Issue	Program	Date	Time	Duration	Description of Program
Weather	Local News Break	10/8/18	8:30am, 11:00am, 2:00pm, 5:00pm, 11:00pm	2.20min	8:30am & 11:00am: Michael is now a hurricane and it's expected to continue to strengthen. The risk of storm surge, heavy rainfall and dangerous winds are increasing for the northeastern Gulf Coast. Florida Gov. Rick Scott already issued a state of emergency for 26 counties. That'll rush preparations in the Panhandle and Big Bend areas. 500 members of the Florida National Guard have been activated. And in Tallahassee electrical crews are being moved into standby position with extra staffing available. Sandbag locations are open around the city. A Hurricane Watch is in effect for the Alabama/Florida border to the Suwannee River in Florida. A Tropical Storm watch is in effect from the Suwannee River to Anna Maria Island, including Tampa Bay. As well as from the Alabama/Florida Border to the Alabama/Klosisispi border. These watches mean those conditions are possible within 48 hours. The latest advisory has Michael about 50 miles south of the western tip of Cuba or about 140 miles east northeast of Cozumel, Mexico. It's moving north at 7 miles per hour with max sustained winds of 75 miles per hour. Michael is expected to bring four to eight inches of rain to the Florida Panhandle and Big Bend into the Carolinas with some areas see as much as 12 inches. All this rain could lead to flash floods. There is still time prepare so please consider these tips; create a family communication plan and an evacuation plan including where to meet in different situations. Restock or make an emergency kit that can last three days. Grab disaster supplies for during and after the storm. Determine your risk and of course stay informed. We will be following this storm as it continues to get closer. 2:00pm: The latest advisory has Michael about 20 miles south of the western tip of Cuba or about 145 miles east northeast of Cozumel, Mexico. Its moving north at 7 miles per hour. Mandatory Evacuation Orders for portions of: Gulf County, Wakulla County, and Bay County. 5:00pm: The latest advisory has Michael about 20 miles south of the wester

Weather	Local News Break	10/9/18	2:00am, 5:40am, 8:00am, 10:00am, 12:00pm, 2:00pm, 4:50pm, 6:40pm, 9:00pm,	2.00min	2:00am: Residents along the Gulf Coast in the Hurricane warning area are going to need to get last preparations together as Hurricane Michael gets closer to shore. Wind speeds will increase to tropical storm force by this evening in the hurricane warning area and will continue to increase - making further preparation impossible. The latest from the National Hurricane Center has Michael 390 miles south of Apalachicola, Florida with sustained winds at 90 mph. A Hurricane Warning is in place from the Alabama-Florida border to the Suwannee River in Florida, while a Hurricane Watch is in effect from the Alabama-Florida border to the Mississippi- Alabama border. Tropical Storm Watches are in effect as far west as the Pearl River and as far east as the Tampa Bay area. Some mandatory evacuation orders are already in place, and there are likely more to come. Please be sure to heed the advice of your local authorities. Both Alabama Gov. Kay Ivey and Florida Gov. Rick Scott have issued a State of Emergency for the potentially affected counties in their respective states. Michael is moving north at 12 mph but is expected to pick up some speed through Today. It's also expected to turn a little northeastward, so the forecast track now is either over the Florida Panhandle or the Florida Big Bend area Wednesday. Of course, this could change, so please keep on top of the latest forecasts as Michael heads our
					turn a little northeastward, so the forecast track now is either over the Florida Panhandle or the Florida Big Bend area Wednesday. Of course, this could change, so please

