a baby’s heart and how blood flows to the rest of the body. Next, we journey to Kenya, a country that is known for producing Olympians in long distance running, where a 12-year-old girl aspires to play Olympic volleyball and win a gold medal for her country. Then, we see how a young multi-sport athlete triumphs despite having Spina Bifida, a birth defect that between 1,500-2,000 are born with each year in the U.S. Lastly, we see how golfer Erik Compton inspires others through his golf event benefiting organ transplant patients— on any given day, there are about 3,000 people in the U.S. on the waiting list for a heart transplant.

**[Educational Message: Don’t let your age or a physical disability prevent you from working toward achieving your dream or making a difference— it’s never too early to start trying. Viewers learn ways**

**young athletes can train to develop skills in order to become Olympic volleyball players and Paralympic track and field competitors. They also learn ways to raise awareness for a cause in order to make a difference.]**

**THE VOYAGER WITH JOSH GARCIA**

**CAMEO APPEARANCE [VJG119]**

Host Josh Garcia is in Campaña, Italy. He sails to Naples and samples the culture of the famous region. First, Josh heads straight to the source, in the countryside, to taste a local delicacy - true buffalo mozzarella. The name mozzarella comes from the Italian verb “mozzare,” which means to sever with the hands. Then, on the storied Amalfi Coast, Josh learns how cameos, an ancient form of intricate shell carving, are made. The layers of the shell are shaved, shaped, and engraved to create beautiful pieces of art. Finally, he treks the coast to meet a falconer and his falcon. Josh tries his hand at the noble tradition of falconry.

**[Educational Message: Taking an opportunity to learn the process of how things are made can be a rewarding experience. Understanding the process, can make you appreciate the end result that much more.]**

Airdate: 8/5/2017

Time:

Duration: 30:00

**WILDERNESS VET**

**ALL ROADS LEAD HOME [WDV119]**

On this episode of Wilderness Vet, it's an unusual week for Dr. Oakley. First up, the Doc and her daughter Sierra head to a wildlife park to perform surgery on a Reindeer named Agnes. Agnes suffers from a hernia and has a history of previously failed surgeries. A hernia occurs when intestines are protruding from a weakness in the abdominal wall, interfering with digestion and the animal's overall health. The surgery will require Dr. Oakley to insert a surgical mesh sling into Agnes' abdomen. Here we learn more about the importance of sterilization when performing surgical procedures, especially outdoors. Next, Dr. Oakley heads to the Bird Treatment & Learning center in Anchorage, Alaska to see a great horned owl recovering from an injured toe. However, we soon find out that capturing the animal for its examination is easier said than done. Dr. Oakley carefully immobilizes the owl and begins the examination of the injured toe. After a thorough health exam, Dr. Oakley determines that the bird of prey is ready to return to the wild. The team then successfully relocates the owl back to the wild. Finally, Dr. Oakley uses her day off for a “family clinic” where she'll perform health exams on their family pets.

**[Educational Message: All life has purpose. We must always care for the creatures of Earth both great and small.]**

**JOURNEY WITH DYLAN DREYER**

**THE LAST REEF [JDD119]**

Join host Dylan Dreyer on an exploration of coral reefs from around the globe and discover the breathtaking marine life that call them home. From the ocean's smallest creatures, to the largest fish in the sea, we'll come face-to-face with animals that depend upon coral reefs to survive. Next, we learn more about the many species of coral and how they are formed over long periods of time. Also, we'll be introduced to the many marine species that depend on coral reefs for their survival. Here we'll discover the importance of symbiosis among the coral reefs and its marine inhabitants. Finally, we'll witness how coral is adapting to life in modern human society. Relics of war in the Pacific Ocean are now home to newly formed reefs, slowly transforming overtime. Decommissioned ships are now regularly sunk to encourage the development of new coral reefs. Learn more about how all over the world, people are trying to lend the reef builders a helping hand.

**[Educational Message: We must better understand the science behind ocean conservation and the important connections we share with coral reefs. We must do our part to cut carbon emissions drastically and find greener sources of energy and transportation.]**

Airdate: 8/5/2017

Time:

Duration: 30:00

**NATURALLY, DANNY SEO**

**CITRUS SURPRISES [NDS119]**

Host Danny Seo makes homemade citrus creations, discovers ways to re-use rice, teaches how to give new life to an old tabletop, and shows different ways to use pickle juice around the house. First, Danny travels to Ojai, California to meet with Victoria Pearson who grows her own citrus and creates fresh ideas to use citrus in everyday ways, such as in citrus almond milk and orange blossom honey. Orange blossom honey is made from bees that gather nectar from orange blossoms, and almond milk is high in iron and riboflavin, both important for muscle growth and healing. Also, almonds contain more calcium than any other nut. Next, Danny uses leftover brown rice to create a completely new meal—eggplant fried rice using sesame oil and shichimi togarashi, which is a spicy blend of seven flavors, including chilies, sesame seeds and citrus peel. Brown rice has more fiber and protein than white rice, and eggplant is a good source of dietary fiber, vitamin B1 and copper. Then, Danny takes an old tabletop and shows how to use wood veneer tape to create designs and patterns to give the table a new, refreshed look. Finally, Danny uses pickle brining juice, which typically consists of water, salt and vinegar, for household purposes, such as: killing weeds, revive hydrangeas, and clean grease from pans.

