aaa indicates announcement is on locked log -> indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlinked logs:
Both parts of bookends and piggy backs are combined.
Only the first member of a rotation group is shown. The may differ from what eventually is aired.
In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AIR.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

aaa Indicates announcement is on locked log -> Indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlinked logs:
Both parts of bookends and diggy backs are combined.
Only the first member of a rotation group is shown, this may differ from what eventually is aired.
In the case of locked logs both parts of bookends and diggybacks are shown, each with their own AIR.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
Only the first member of a rotation group is shown. The may differ from what eventually is aired.
In the case of locked logs both parts of bookends and disspots are shown, each with their own AIR.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

aaa indicates announcement is on locked log -> indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
Both parts of bookends and plug-in backs are combined.
Only the first member of a rotation group is shown. This may differ from what eventually is aired.
In the case of locked logs both parts of bookends and plug-in backs are shown, each with their own AIR.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

aaa Indicates announcement is on locked log -> indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
Both parts of bookends and plugy backs are combined.
Only the first member of a rotation group is shown. (This only differs from what eventually is aired.
In the case of locked logs both parts of bookends and plugybacks are shown, each with their own ADL.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

aaa indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both sides of bookends and program heads are combined. This may differ from what eventually is aired. In the case of locked logs both parts of bookends and program heads are shown, each with their own AIRC.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AIRC.

aaa Indicates announcement is on holded log. * Indicates announcement on unhelded log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unhelded log:
Both parts of bookends and piggy back are combined.
Only the first member of a rotation group is shown, this may differ from what eventually is aired.
In the case of bookend logs both parts of bookends and piggybacks are shown, each with their own AUL.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AUL

aaa Indicates announcement is on locked log. -> indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
Both parts of linebreaks and print breaks are combined.
Only the first member of a station group is shown. Other members of the group are indicated by a plus sign (+) in the first member of a station group.
In the case of locked logs both parts of linebreaks and printbreaks are shown, each with their own AUC.
The counts for each group indicate the number of spots where it was possible to establish an estimation AUC.

aaa indicates announcement is on exact log. -3- indicates announcement on unlinked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlinked logs:
Both parts of bookend and play back are combined.
Only the first member of a rotation group is shown. The may differ from what eventually is aired.
In the case of linked logs both parts of bookend and play back are shown, each with their own AIR.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

aaa Indicates announcement is on locked log -z- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
Only the first instance of a commercial break is shown. Breaks and program breaks are continued.
In the case of locked logs both parts of breaks and program breaks are shown, each with their own AUR.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

aaa indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unbooked logs:
Only the first member of a rotation group is shown. This may differ from what eventually is aired.
In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AIR.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

aaa indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of locked logs:

Both parts of program and program back are confirmed.
Only the first member of a rotation group is shown. This may differ from what eventually is aired.
In the case of locked logs both parts of bookends and program back are shown, each with their own AIRC.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AIRC.
