| 1:50 | SEGMENT 1: COVID AND CHOIRS | |
| | 11:47 | |

Synopsis: Scientists have discovered that singing is an exceptionally effective way to spread viruses through the aerosolized particles it expels, which may travel much farther than the six foot safety zone many people follow. Synopsis: It's illegal for health insurers to use genetic testing to discriminate against policyholders. However, life insurers can and do discriminate on that basis if the test is in your medical file. Private testing lets patients know their risk for many diseases without landing in health files.