**[Educational Message: You can make your own almond milk at home by combining water and raw almonds and then filtering it through cheesecloth. If you have leftover rice or leftover pickle juice, don't throw it away—it can be re-used in more ways you may not realize. With leftover rice, you can create a new dish by turning it into fried rice; and leftover pickle juice can be used to kill weeds or help some plants live longer, as certain plants respond differently to acidic things. Instead of throwing an old table out, you can redecorate it in a way that also allows you to show your creativity and express yourself artistically.]**

**GIVE**

### **GIVE FOR A BETTER LIFE [GBU119]**

Baseball All Star Mark Teixeira visits two charities providing life-enhancing programs to the communities they serve. Mark's first stop is Literacy Volunteers, a program that offers free, high-quality literacy instruction to English language learners of all levels. With classes in many parts of Connecticut, Literacy Volunteers gives people the tools and confidence to participate fully in their communities and our society. Mark joins a classroom of students learning English professional vocabulary. Impressed with their dedication and the struggles they endure, he feels compelled to help. The second organization Mark visits is the Maria Fareri Children's Hospital, where a forward thinking group of doctors, nurses and parents have created the Child Life and Creative Arts Therapy program, which aims to provide an environment and activities that keep critically ill children engaged and optimistic while they are in treatment. After playing music with a group of young patients and losing at foosball to a brave young boy in treatment for leukemia, Mark is determined to support the program. In the end, he gives both organizations a generous donation from the Greenwich International Film Festival.

**[Educational Message: When you look past appearances and get to know a person for who they are on the inside, you give that person permissions to be truly seen.]**

Airdate: 8/5/2017

**FAMILY MATTERS [WDV120]**

On this episode of Wilderness Vet, Dr. Oakley's daughter Sierra is leaving for a three week long guide school where she'll undergo survival training while horseback riding throughout the wilderness. First up, Dr. Oakley and her daughter Willow are visiting a farm to check up on a lame horse. The most common causes for lameness are infection, injuries, or complications resulting from old age. Dr. Oakley observes the lame horse's gait and examines its legs and feet. Next, Dr. Oakley and her daughter Maya travel to the Yukon Wildlife Preserve to check up on some lynx kittens. Dr. Oakley, Maya, and team use nets in order to carefully capture the lynx kittens. This task soon proves to be easier said than done, as the lynx kittens are proving very difficult to catch. However, the team works together and eventually captures the kittens successfully. Dr. Oakley and team will perform physicals, vaccines, and also microchip the kittens. Next, Dr. Oakley is back at the Yukon Wildlife Preserve to perform a pregnancy check on a female bison. First, Dr. Oakley will use a blow gun to tranquilize the bison. This will allow the Doc to safely examine the bison to perform the pregnancy check. The team works together using vehicles to carefully corral the herd in a more suitable area. Next, Dr. Oakley uses an ultrasound to examine the female bison. After a careful exam, it is determined that the bison cow is indeed pregnant. Finally, it's an emotional ending to a long three weeks, as Sierra returns from survival camp and reunites with her loving family.

**[Educational Message: Nothing can break the bond of a family. Family is of utmost importance. Together we can help each other accomplish any feat.]**

**JOURNEY WITH DYLAN DREYER**

**BEST OF SCIENCE [JDD120]**

Join host Dylan Dreyer on a journey through some of the most unique scientific discoveries of the last half century. From satellite technology of geosynchronous orbit, to deep ocean exploration along the Atlantic Ridge, to the climate science of Antarctica, we'll reveal the ways science has shaped our modern world. Prepare to learn more about *Peleodictyon Nodosum*, an ancient and mysterious creature that leaves behind strange fossils. The oldest living fossil on the planet, *Peleodictyon Nodosum* lived hundreds of millions of years before the dinosaurs. Our journey continues in Winslow, Arizona at the site of Meteor Crater. Here we learn more about the devastating meteorite impact that took place over 50,000 years ago. Scientists discovered the cause of the event was due to a space collision of large meteors. Next, we'll learn more about the varying levels of our earth's orbit such as low Earth orbit, near/middle Earth orbit, and Geosynchronous orbit. With so many objects careening through the same altitude, it's not hard to imagine that some objects may eventually collide. The Kessler Syndrome, first suggested in 1978, is the idea that collisions would eventually create smaller debris that would be hazardous to spacecraft. Finally, we'll team up with a group of scientists that are studying the effect of climate change on the South Pole. Here we learn how the sea ice around the continent waxes and wanes over time. In winter, Antarctica nearly doubles in size and the

expanse of coldness effects climate over the entire globe. Next, we see how scientists use core drills to remove samples from the ice. Finally, we learn about the history of The Antarctica Treaty, an agreement among foreign nations to protect Antarctica as place of peace and science.

