In the 22nd Century, Inspector Beth Lestrade believes that New London’s “fool-proof” crime control process, called crypnosis, has been sabotaged by the criminal genius Professor James Moriarty... who has been dead for over a century! To prove her theory and catch the crook, Lestrade brings back to life the only man smart enough to have ever defeated Moriarty: Sherlock Holmes. Holmes tracks the villain, finally confronting him in the heart of the computer itself! Though the system gets back online, Moriarty manages to elude them. For now.

But Sherlock Holmes suspects there is an all too human reason behind this “supernatural” phenomenon. His sleuthing quickly dispatches the mythical beast for what it is: trickery created by Moriarty to vacate the moon of its tourists so that its powerful defense and life support systems would be his from which to rule the earth. Though Moriarty escapes, Holmes and Lestrade cleverly foil the evil plot and save the day, the moon, and the earth!

Or, as Watson suspects, is it the work of Forest Chapman, the proprietor of the spooky Mythological Museum where monstrous hybrid creatures are created and displayed to the delight of 22nd Century kids? Holmes looks past the obvious to discover that someone has mixed his own DNA with that of a python in order to commit the daring robberies. Holmes must then wrestle with the snake-man for his very life to win the day!

Though the two brothers stopped before unleashing it, Holmes now finds that Moriarty wants to use the invention to destroy New Scotland Yard's databanks and hold the world hostage. In order to get the antidote for the poison, Holmes gives Moriarty the cyber nest... but not before knowing that it is useless. All are saved and Watson helps Joseph's young son, John, learn that the true value of someone is what's in their heart.

Was it because the hotshot was cheating? Or, did an opponent merely want to take him out of the competition? While investigating, Watson discovers that Holmes is still alive and in disguise! While Lestrade and Watson look into a recent prison break, Holmes investigates and finds that their cases are connected, involving a convict breakout on a prison shuttle that occurred 25 years before in which Victor's father – a wrongly accused criminal – was forced to take part. Now, the mastermind behind that disastrous plot has broken out of prison, again, and is blackmailing Victor's father. It is up to Holmes to stop this man and put him back behind bars.

- **Health / Awareness** - FOX17 News @ 9 plans to produce and air a special feature story during the month of February focusing on the questions and controversy surrounding pre-cancer double-mastectomies. Partially due to family history and additional factors that more women are opting to have both breasts removed pre-diagnoses in order to prevent the spread of cancer and due to family history. The percentage of women electing to have the healthy breast removed has more than doubled in recent years. Many doctors say that removing both does not change the odds of the cancer from spreading. TORNADOES ARE NOTHING NEW TO TENNESSEE...

NATIONAL WEATHER SERVICE

THE NATIONAL WEATHER SERVICE SAYS A THOUSAND TWISTERS - KILLING MORE THAN 300 PEOPLE -- HAVE BEEN DOCUMENTED, STATE-WIDE, JUST SINCE 1950...

[31]

CG sdintv2 MARK ROSE
NATIONAL WEATHER SERVICE
METEOROLOGISTfile video 09-1479 - 0:01:18 - woman says: "devastation. it's a sad thing."
BUT WHILE TORNADOES ARE FAIRLY COMMON HERE - THEY RARELY REACH UNPRECEDENT NUMBERS OR STRENGTH...
(NATPOP - TORNADO FOOTAGE)

BUT WHAT IF AN EPIC TORNADO OUTBREAK WERE TO OCCUR? - A ONE IN ONE-THOUSAND-YEAR EVENT AS GRAND IN SCALE AND DEVASTATION AS LAST YEAR'S FLOOD?...

AS SOME WILL RECALL - SUCH AN EVENT MAY HAVE ALREADY OCCURRED... IN THE NOT TOO DISTANT PAST.

[2]0:02:56 - tom johnstone says: "many people, many experts would describe april 3, 1974 as a near-1,000 year event for torradores."

(CHANGE MUSIC BED)

(USE PHOTOS FROM 1974 TORNADO OUTBREAK)

THAT DAY ... TORNADOES BROKE OUT ACROSS THE NATIONS HEARTLAND... WITH AN INTESITY AND FREQUENCY NEVER BEFORE SEEN IN THE U.S.

