aaa indicates announcement is on locked log -> indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
Only parts of bookends and jogs are combined.
Only one number of a rotation group is shown, this may differ from what eventually is aired.
In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined.

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AIR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
On the case of lookends and diggy backs are combined.
On the case of number of a rotation group is shown, this may differ from what eventually is aired.
In the case of locked logs both parts of lookends and diggybacks are shown, each with their own AIR.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

Sort Order 1	Broadcast Date
Sort Order 2	Air Time
Sort Order 3	<None>
Show Details	Yes
Display Estimated Value	Rate Card
Display Program Revenue Summary	Do Not Display Estimated Value
Include \$0 orders in AUR	No
Media Description	Default (Media Description) with Contract Details

When pulling both \$0 spots and announcements, an announcement on a contract with a \$0 rate will show as a \$0 spot and not as an announcement. The same spot, however, will show as an announcement on an announcement only report, and as a \$0 spot on a \$0 spot only report.

The AUR's are rounded to the nearest \$, consequently the sum of the individual AUR's in a group may not exactly match the group's AUR.

DO NOT USE THIS REPORT TO EXAMINE PROJECTED COPY ON UNLOCKED LOGS - use the Copy - Projected Rotation Report - as the Media Announcement Report's copy assignments are not guaranteed until logs are locked.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined.

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AIR#.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR#

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined.

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AIR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined. Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AIR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined.

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AIR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

aaa indicates announcement is on locked log -> indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
Both parts of bookends and piggy backs are combined.
Only the first member of a rotation group is shown, this may differ from what eventually is aired.
In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AIR.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

In the case of unlocked logs:
Both parts of bookends and piggy backs are combined;
Only the first member of a rotation group is shown, this may differ from what eventually is aired.
In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR.

In the case of unlocked logs:
Both parts of bookends and piggy backs are combined.
Only the first member of a rotation group is shown, this may differ from what eventually is aired.
In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUC.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AUC.

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.