**[Educational Message: By helping to preserve and protect the environment, we will leave a better world for future generations. Our own space junk, even the smallest wayward nut or bolt, could cause collisions in the future as we further explore space travel. Also, we must limit carbon emissions, for when the levels of carbon dioxide in the atmosphere change, so does the climate.]**

**NATURALLY, DANNY SEO**

**PROJECT REPAT [NDS120]**

Host Danny Seo upcycles your favorite t-shirts, teaches what is compostable, makes protein rich vegetarian dishes, and creates molded soaps. First, Danny travels to Fall River, Massachusetts to visit a plant that converts old t-shirts into something you can use for much longer—a quilt. Quilting, a craft that dates back as early as 3000 BC, is done when swatches of fabric are cut using a clicker press, which makes shapes out of soft materials, and sewn together using thread--plastic bottles can be melted and then reformed into thread that gets woven together to make upcycled fleece. Next, Danny explains that anything plant-based can be added to compost, and he shows some different, unexpected things that are also compostable, such as pasta, paper towels, post-its, old spices, old toast. Nearly 33 million tons of food waste is sent to landfills every year, but the majority of that is actually compostable. Composting allows decomposed materials to be reused as a nutritious supplement for gardens, lawns and plants. Then, Danny meets with Rebecca French to learn how to incorporate protein into vegetarian dishes by making a sweet potato pie smoothie and peanut butter power bites. Sweet potatoes are high in fiber and vitamins A and C; dates are a good source of energy and are rich in antioxidants; and peanuts are legumes and are more closely related to beans and peas than nuts. A plant-based diet consisting of a variety fruits, vegetable, beans, seed and nuts allows you to get enough amino acids, which transport and store nutrients in the body and are essential for the metabolic process, to combine to make protein. Finally, Danny melts down glycerin soap, which is typically translucent and helps moisturize skin, pours it into molds, and shows all-natural ways to give it color.

**[Educational Message: More than 13 million tons of used textile waste is generated each year in the U.S. Instead of throwing away old t-shirts, find other ways to use them, like making a blanket. Anything plant-based can be used to create compost, so before you throw it away, research if it is compostable, as some compostable materials may surprise you. Vegetarian meals can also be rich in protein. You can make homemade soap and add color to it without using artificial dyes by using carrots, beets or chlorophyll, which is a green pigment found in plants.]**

**GIVE**

**GIVE TO VETERANS WHO ARE ADJUSTING TO LIFE AFTER SERVICE [GBU120]**

On This episode of Give, Blair Underwood visits two non-profits who are working to help veterans adjust to life after service. Bunker Labs helps military vets start their own businesses, and Blair joins a workshop that helps these veterans network and find support for their ideas. At the Armed Services Arts Partnership, the actor in Blair joins a class designed to help veterans find their voice through engagement in the arts. It

allows these vets to express themselves creatively in a safe, community-oriented environment. After a new business workshop and an ad-lib class, Blair gives both organizations a generous donation from the Ford Fund to help them take their work to the next level.

**[Educational Message: Philanthropic organizations that serve military veterans can provide safe spaces for veterans to receive emotional support and coaching to achieve their ambitions back home.]**

## **HEART OF A CHAMPION**

### **LEAD BY EXAMPLE [HOC133]**

We see how wrestling legend Dan Gable creates a lasting legacy at the University of Iowa and inspires future wrestlers. Next, a retired marine becomes captain of the U.S. Paralympic sled hockey team, a sport that was invented in the early 1960s at a rehabilitation center in Sweden. Then, we see how Dan Brooks, Duke's women's golf coach, has left his mark on college golf. Last, we learn how a 15-year-old American snowboarder is carving a path to the Olympics in the sport, which debuted at the 1998 Winter Olympics in Japan.

**[Educational Message: Despite how different sports may be, many require the same amount of training and endurance— whether it is physical or mental. Lessons learned in one concentration can be applied to another in order to succeed. Viewers learn about the history of wrestling and sled hockey, as well as the growth of women's collegiate golf and ways young athletes train to develop skills in order to become Olympic snowboarders.]**

## **THE VOYAGER WITH JOSH GARCIA**

### **DIDGERI-DUDE [VJG121]**

Host Josh Garcia sails to the beautiful port of Sydney, Australia and falls for the city in a big way. First, he checks out the local wildlife and learns about the endemic species that inhabit the region. Josh meets some adorable joey kangaroos that easily win him over. The Western Gray, Eastern Gray, and Red Kangaroos are the most common breeds. Then, he heads into town to meet a local foodie and try some decadent desserts that blow his tastebuds away. Josh tries Gianduja, a chocolate hazelnut dessert, and Pavlova, a meringue custard dessert. Finally, for a truly special experience, an aboriginal cultural guide teaches Josh the techniques to throw a returning boomerang and, later, play the didgeridoo.

**[Educational Message: Visiting new places can sometimes remind you of places you've already visited. You might be surprised at how cities across the world from each other might have more in common than you thought.]**

## **WILDERNESS VET**

### **ANIMALS OF THE YUKON [WDV121]**

For an experienced wildlife vet living in the Yukon, animals like caribou, bison, and musk ox are common patients. But whether it's a simple health exam or a serious procedure, Dr. Oakley knows that the bigger the animal is, the bigger the job will be. On this episode of Wilderness Vet, Dr. Oakley's first stop is at the Alaska Wildlife Conservation Center to check in on some bison calves. There are four bison that appear to be developing slowly. Dr. Oakley fears that parasites may be the cause, so she plans to administer a dewormer. Using a blowgun, Dr. Oakley successfully treats two of the four bison calves with the dewormer. After a struggle to locate the remaining two calves, the team decides to try again another day, so as to not disturb the herd any further. Later that week, Dr. Oakley and team re-attempt to treat the remaining calves. With some persistence, Dr. Oakley successfully darts the bison calves with the dewormer. Next, Dr. Oakley is visiting a musk ox farm to check on two new patients. The Doc will be examining an older male musk ox, and will also be microchipping a young musk ox calf. After carefully separating herself from the calf's mother for her own safety, Dr. Oakley successfully microchips the musk ox calf. Next, Dr. Oakley examines the ailing male musk ox to try and determine what's causing the issues. Dr. Oakley suspects that underlying cause may be an infection. Once the bloodwork comes back from the lab, she'll be able to prescribe the correct antibiotics.