	while Michael hits the coast. And in Alabama, the entire
	state is under an emergency declaration. Alabama
	Governor Ivey said she fears widespread power outages
	and other problems would follow. Tallahassee Mayor's
	urging residents to finish up emergency preparations
	quickly. Local authorities fear power outages and major
	tree damage from Hurricane Michael. 8:00am: It's about
	360 miles south of Panama City with maximum
	sustained winds of 110 miles per hour. The American
	and European models have Hurricane Michael making
	landfall just east of Panama City and only miles apart
	from each other. Georgia Governor Nathan Deal has
	declared a state of emergency in 92 counties that will
	last for seven days. Governor Deal says, "the state is
	mobilizing all available resources to ensure public safety
	ahead of Hurricane Michael." 10:00am: Pensacola
	International Airport, Destin-Fort Walton Beach Airport
	and the Tallahassee airport are closing at midnight.
	Some arriving and departing flights are cancelled so
	please check with your airline before heading to the
	airport. The military Coast Guard Station Yankeetown,
	Florida, is preparing ahead of Hurricane Michael. Storm
	shutters are being lowered and sandbags placed in front
	of doors. At Tyndall Air Force Base, aircraft is being
	moved to Ohio and other locations around the country.
	12:00pm: Tyndall Air Force Base has evacuated all
	personnel, airmen and civilians had until three this
	afternoon to clear out and are allowed to use their
	government-issued credit cards for any expenses they
	have during the mandatory evacuation so long as they
	stay within five-hundred miles of the base. The three-
	hundred and twenty fifth fighter wing has also relocated
	aircraft to Wright-Patt in Ohio. Eglin is also relocating its
	Lightning IIs to Barksdale. Eglin is also shutting down
	most of its on base facilities. Hurlburt Field, home of the
	Air Force's special tactics airmen will also shut down at
	six this evening, all essential and non-essential personnel
	are dismissed until further notice. Wing Commanders
	will assess when operations can continue. The First
	Special Operations Wing however is on standby, they
	may or may not be called upon to assist with rescue
	operations and aeromedical evacuation. The Coast
	Guard is also making preparations and has declared
	Status Yankee for the Eastern Gulf of Mexico for the
	ports of Panama City, Pensacola, Mobile, Pascagoula and
	Gulfport. Those ports are now closed to all inbound and
	outbound traffic. They also encourage all mariners to
	insure their vessels are securely moored. Pensacola
	International, Destin-Fort Walton Beach, and
	Tallahassee airports will all be closed by midnight
	tonight. Flight cancellations and delays are already
	underway, so if you do have a flight please check with
	your airline to find out more information. 2:00pm:
	your annue to find out more information. 2.00pm.

	Hurricane Michael looks massive from space and has strengthened to a major hurricane and is a category 3 now. Maximum sustained winds are at 120 miles an hour. And the President authorized Homeland Security and FEMA to coordinate relief efforts. Comcast has also opened more than 8,000 WiFi hotspots throughout the Panhandle for free. This covers everyone, not just customers. 4:50pm: Schools are closed in Florida and the department of transportation has standby generators in case traffic signals go out. If there's any good newsMichael is a fast moving storm and forecasts say it should be headed back out to sea by Friday. 6:40pm: Hurricane Michael is now less than 260 miles south of Panama City and looks very impressive from space. It has strengthened to a category 3 storm. Maximum sustained winds are at 120 miles an hour. Government officials want you to know that public safety personnel will not risk lives to respond to emergency calls in mandatory evacuation areas during the storm. Power outages are also expected and could extend into parts of southern Georgia and far southeastern Alabama with Michael's speedy movement. 9:00pm: The latest from the National Hurricane Center has Michael 220 miles south of Panama City with sustained winds at 125 mph, with higher gusts, which is a strong Category 3 storm. Michael may become a Category 4 storm before making landfall Wednesday afternoon. Its moving north at 12 mph.
--	--

