Polnet feels that the importance of localized programming communicates all the issues mentioned above with a local take to benefit the listeners' understanding on these matters.

This quarter, the **immigration** concerns that continue to be an issue for Illinois is the what seems to be the daily drop-offs of border migrates from Texas. Locals not knowing when or where and now how (bus/plane) the arrivals will be sent. Resident' concerns about the **safety** in their neighborhoods regarding **crime**, well-being of the arrivals and possible **tax** cost increases are front and center topics. Also, **environmental** problems on the new sites that would house the newcomers have been questioned for **health** pollutants that were on the site for years. Local **government** has been working with the federal government to try to expedite work permits for those who can work.

Impact on the **economy** long term for communities remains to be seen. Special **educational** needs for the young and care for the newly arrived **elderly** are issues that really have not been addressed. Not to mention **culture** shock for both the immigrants and locals dealing the new living situation has been a work in progress.

Media Tracks located in Des Plaines produces 2 localized programs (RADIO HEALTH JOURNAL and VIEWPOINTS). Both shows are syndicated nationwide and are nationally popular. But being based local, many guests are from local areas and information is of particular interest to this area. While these 2 programs not only fulfill the public issues needs for this period, the programs are of local origin and each program has multiple subjects being covered, just makes this an essential informative source to all our listeners.

Polnet is proud that all programming that originates from our Northbrook facility, is locally based in the Chicagoland area. The Chicago Greek Hours as heard on WEEF is based out of Morton Grove. The entertaining and informative multiple Russian programming that airs on WKTA all originate in areas of Northbrook/Wheeling locations. La Mega Hispanic programming produced locally brings very specific and specialized programming on the above topics on a daily basis.

All these programs produce live news/community programming daily. our brokers have the ability to inform of events and happenings in the home language of their broadcast. This is one of the reasons why free broadcast local radio is an essential broadcast tool to our specialized listening audience. Many of our producers have web streaming, publications, and direct phone lines so listeners can connect multiple ways with their news source.

Local community institutions still provide many free services and events which we inform our audience about in a public service announcement form. Sources such as the Northbrook Public Library provide many seminar types of services open to the public as well as the Lake County Health Department will have free health screenings on various concerns such as high blood pressure and diabetes.

Polnet is always looking to bring the best quality of sound and information to its listeners. Therefore, we encourage listeners to communicate back to us so we can be more informed of their interests, thoughts and concerns, as well as events. Communication is key to our business and to our listeners.

PSA - COMMUNITY ANNOUNCEMENTS - ALERT NOTIFICATIONS

As with all multi-language stations} there is a specific and unique audience that is supporting and listening to its airwaves. Our producers know that to keep their listeners "in the know" with events, programs, notifications, seminars, fairs ... is a way to connect the audience and return the audience and in return, the audience stays in tune with the program.

All the programs broadcast these entities mostly in the homeland language to make all information dear and timely to its audience.

Polnet Communications LTD] has always supported the PSA venders such as the:

AD COUNCIL

IBA

Lake County Health department and Lake County College

Along with other state and local non-for-profits organizations. Usually we are able to provide a 60 seconds spot on top of each hour along with the station legal !.D.

The following are a sample of resources and sources of materials used to provide our PSA and community announcement choices. We also do not manipulate our producers with announcement choices} we *feel* that they know what is concerning and is of importance to their listenership.

Also during our self produced programming (MUSIC LINES) we run several spots of PSA. material during these times.