**[Educational Message: The secret to success is to never give up. We must be determined and passionate about our goals in order to succeed.]**

**JOURNEY WITH DYLAN DREYER**

**WILD CALIFORNIA [JDD121]**

Join host Dylan Dreyer on a tour of the Golden State. From its gorgeous coastline to its towering mountains, from Death Valley to the Golden Gate Bridge, California is not only the most populated state in America, it's also home to breathtaking wildlife and one of the largest economies in the world. California officially became the 31<sup>st</sup> state in America in 1850, it is the third largest U.S. state by landmass, and has since become the most populated. Today, the economy of California is so vast, if it were its own country, it would be the 6<sup>th</sup> largest economy in the world. When Spanish explorers first set eyes on this wilderness, they named the land after a mythical warrior queen, who is said to fly into battle on a giant Griffon. We'll discover more about the Spanish missionaries and how they built a 300 mile long chain of churches and missions in order to bring Christianity to a new world. Next, we'll follow a team of sky surfers as they freefall from an airplane high in the sky. Next, we'll learn how snowboarding was first invented in the late 1960s in the Sierra Nevada mountains and how it's since become a vastly popular recreational activity and Olympic sport. Next, we'll learn more about Yosemite Valley and the history of the giant Sequoia trees. Found nowhere else on Earth, these Sequoia trees have been rooted in the ground for more than three thousand years and shape the iconic landscape of Yosemite. Next, we'll discover how the Golden Gate Bridge was constructed in 1933 and remains standing to this day. We'll follow engineer Joseph Strauss on his quest to construct the mammoth bridge. Also, learn more about Strauss' obsession with worker safety that initiated the world's first use of the construction hard hat, as well as a steel safety net used for the less sure footed. Finally, we'll learn more about how California is the U.S. leader in producing renewable energy and has produced more solar power than all other states combined.

**[Educational Message: We face many challenges balancing the needs of the environment and the needs of a growing population. We must educate future generations so we can all contribute to protecting our natural resources.]**

Airdate: 8/19/2017

Time:

Duration: 30:00

## **NATURALLY, DANNY SEO**

### **CATTYWAMPUS [NDS121]**

Host Danny Seo discovers natural fabric dyes, creates green juice frozen treats, and makes a homemade stain remover. First, Danny travels to Ojai, California to learn how nature can be foraged and used to make natural dyes. Cochineal bugs, a microscopic insect that bores into leaves of cactus can be used to create a red dye. The red color is carminic acid, which the female insects store in their bodies to ward off predators; and 14<sup>th</sup> century Incas and Aztecs valued the cochineal dye as much as gold. You can change the color of the fabric by dipping it in ammonia, which changes the pH level and, therefore, the color. Next, Danny makes green juice popsicles using cucumbers, celery, water, kale, pineapple, green apple, lemon juice and agave nectar. Cucumbers are high in energy boosting B vitamins; one cup of kale has more vitamin C than a medium orange; and agave nectar is 1.5 times sweeter than table sugar. Finally, Danny teaches how to make homemade stain remover by using dish soap, which cuts grease; hydrogen peroxide, which is basically water with an extra oxygen atom; and baking soda, which brightens fabric.

**[Educational Message: Dying fabric is a way to express yourself and give old fabrics a new life. Fabric can be dyed by adding it to all-natural dyes in boiling water—the longer the fabric soaks, the darker it gets. You don't need a bunch of sugar to make dessert. Instead, you can combine vegetables, fruits, and honey to make popsicles--the fruit juices and honey will act as natural sweeteners. Instead of using laundry detergent as stain remover, as it can deteriorate the fibers and also leave residue on clothes, you can create your own at home.]**

## **GIVE**

### **GIVE TO BROADWAY AND COLLEGE BOUND KIDS [GBU121]**

Tony Award winning actress Cynthia Erivo visits organizations that bring the transformational power of creativity to young people in New York City. First, she visits the folks at Broadway Bound Kids, which is an organization that offers a free program for kids who want to learn to sing, dance and act. Cynthia joins the kids as they build their self confidence in the performing arts and life. Cynthia also visits an organization called Publicolor, which engages high risk, low-income students in their education. The students are also mentored for success in college, careers, and life. Cynthia visits Publicolor's design studio where the kids are immersed in literacy and math through product design. In the end, Cynthia awards both organizations with a generous donation and pulls some strings to find a new rehearsal space for Broadway Bound Kids.