Weather	Local News	10/10/18	12:00am,	3.05min	12:00am: The latest from the National Hurricane Center
weather	Break	10/10/10	3:45am,	5.0511111	has Michael 180 miles south of Panama City with
	DICOR		5:45am,		sustained winds at 130 mph, with higher gusts, making it
			8:00am,		a Category 4 storm. It's moving north at 12 mph.
			10:00am,		Hurricane warnings are posted from the Alabama Florida
			11:50am,		border over to Tallahassee. It also extends inland to
			2:10pm,		southwestern Georgia including Albany. Four to eight
			4:25pm,		inches of rain, and possibly up to a foot in isolated areas,
			6:30pm,		are forecast from the Florida Panhandle and Big Bend
			9:00pm		into Southeastern Alabama and Southwestern and
			5.00pm		middle Georgia. Extremely dangerous storm surge is
					expected - 9 to 13 feet around St. Marks and 2 to 9 feet
					in other areas between Pensacola and Tampa. Michael
					should make landfall midday just east of Panama City.
					After landfall the storm is expected to accelerate across
					the southeastern part of the country, through Georgia
					and exiting the Carolinas late Thursday or early Friday.
					Rain is expected in the mid-Atlantic and southeastern
					New England Thursday night and Friday. Bands of rain
					from Michael are making landfall already. Forecasters
					say a few tornadoes are possible as these rain bands
					come ashore. Mandatory evacuations have been
					ordered in several Florida counties in the Florida
					panhandle. We understand some have not heeded
					evacuation orders. Officials want you to know that
					public safety personnel will not risk lives to respond to
					emergency calls in mandatory evacuation areas during
					the storm. Power outages are also expected could
					extend into parts of southern Georgia and far
					southeastern Alabama with Michael's speedy
					movement. Many public schools are closed on the
					Florida panhandle, including Florida State and Florida
					A&M universities. Commercial airports have also closed.
					Comcast has also opened more than 8,000 Wi-Fi
					hotspots throughout the Panhandle for free, to help you
					keep in touch with loved ones should you lose power or
					cell service. This covers everyone, not just Comcast
					customers. Experts say Michael could be the
					Panhandle's worst storm ever. Please be safe. 3:45am:
					The National Weather Service says warnings are in effect
					for more than 300 miles of coastline. About 375,000 of
					us are under mandatory or voluntary evacuation orders
					in 18 Florida counties. Florida Governor Rick Scott is
					calling Michael a "monstrous storm, unlike anything seen in the Florida Panhandle in decades. He's declared
					a state of emergency in 35 Florida counties. The
					president has approved an emergency declaration for
					the state, releasing federal resources and aid. 5:45am:
					Georgia has declared a state of emergency in at least 90
					counties. In Alabama, like in Florida, massive power
					outages, high winds and heavy rain are possible. The
					Carolinas will likely see heavy rainfall, and could cause
					flooding in areas already damages by last month's
					nooung in areas an easy damages by last month s

Hurricane Florence. Also, southern Virginia could get up to 8 inches of rain, which could cause life-threatening flash flooding. 8:00am: Almost a half a million of us are under mandatory or voluntary evacuation orders in 18 counties. Governor Rick Scott says it's officially unsafe to travel across the Panhandle. He advises staying in your home especially if you live on the coast. There are 54 shelters open across the Panhandle. There's a list of shelters at www.floridadisaster.org. Something to be aware of if you stayed behind and are riding out Hurricane Michael-Bay County officials say it's now too dangerous for them to respond to calls. You're to "shelter in place" and stay off the roads. Panama City Fire Department will still respond to life-threatening emergencies within the city limits. Something else to be aware of-the possibility of tornadoes. The National Weather Service has issued a tornado watch for the right front area of Hurricane Michael until 5'o'clock eastern. Coastal flooding has already started in Florida's Gulf County. Storm surge has already started to cross over Highway 98 in Franklin County-stay off the roads if you're in the area. In Tallahassee, water is already past the boat ramp in

In Tallahassee, water is already past the boat ramp in Panacea. The Pentagon says there at least 700,000 military personnel, family members and Department of Defense civilians living in the path of Hurricane Michael from the Florida Panhandle to North Carolina. Amtrak is adjusting its train service to Florida to keep passengers and employees safe because of Hurricane Michael. Amtrak says no charge if you have to change your reservation.

We are praying for you, your families and first responders-for God's protection, peace, wisdom and even for the storm to change course and head out to sea. If you need to talk to a pastor, please call 1-800-525-5683. 10:00am: The eyewall of Hurricane Michael is coming ashore along the coast of the Florida Panhandle. Michael is about 20 miles south of Panama City. It has maximum sustained winds of 150 miles per hour and is moving north northeast at fourteen miles per hour. With the eye landfall imminent, everyone in the area is asked not to go out into the relative calm. Hazardous winds will increase very quickly as the eye passes. And right now life-threatening storm surge is happening along portions of the Florida Panhandle, Big Bend and Nature Coast. The worst of it is expected later today between Tyndall Air Force Base and Keaton Beach. They could see nine to fourteen feet of surge. The Panhandle, Big Bend, southeast Alabama, and portions of southwest and central Georgia could see 4 to 8 inches of rain, with some areas getting 12 inches. The rest of Georgia, the Carolinas, and southern Virginia could get 3 to 6 inches, with some areas getting 8 inches. This rainfall could lead

