2. COMMUNITY CALENDAR AND PSA'S

SECTION A: NEWSCAST OVERVIEW AND QUARTERLY ISSUES ADDRESSED

WNCC-FM airs four local newscasts during its broadcast day, Monday through Friday at 7:03am, 8:03am, 12:02pm, and 5:02pm, following three to ten minutes of world and national news from ABC Radio News. WNCC reports local and area news events and issues on an ongoing basis.

News Treatments: The nominal length of each of our lead or feature news stories described below is between 30-seconds and one minute 30 seconds.

Some of the issues covered in these newscasts and programs during the **first** quarter are as follows:

1-Public Health

News Treatments: Jan 5, 10, : Feb 6, 20 : Mar 5, 21

Throughout the winter all across our listening area the flu continues to be a big issue in the news during the first quarter. Our newscasts informed the public on the spread of influenza at a local level, and provided ways that the community could slow the spread of the virus.

2-Employment

News Treatments: Jan 4, 11, 18 : Feb 20 : Mar 7, 22

The first quarter continued to experience changes in the unemployment rate in Macon, Jackson, and Swain Counties, with unemployment levels maintaining a lower level and employment opportunities becoming competitive. There were also additional jobs created and eliminated across the listening area. We connected listeners to job opportunities and employment resources during some of our newscasts.

3- Education / Schools

News Treatments: Jan 2, 11, 17, 18: Feb 14, 15 : Mar 12, 13

Throughout the first quarter, more funding on the new High School continued in Franklin. Additional facility improvements were also discussed. We kept the community informed about any and all potential changes that were made to the local schools as well as curriculum policy changes and other educational information.

4- Public Safety

News Treatments: Jan 5, 10, 18, 19, 23, : Feb 12, 20 : Mar 5, 26

Public Safety continued to be a concern in the first quarter with the event of construction around the region as well as some road hazards in the area. Throughout the first quarter, we kept citizens informed of road closures due to mass construction and torrential weather in addition to severe weather related power outages.

5-Critical Information to Citizens

News Treatments: Jan 2, 4, 17, 23: Feb 8, 9, 20, 27 : Mar 4, 12

Policies and regulations once again changed that affected the listening area in the first quarter on many issues. We provided critical information not necessarily obtained easily for our listeners. Some of the topics included a no panhandling ordinance and other government issues, transportation projects, and new or changing regulations. Issues mentioned during our news casts have an impact to Macon County and its residents, so it is paramount to connect our listeners with what they need to know.

6-Food Insecurity

News Treatments: Jan 10, 18, 23 : Feb 20

With the region struggling with a slow economy, high inflation costs, and children not able to receive lunch, food insecurity and homelessness continued to be an issue in the first quarter. We reminded residents about the need in the community to help spur donations to food banks Carenet and The Community Table. We also provided information about events and places residents could check with to get food, as well as the local school system's meal delivery plans.

7-Crime / Police

News Treatments: Jan 18, 19, 23, 30 : Feb 13, 27, Mar 15, 18

Crimes continued to plague the region through the first quarter, along with sentencing for earlier crimes. We kept the community informed of the crimes and sentencing throughout the entire first quarter.

SECTION B :WEB SITE

WNCC HAS ITS OWN WEB SITE. LISTENERS ARE ENCOURAGED TO VISIT 1041WNCC.COM TO SEE UPDATES ON WEATHER, AND MORE.