**[Educational Message: It's powerful when someone believes in you and your ability to succeed. When you tell someone you believe in them, it opens up the possibility for them to discover who they are and who they want to be.]**

### **THE VOYAGER WITH JOSH GARCIA**

#### **VOYAGE AROUND THE WORLD [VJG122]**

Host Josh Garcia rereads some of his favorite journal entries from his whirlwind voyage around the world. In Valladolid, Mexico Josh is taught the traditional Mayan craft of weaving hammocks while he observes a local craftswoman weaving a hammock. Then, in Marseille, France he learns about the 600-year-old traditional soap that put Marseilles on the map. Josh gets a hands-on experience at a local soap factory where he learns the science behind world-famous Marseille soap. Then, in Genoa, Italy Josh arrives at a basil farm where he learns the secret to the most famous herb grown in the region. Under the guidance of a world champion, he helps make a truly authentic version of pesto that won the Pesto World Championship. Finally, he meets a living legend who trained under the same master as Bruce Lee and tries his hand at Kung Fu. The art of Kung Fu is said to be thousands of years old and dates back to the legend of Wing Chung, a nun who created the art to conquer an evil opponent.

**[Educational Message: Writing down what you experience while traveling can be a great way to remember and reflect on past experiences.]**

### **WILDERNESS VET**

#### **EARNING THEIR WINGS [WDV122]**

When it comes to animals, Dr. Oakley loves each and every one, but some of her favorite memories involve her feathered patients. From majestic eagles and owls with wing injuries, to beautiful ducks and ravens with broken bones, Dr. Oakley finds great joy in helping all these birds recover so they can fly home once again. On this episode of Wilderness Vet, Dr. Oakley first helps a blue and gold macaw with a routine beak and nail trim. Next, Dr. Oakley travels to the Yukon Wildlife Preserve to perform a check up on two eaglets with injured legs. After discovering that both birds had previously suffered fractured legs, Dr. Oakley performs x-rays on the eaglets to determine how well the fractures have healed. When x-rays reveal that the injuries are healed, Dr. Oakley and the Yukon Wildlife Preserve team successfully return both eaglets back into the Alaskan wild. Next, Dr. Oakley's patient is a duck with an infection in her foot. Dr. Oakley examines the duck's foot and determines the animal is suffering from bumblefoot. She will need to perform an x-ray to figure out if the infection has spread to the bird's joint and bone. Dr. Oakley takes this time to teach Sierra more about the x-ray process and how the instrument is used. Finally, at the Bald Eagle

Foundation, Dr. Oakley is visiting a Eurasian eagle-owl named Hans. Eurasian eagle-owls are one of the largest owl species in the world. Dr. Oakley needs to take a blood sample from Hans that proves to be easier said than done for the powerful raptor. Eventually, Dr. Oakley successfully takes the blood sample that will be tested to ensure Hans is in good health.

**[Educational Message: Persistence is crucial to success. We must have the energy and patience to work hard for our dreams.]**

### **JOURNEY WITH DYLAN DREYER**

#### **WILD OCEAN [JDD122]**

Join host Dylan Dreyer on a tour of South Africa's Wild Coast to discover one of the last great ocean wildernesses and witness the amazing animals drawn here from around the globe. We'll reveal the many threats humans cause to ocean life, meet the proud people who depend on the Wild Coast for food, and learn the ways they're fighting to protect it. Oceans cover more than 72% of our planet but scientists believe less than 5% of oceans have actually been explored. The oceans are home to 230,000 known species but biologists believe the actual number to be closer to 2 million. First, we'll travel to the waters of the Eastern coast of South Africa. Here we'll learn more about The Wild Coast and its diverse ocean ecosystem.

Discover more about how humans have overfished oceans and, in turn, devastated marine populations. Next, we'll learn more about the marine life that inhabits The Wild Coast. We'll follow pods of dolphins and whales as they seek their next meals. Also, discover how sardines play a vital role in sustaining marine life and how their populations are greatly decreasing each year. Finally, we'll meet the native people and learn more about their connection to the ocean and dependence on the marine life. We'll join in on the annual "sardine run" and witness first hand the incredible teamwork needed to catch and harvest the millions of fish.

**[Educational Message: Human activity has caused severe damage to ocean habitats and threatens entire ocean ecosystems with collapse. One by one, fisheries have been depleted throughout the world. Discover how the global fishing industry is estimated to be 2-3 times larger than what oceans can sustain. The most powerful and positive environmental changes will come from our individual choices. When we all do our part, big things can happen.]**

Airdate: 8/26/2017

Time:

Duration: 30:00

### **NATURALLY, DANNY SEO**

#### **REAL FOOD [NDS122]**

Host Danny Seo makes vegan chocolate silk pie, uses kitchen ingredients to get healthy skin, and discovers how laminate is made. First, Danny visits chef Ann Gentry to learn how to make vegan chocolate pie using ingredients such as silken tofu, also called soft tofu, has a softer consistency than regular tofu. Next, Danny makes a face scrub using rice, banana and coconut milk—the rice acts as an exfoliant; bananas are high in skin hydrating potassium; and coconut milk is high in vitamin C, which helps maintain elasticity of skin.

Finally, Danny visits a factory to see how a decorative paper is turned into laminate, which is made of 70% paper. Once the decorative paper is cut, a top layer is added by combining melamine resin and tissue paper, then phenolic resin is added to give laminate its flexibility and bending properties.