are in effect for 322 counties, including 35 Fiorida counties, JDB Georgia counties, 66 North Carolina 11:50am: Hurricane Michael has made landfall as a Category Four hurricane are Mexico Beach. It hit with winds clocked at one-hundred-flftp-flwe miles per hour. Michael is now one of the most powerful storms to hit the U.S. mainland in terms of wind-strength. The last record of a Category four hurting the panhandle was back in 1851, which makes this relatively new territory for everyone in the area. Tyndial Are Force Base, which was in Michael's path, previously issued an evacuation order for all non-essential and civilian personal. The base is now at HUR-CON One status which means you should remain sheltered in place until further notice. About six- hundred military families have been affected by those orders and only a skeleton crew is still to base. Anotter four-thousand National Guardsmen have been given standby orders and about seventeen-thousain dutility restoration workers have been placed neilly new torks in Michael's path earlier this aftermonn. He went on to say that a this point, for those who either couldn't or wouldn't evacuate, it's too late to do anything but endure Michael's wath. The president is monitoring the situation and hasn't said if he intends to cancel a rally he had schedula fired this genging in Remanylavian which people have rading 124 milling up for. Before Michael made landfall the president declared a state of emergency and unlocked feeral assistance by way of FEMA. 2::10pm: Hurricane Michael is now a Category 3 with winds reaching 125 and is moving faster now at 15 milles an hour. The storm is located near the Florida, Georgia, Alabama lines. It's moving Mortheast and will still be a hour. The storm is located near the Florida, Georgia, Alabama lines. It's moving Mortheast and will still be a hour. The storm is located near the Florida, Georgia, Category 20000 on the Guif Coast did not evacuate. There are 6,000 people in 80 shelters in 5 states. That includes 1,200000 of us. Mass	
counties, 108 Georgia counties, 66 North Carolina, counties and all of Alabama and South Carolina, 11:50am: Hurricane Michael has made landfall as a Category Four hurricane near Mexico Beach. It hill with winds clocked at one-hundred-fitty-five miles per hour. Michael is now one of the most powerful storms to hit the U.S. mainland in terms of wind-strength. The last record of a Category four hitting the panhanle was back in 1851, which makes this relatively new territory for everyone in the area. Tyndall Air Force Base, which was in Michael's path, previously issued an exacution order for all non-essential and civilian personnel. The base is now at HUR-CON one status which means you should remain shettered in place until further notice. About six- hundred military families have been placed by those orders and only a skeleton rew is still on base. Another four-thousand National Guardsmen have been given standby orders and about seventeen-thousand utility restoration workers have been placed on call. President Turup publicly asked God to keep watch over those in Michael's path earlier this afternoon. He went on to say that at this point, for those whe either couldn't or wouldn't evacuate, it's tool are to do anything but endure Michael's watch. The president is monitoring the situation and hans't sail if he intends to cancel a ruly he had scheduled for this evening in Penneylvania which people had aready beguin lining up for. Before Michael made landfall the president declared a state of emergency and unlocked feeral assistance by way of FEMA. 2:10pm: Hurricane Michael is now a Category 3 with winds reaching 125 and is moving faster now at 16 miles an hour. The power is out for 200,000 of us. Massive flooding has already hit Panama City Beach, Mexico Beach and Shell Point Beach. 4:25pm: Right now Michael has been downgraded to a category 2 storm with	
people had already begun lining up for. Before Michael made landfall the president declared a state of emergency and unlocked federal assistance by way of FEMA. 2:10pm: Hurricane Michael is now a Category 3 with winds reaching 125 and is moving faster now at 16 miles an hour. The storm is located near the Florida, Georgia, Alabama lines. It's moving Northeast and will still be a hurricane when it hits Georgia. There are tornado watches for a large portion of Florida and then south and central Georgia until 2am tomorrow. Hurricanes moving in from the Gulf Coast can produce 100 tornadoes over a couple days. There are curfews for coastal counties, including Walton, Gulf, Franklin and Bay counties. The Red Cross says 320,000 on the Gulf Coast did not evacuate. There are 6,000 people in 80 shelters in 5 states. That includes 1,200 still in shelters since Hurricane Florence. Our ministry partner Convoy of Hope is on the way to areas affected and is coordinating relief. We're seeing images of storm surge pushing into homes and businesses. The power is out for 200,000 of us. Massive flooding has already hit Panama City Beach, Mexico Beach and Shell Point Beach. 4:25pm: Right now Michael has been downgraded to a category 2 storm with