148 TORNADOES SWEEP ACROSS THIRTEEN U.S STATES...
INCLUDING TENNESSEE

(cover first half of bite w/video) 0:04:40 - tom johnstone says: "the thing that stands out in my mind about that outbreak was just the sheer numbers of long-track, strong to violent tornadoes - that's what really made that outbreak so memorable and deadly."

NINETEEN COUNTIES IN MIDDLE AND EASTERN TENNESSEE WERE PUMMELED BY 28 TORNADOES... FOUR OF THEM REACHING THE RARE F-4 CATEGORY STRENGTH.

50 TENNESSEANS DIED... 635 WERE INJURED... AND 30-MILLION DOLLARS DAMAGE OCCURRED.

(NATPOP - TORNADO FOOTAGE)

(CHANGE MUSIC BED)

WERE A SIMILAR OUTBREAK TO HAPPEN TODAY... THE SETUP WOULD BE MUCH THE SAME AS IN 1974... LIKELY OCCURRING IN LATE MARCH OR EARLY APRIL...

[3]0:26:35 - mark rose says: "cold front to the west... warm front to the north - plenty of heat, plenty of moisture, nice strong southerly wind."

(COVER SECOND HALF OF BITE WITH VIDEO) 0:05:31 - tom johnstone says: "there are multiple waves of severe weather. there could be an outbreak of severe weather in the morning, and then another outbreak in the afternoon."

ONLY THIS TIME... THE DAMAGE - THE LOSS OF LIFE - WOULD BE FAR WORSE...

(COVER BITE WITH VIDEO) 0:05:44 - tom johnstone says: "one thing that would make the april 3, 1974 outbreak worse today is that the population of tennessee has grown so much."

0:05:58 - tom johnstone says: "in all likelihood, were that same outbreak to happen today, the death toll would actually probably be higher... even with more advanced warnings and technology."

AROUND 4-MILLION PEOPLE LIVED IN TENNESSEE IN 1974...

TODAY - THAT NUMBER IS OVER SIX-MILLION - A 50 PERCENT POPULATION INCREASE...

AND WITH THE GREATER URBAN SPRAWL, THE ODDS OF A SIMILAR OUTBREAK CAUSING MASSIVE DAMAGE AND DEATH WOULD BE MULTIPLIED.

(NATPOP - TORNADO FOOTAGE)

(CHANGE MUSIC BED)

IT'S BEEN 37 YEARS SINCE THE SUPER-TORNADO-OUTBREAK OF
APRIL 3RD, 1974...

AND WHILE THE ODDS OF IT HAPPENING AGAIN, SOON, ARE
REMOTE... THAT'S NOT TO SAY IT WON'T HAPPEN AT ALL...

(COVER LAST HALF OF BITE WITH VIDEO) 0:07:06 - tom johnstone
says: "certainly, something will happen again - it's just a matter of when.
and i think with any given year, we go into a year with around a one
percent chance of something like what happened on april, 3 1974
happening again."

TORNADO SAFETY TIPS:

(flint will walk out)

In a house with a basement: Avoid windows. Get in the basement and under some kind of sturdy protection or cover yourself with a mattress or sleeping bag.

In a house with no basement, a dorm, or an apartment: Avoid windows. Go to the lowest floor, small center room under a stairwell, or in an interior hallway with no windows. Crouch as low as possible to the floor, facing down; and cover your head with your hands.

In a mobile home: Get out! Even if your home is tied down, you are probably safer outside, even if the only alternative is to seek shelter out in the open. Most tornadoes can destroy even tied-down mobile homes; and it is best not to play the low odds that yours will make it.

In a car or truck: Vehicles are extremely dangerous in a tornado. If the tornado is visible, far away, and the traffic is light, you may be able to drive out of its path by moving at right angles to the tornado. Otherwise, park the car as quickly and safely as possible -- out of the traffic lanes. Get out and seek shelter in a sturdy building. If in the open country, run to low ground away from any cars.

In the open outdoors: If possible, seek shelter in a sturdy building. If not, lie flat and face-down on low ground, protecting the back of your head with your arms. Get as far away from trees and cars as you can; they may be blown onto you in a tornado.