**[Educational Message: You can create a vegan dessert without adding any artificial sweetener. Using coconut oil and maple syrup is an alternative, healthy way to sweeten a dessert. Instead of buying face scrub, you can save money by making your own at home. Many items you can find in your pantry contain ingredients that can benefit skin health. Laminate can be used in more ways than just on countertops, as it has a flexibility to it. It also has environmental benefits, as 41% of the kraft paper is made from recycled materials.]**

Duration: 30:00

**GIVE**

**GIVE TO VETERANS FINDING THE WAY HOME [GBU122]**

Actor Wilmer Valderrama visits two Los Angeles-based organizations helping veterans recover from the wounds of war and find their footing in civilian life. The first organization, Pets for Vets, matches veterans struggling with Post Traumatic Stress Disorder with rescue dogs. Through personalized training, the vets and their pets learn to manage the physical and psychological effects of war and develop a “superbond” that supports them both for life. After a moving encounter with two veterans and their furry companions, Wilmer understands the significance of service animals in a new way and is determined to help the organization thrive. Before he awards them with a gift, however, he pays a visit to Team Rubicon, an organization that deploys vets as first responders in disaster zones. Tracking disasters in real time, Team Rubicon assembles teams of ex-military personnel to help save and repair lives at home and abroad. Members of Team Rubicon regain a sense of purpose in peacetime and re-connect with a community of veterans who support and understand them. Having seen the work of the organization up close, Wilmer wants to support them. In the end he divides a \$50,000 gift from the Steven and Alexandra Cohen Foundation between the two organizations.

**[Educational Message: Philanthropic organizations that work with military service veterans can create opportunities for those individuals to regain a sense of purpose. ]**

Airdate: 8/26/2017

Time:

Duration: 30:00

## **WILDERNESS VET**

### **MAINTENANCE DAY [WDV123]**

For Dr. Oakley, some days are spent performing life-saving surgeries, others involve helping with conservation projects, but most of her days consist of routine exams. As any good veterinarian knows, On this episode of Wilderness Vet, Dr. Oakley's first call will bring her face to face with one of the Yukon's fiercest predators, the wolverine. At the Kroeschel Wildlife Center, Dr. Oakley meets the wolverine that will soon be shipped elsewhere to join a breeding program to further the species. Dr. Oakley will need to sedate the wolverine so that it can be carefully captured and contained for travel. Next, Dr. Oakley heads to the Yukon Wildlife Preserve to help a musk ox suffering from overgrown toe nails. The team must first secure the musk ox in a pen so that they can carefully sedate the animal. Next, Dr. Oakley visits a dairy farm to perform a pregnancy check on a cow named Raspberry. Dr. Oakley completes the internal exam and determines that Raspberry is indeed pregnant. Next, Dr. Oakley heads to another dairy farm to perform an additional pregnancy check. Due to a previously failed pregnancy, the farmer is a bit worried there may be an issue with her cow. Dr. Oakley performs the pregnancy check and determines that all is well and the calf is positioned correctly in the mother's uterus. Finally, Dr. Oakley heads to a ranch to perform tail docking on a herd of sheep. Docking is a common procedure, performed by farmers when the sheep are born, in which they trim the sheep's tails. Without this procedure, the sheep can be susceptible to infection and other health problems. Dr. Oakley carefully and successfully performs the tail dockings on all sheep.

**[Educational Message: In life, it isn't always about fixing problems, sometimes it's about preventing them. We rise up by lifting others.]**

Airdate: 9/2/2017

Time:

Duration: 30:00

## **JOURNEY WITH DYLAN DREYER**

### **ZION CANYON [JDD123]**

Join host Dylan Dreyer on a journey through one of the wild jewels of the American West: Zion National Park. We'll reveal the history of the proud people who first settled this ancient land and explore the natural

wonders of southern Utah. We'll also come face to face with the birds, mammals, and reptiles that inhabit the four unique life zones of Zion: desert, riverbed, woodland, and forest. Zion Canyon is over 150 million years old and was carved by the North Fork of the Virgin River. The first humans began settling in Zion eight thousand years ago and the region became the center of a mystic land. Next, we'll witness recreations of the cliff people ceremonies and learn more about the gods and spirits they worshipped, and feared. We'll learn about how they believed the gods placed guardians to protect the sacred land. Next, we'll follow the first group of European settlers to arrive in Zion Canyon in the mid 1800's. These Mormon missionaries gave Zion Canyon its name, meaning a place of peace, harmony, and devotion to God. Discover more about the first missionaries and their quest explore the unknown realms of the canyon. Next, we'll learn about the rainy season and how flash floods can rip through the canyons without warning. Native populations grew accustomed to these dangers over generations, but many European settlers discovered the hard way. Finally, we'll join some modern day Zion Canyon rock climbing enthusiasts, who soon realize that some cliffs require a bit more skill than others.