flooding has already hit Panama City Beach, Mexico Beach and Shell Point Beach. 4:25pm: Right now Michael has been downgraded to a category 2 storm with	
Beach and Shell Point Beach. 4:25pm: Right now Michael has been downgraded to a category 2 storm with	businesses. The power is out for 200,000 of us. Massive
has been downgraded to a category 2 storm with	flooding has already hit Panama City Beach, Mexico
	Beach and Shell Point Beach. 4:25pm: Right now Michael
	has been downgraded to a category 2 storm with
maximum sustained winds of 100 miles per nour. It is	maximum sustained winds of 100 miles per hour. It is

moving at 13 miles per hour. It has passed through
Florida and is nearing Albany, Georgia. 6:30pm: it has
been downgraded to a category 1 storm with maximum
sustained winds 90 miles per hour. It is moving at 17
miles per hour, so it has picked up speed. Michael is
impacting Georgia right now, still near Albany. Florida
governor Rick Scott says search and rescue is top priority
and he's urging us to stay off the roads and leave them
open to first responders. Flash flooding and tornadoes
are still possible. Tornado touchdowns were reported in
Georgia's mid-state area. One possibly damaging 5
homes near Roberta. Others reported in Perry and Fort
Valley. From Florida to Alabama and Georgia nearly half
a million homes and businesses are without power.
Governor Scott said at least two tornadoes have
touched down in Florida. One person lost their life in this
storm from a fallen tree. Curfews have been put in place
along Florida's coast. 6,000 people are housed in 80
shelters across 5 states. That includes 1,200 that have
been in a shelter since hurricane Florence. We're also
seeing the potentially dangerous storm surge pushing
into homes and businesses. Panama City had the most
extensive damage so far; broken trees, uprooted trees,
homes blown off their foundation and houses just being
split open from fallen trees. Those of us in Alabama are
also being told to stay off the streets. Trees are down,
blocking some roads, others are flooded and blocked.
The emergency management agency tweeted it's not
safe to be on the road at this time. Very heavy rain is
expected to continue for parts of Georgia tonight.
Tropical storm conditions will spread across Georgia and
the Carolinas through Thursday. Louisiana is sending
dozens of emergency personnel along with boats,
ambulances and other equipment to Florida to help with
the search and rescue operations.

Weather	Local News	10/11/18	12:20am,	2.40min	12:20am & 2:20am: The latest from the National
weather	Break	10/11/10	2:20am,	2.4011111	Hurricane Center has Michael 25 miles east of Macon,
	DIEak		4:45am,		Georgia. The storm is packing 60 mph winds, so it's now
			7:00am,		a tropical storm, weakening as it moves across Georgia.
			9:00am,		It's moving NE at 20 mph, so its movement is picking up
			11:30am,		speed as it makes its way to the Carolinas. After coming
			2:40pm,		ashore Wednesday afternoon as a Category 4 storm with
			5:40pm,		winds of 150 mph, Michael is losing steam, but will
			9:00pm,		remain at least tropical storm strength as it moves
					across the Southeast and into the Atlantic early Friday.
					Heavy rain, winds and the threat of spinoff tornadoes
					still exists. We know of one confirmed death from the
					storm, and there's extensive damage across the Florida
					Panhandle, particularly in Panama City and Apalachicola.
					Waves swamped streets and docks and powerful winds
					splintered trees and rooftops, downed power lines and
					more. Hundreds of thousands are without power in
					Alabama, Georgia and Florida. Forecasters say Michael's
					damaging wind and rain will continue into the Carolinas,
					which is still recovering from Hurricane Florence's
					flooding. Surge watches are in effect for areas of North
					Carolina today, over the same areas where Florence
					created issues in September. Michael is the most
					powerful hurricane on record to hit Florida's Panhandle.
					It's the third-largest storm to ever make landfall in the
					continental US. Please be safe as morning arrives. It will
					remain dangerous outside, even where Michael has
					passed. Downed trees and power lines and flooded
					roads will make travel hazardous. And as mentioned, a
					threat of tornadoes remains in effect, with several
					tornado warnings in place in South Carolina as we speak.
					A bit of good news is that storm flooding is gradually
					decreasing along the Gulf Coast. Our ministry partner
					Convoy of Hope is on the way to areas that are being
					affected by Michael and is coordinating relief efforts.
					FEMA is also on the ground working with state and local
					authorities to help those in need. 4:45am: Hurricane
					Michael's been downgraded to a tropical storm, with
					maximum sustained winds of 50 miles per hour. Right
					now, the storm's moving over Georgia and South
					Carolina at around 21 miles per hour, but continues to weaken as it moves into the Carolinas and the eastern
					portion of Virginia. Sadly, at least 2 people have lost
					their lives. Search and rescue efforts underway,
					including the Cajun Navy, looking for people trapped or
					injured in the storm debris. In Panama City, lots of
					destruction including uprooted trees, damaged homes
					and twisted street signs. Right now, more than 380,000
					still without power. Flooding is a big issue. Down in
					Mexico Beach, Florida, Michael shattered homes, leaving
					floating piles of lumber. The water so high, only the roof
					tops can been seen. The National Hurricane Center says
					storm surge warning has been discontinued for the Gulf

