Program Host: Rob West is the president of Kingdom Advisers and Associates who specializes in offering biblical wise advice to clients.

Guest: Jerry Boyer is an Economist and the President of Boyer Research.

Program Substance: With the current economy problems, there is a strong possibility of an upcoming debt crisis due to the economy collapse, hyper-inflation, and other money problems. This debt crisis is now a concern and should not be dismissed or waved away. The Congressional Budget Office (CBO) added another 1.3 trillion dollars to the national debt to cover the next 10 years will be a two trillion dollar deficit per year. Your personal debt consists of your bills and credit card charges, while your deficit is your monthly short fall. With the government's current mishandling of the United States finances there will undoubtedly be a debt crisis at a later date. Also, the CBO did not forecast a recession this year as recessions always increase debt rapidly because there is more social spending and less tax revenue.

Program Substance – Campfires cause about 33% of fires but a lot of fires are caused by burning of household items instead of taking items to the dump. All household items should be recycled - not burned as such burnings may include plastics that will release toxins in the air, ground, and water. When you need to burn, keep it small not tall as you are personally responsible for the cost of the firefighters putting out a fire that you let get out of control.