**[Educational Message: Our National Parks preserve the most beautiful corners of the American landscape for future generations. We must appreciate and respect their natural beauty and fragility. ]**

### **NATURALLY, DANNY SEO**

#### **RAIDING YOUR FRIDGE AND PANTRY [NDS123]**

Host Danny Seo explore unusual ways to use ordinary ingredients, transforms veggies into decadent desserts, makes a do-it-yourself natural cleaner, and creates a hand scrub using products from your kitchen cupboards. First, Danny visits Catherine McCord and learns how to create healthy one-of-a-kind school lunches. Then, he uses tea bags in an unconventional way to make soup. Boiling a tea bag with garlic creates a broth that serves as a good base for soup, plus garlic has high levels of antioxidants, which help clear acne and boost the immune system. Next, Danny makes ice cream using cauliflower, which is rich in vitamins and minerals— one serving contains 77% of the daily recommended intake of vitamin C. Then, Danny teaches how to make a homemade all-purpose household cleaner by using baking soda, castile soap, and hydrogen peroxide. Baking soda is not fully water soluble, making it a good scouring agent; castile soap is traditionally an olive oil based vegan cleaner, which does not contain animal fats; and hydrogen peroxide kills bacteria by destroying their cell walls. Finally, Danny makes homemade, natural hand scrub using lemon and sugar. The lemon helps disinfect and remove germs, while the sugar works as an exfoliant because it's coarse and contains alpha-hydroxy acids, which remove dead cells.

**[Educational Message: A great way to ensure you eat a balanced lunch is to include a fruit, vegetable, carbohydrate and protein. You can make more with a tea bag besides a beverage, and ice cream can be healthy--don't be afraid to explore opportunities to use something in new ways. You can save money on cleaning products by creating your own at home using household items. It's important to protect our skin from germs, and by combining lemon and sugar, it creates a homemade, disinfecting hand scrub.]**

### **HEART OF A CHAMPION**

#### **SEEING IS BELIEVING [HOC136]**

We see how the Philadelphia Eagles' long snapper Jon Dorenbos works with children by using magic, a craft that is believed to date back to around 2,600 B.C. Next, golfer Martin Kaymer pays tribute to his mother, who passed away from cancer, and honors her by playing golf. Then, NBC's Mary Carillo explores the history of Olympic Curling, which dates back to 1838. Last, we travel to South America, where 8-year-old Nicole Foronda aspires to be an Olympian in BMX racing, a type of off-road bicycle racing on dirt tracks with various jumps.

**[Educational Message: You can use your talent in more ways than one-- it's a great opportunity to give back to those that have influenced you or to raise awareness for a cause. Viewers learn about PGA golf competitions, the history of magic and curling, and steps young athletes can take to develop skills in order to become BMX riders.]**

### **THE VOYAGER WITH JOSH GARCIA**

#### **ELEPHANT-SIZED FUN [VJG124]**

Host Josh Garcia cruises to Phuket, Thailand to explore this premier destination. First, he visits an oyster farm to learn how cultured seawater pearls are made. Then, he catches up with a local chef to try a mouthwatering lineup of authentic Thai cuisine. Josh learns the flavor is in the herbs and coconut. Thailand is the world's 6th largest producer of coconuts. Then, Josh visits an elephant sanctuary where he meets two Asian elephants that show off their playful side. These asian elephants are smaller than their African counterparts and are herbivores. Finally, he meets an artisan who introduces him to the ancient art of dyeing fabric, known as batik.

**[Educational Message: Taking time to visit a culture that you aren't familiar with can provide you with a global perspective.]**

Airdate: 9/9/2017

SUN 10AM

Dear Station,

Pursuant to the Children's Television Act of 1990, "WILD WONDERS AT THE SAN DIEGO ZOO" will satisfy the FCC Children's programming requirement and can be classified as either core or non-core programming. "WILD WONDERS AT THE SAN DIEGO ZOO" serves the educational and informational needs of children 13 to 16 years of age with its program content. The series profiles rare and exotic animals and the unique aspects of each of these amazing creatures.

"WILD WONDERS AT THE SAN DIEGO ZOO" as delivered is formatted to allow for no more than 14 minutes of total commercial time per broadcast hour (7 minutes per half-hour). "WILD WONDERS AT THE SAN DIEGO ZOO" does not display any Internet web site address or host selling during or adjacent to the program, and is otherwise in compliance with Sections 73.670(a) through (d) of the Commission's Rules.

To facilitate your FCC filings, episode synopses are available on line at our website, [www.telcoproductions.com](http://www.telcoproductions.com). Also available on-line are testimonials from our educational advisory review board, consisting of educators and other professionals who have reviewed the series (see the following letters for details).

If you have any other questions, please don't hesitate to contact us.

Sincerely,

A handwritten signature in black ink that reads "Alex Paen".

Dear Alex,

Reviewing episodes of the program "WILD WONDERS at the San Diego Zoo," and I am confident that it meets the educational and informational needs of children 13 to 16 years of age with its program content. The series explores the lives of various zoo animals while examining unique critters in the animal kingdom.

For instance, episodes focus on lesser known animals such as Yellow-legged Frogs and Guinea Fowl. The series also shows how the dedicated staff at the San Diego Zoo care for these critters. Additionally, each episode examines the animals' living environment, while providing detailed explanations of the particular animal species.

"WILD WONDERS at the San Diego Zoo" is educational and informative and gives teen viewers a wonderful look at the wild wonders that exist in the animal kingdom.

Sincerely,

Sister Mary Elizabeth Galt, B.V.M., Chancellor

Dear Alex,

I have reviewed several episodes of the program "WILD WONDERS" and I am confident that it meets the educational and informational needs of children 13 to 16 years of age with its program content. The series explores all types of wild animals, while providing important information by experts from the San Diego Zoo. Each episode gives teenage viewers a close-up look of different animal species, such as flamingoes, pandas, and cobras. The series also examines the details of the living habits of each animal and how zoo keepers care for them.

For example, in one episode, the lifestyles of gorillas are explored while another episode focuses on elephants.

"WILD WONDERS" is educational, informative and entertaining, while providing teenage viewers with extraordinary insights into the lives of wild and exotic creatures.

Sincerely,

Dear Alex,

I have reviewed episodes of the program "WALKING WILD at the San Diego Zoo" and I am confident that it meets the educational and informational needs of children 13 to 16 years of age with its program content. The series focuses on wild animals at the San Diego Zoo and how the staff cares for these unique creatures. The series gives teen viewers up-close looks at everything from Tasmanian Devils to Galapagos Turtles to Gibbons. Each episode explores the lives of these wild critters and provides important information about how they survive in the world.

For example, one episode explores the lives of Servals and their habitat. Another episode looks at Grizzly Bears and why these huge animals are so well-known.

I believe "WALKING WILD at the San Diego Zoo" is an educational and informative series, offering teen viewers a special view of how wild and exotic creatures live in the animal kingdom.

Sincerely,

SUN 11A-1P

**FCC OBJECTIVE LETTER**

TO: PROGRAM DIRECTORS

FROM: CAROL HUBMASTER-BROOKS / FERN ROTFELD

RE: **“WILD ABOUT ANIMALS” - FCC OBJECTIVE LETTER**

---

“WILD ABOUT ANIMALS” is a half-hour weekly animal magazine series. The show is hosted by the Emmy-award winning actress Mariette Hartley. Mariette has committed herself to fighting for the rights of animals for over 20 years.

This series is produced for children 16 and under (**specific target audience is 13-16**). As the producers of “WILD ABOUT ANIMALS,” it is the objective of Steve Rotfeld Productions, Inc., to educate and inform children, specifically in the target age group, by bringing them entertaining and interesting stories about the world’s most fascinating animals. Each episode will consist of four (4) different stories designed to teach children about both exotic and unique animals, as well as to educate them further about animals they see everyday.

**We provide a written synopsis of each episode for your FCC Children’s Television Report. These write-ups will be e-mailed to your station on a quarterly basis. Also, each episode is close-captioned and E/I inscribed throughout.**

If you need additional information, please feel free to contact us.

Sincerely,

Carol Hubmaster-Brooks  
Vice President, Syndication Sales

To Whom It May Concern:

Series Review

**Program:** *Wild About Animals*  
**Shows reviewed:** Episodes 73 and 75  
**Program length:** 30 minutes

*Wild About Animals* is a reality science series that is produced for children in the 13-16 age group, and is designed to educate, inform and entertain those viewers. This program fulfills its purpose by providing a high level of educational value. The structure of each show consists of four (4) different segments/stories which make for a varied, fast paced program. Through the use of dramatic, stunning footage combined with an engaging and entertaining narrative, the show creates a general tone that is particularly effective in connecting to the target audience. The level of detail in each show is also appropriate and the segments move quickly from one topic to the next.

The host, Mariette Hartley who is an animal rights activist and Emmy award winning actress, creates a bond with the viewer through her pleasing delivery. Coupled with a very conversational style is the MTV shooting style. The program open is visually engaging, featuring scenes of animals in their habitats in the form of a teaser for the audience.

In *Wild About Animals* episode 73, the audience is introduced to bears, bison, lemurs and dogs. From the wild to the house pet, the program touches on how animals play an important role in our lives. Another segment in the same episode looks at therapy dogs and how they can contribute to the betterment of people's lives. Meeting patients for whom these dogs create the difference between being dependent and independent is a very strong message for a teenage viewer to learn. Exposure to science and nature is integrated with history and personal contextualization of animals and their roles in our habitat. The depth of information contributes to a high level learning experience.

A second episode, *Wild About Animals* 75, introduces the viewer to pot belly pigs as pets. This is a humorous and educational segment. A couple becomes passionate about the pigs, and their entire lives are devoted to caring for them. Their house is filled with comical and unusual pig paraphernalia, and their backyard has a pig pen for these animals. The audience learns about the specific habits and needs of these pigs, and will understand why the couple has grown so fond of them. Another compelling story in this episode is about Yosemite National Park which shows the

740 Haverford Road, Bryn Mawr, PA 19010 Phone: 610-520-0671 Fax: 610-520-0681

[www.rotfeldproductions.com](http://www.rotfeldproductions.com)

symbiotic relationship between a giant sequoia tree and a tiny beetle. The narration is dramatic, and serves to tell the story of this unusual relationship.

Pacing throughout the show is excellent and will keep the attention of a teen viewer. At the end of the show, to provide some closure, visuals include highlights of the program. This technique takes the educational aspect of the program to another level as it can stimulate discourse following viewing, and would be useful if the program were to be viewed in a classroom setting.

Overall, the depth of information conveyed is quite impressive. Also host Mariette Hartley is excellent, and has the ability to create a connection with the audience based on trust, compassion and dedication to education.

**Summary:**

**Target audience for content, learning modules and style:**

- Ages 13 – 16 years old

**Genre:**

- Science/nature/educational

**Learning Objectives:**

- Develop science literacy
- Science as inquiry
- Science in social and personal perspectives
- Appreciation for nature and science

**Outcomes for students:**

- Develop working knowledge of animals and their environments
- Recognize that animals are an important part of the global ecosystem