Coast of Florida and tropical storm warning are no longer in effect along the Georgia and Florida coast, and south of Altamaha Sound. A storm surge watch is in effect though, for Ocracoke Inlet North Carolina to Duck North Carolina. A tropical storm warning is in effect for Altamaha Sound Georgia, to Duck North Carolina, and Pamlico and Albemarle Sounds. Rainfall is still an issue. Up to 9 inches of rain are possible in North Carolina and Virginia. Rainfall could lead to life-threatening flash floods. Swells expected to affect the eastern, northern and western Gulf of Mexico this morning and tornadoes are possible today over parts of eastern South Carolina, eastern and central North Carolina and southeast Virginia. 7:00am: Nearly 340,000 people are still without power in Florida. Power could be out for weeks in some areas. And flooding is a big problem in Mexico Beach. There is floating lumber and only the roofs of homes can be seen. The Talmadge Bridge on 17 over the Savannah River between Savannah, Georgia and South Carolina remains closed. Some other South Carolina. The storm is expected to move out into the Atlantic Ocean by late Thursday or early Friday. No warnings or watches have changed since our last update. Search and rescue teams are out looking for people who rode out the storm. The Army Corps of Engineers is sending in generators to help get power to storm-ravaged areas, and teams to start clearing debris and begin building temporary roofs. 9:00am: FEMA administrator Brock Long is calling Mexico Beach, Florida 'ground zero' with damage as far as the eye can see unfortunately. Flooding is still a big problem in the area as well. There are more than 350,000 power outages between South Carolina and Georgia. Some 250,000 outages have been reported between Gulf Power, City of Tallahassee and Duke Energy in Florida. Michael's expected to move out into the Atlantic Ocean by late tonight or early tomorrow morning. All the warnings or watches are the same since our last update. Please know that God's word s
the Atlantic Ocean by late tonight or early tomorrow morning. All the warnings or watches are the same since our last update. Please know that God's word says "do
your God. I will strengthen you and help you; I will uphold you with my righteous right hand." 11:30am: An
update on Tropical Storm Michaelit's moving a bit faster now at 23 miles an hour. A lot of the damage is caused by the winds which are blowing at 50 miles an
hour. It's knocking down trees and power lines.
Electricity is out for almost a million of us. And some cell
towers are down, making it hard to check on relatives and friends. The Army Corps of Engineers has deployed a
team to help get the power back on and bring in
generators. There's still a risk of tornadoes developing in

North Carolina and Virginia. Virginia's governor has
declared a state of emergency in anticipation of
flooding, tornadoes and power outages. At the same
time, North Carolina's governor is asking residents to
stay alert, even though this storm isn't as severe as
Florence. Cooper says it adds unwelcomed insult to
injury. Rainfall amounts will vary in the Carolinas and
Virginia. It could be up to 9 inches in isolated areas in
southeastern Virginia. Flash floods are more likely in that
area and stretching south through central North
Carolina. The Coast Guard is already assessing the
damage and starting to fix some facilities. They flew over
Panama City Beach and witnessed buildings completely
destroyed and neighborhood homes with extensive
storm damage or roofs missing completely. 2:40pm &
5:40pm: Tropical Storm Michael is rapidly moving
through North Carolina at this point. Making landfall
yesterday afternoon as a Category Four hurricane as the
fourth most intense storm to hit the US mainland on
record. As of about an hour ago, North Carolina's
Department of Public Safety reported Michael has
already caused almost four-hundred thousand power-
outages. Duke Energy says that number could potentially
grow to as much as half a million power outages across
the Carolinas. Georgia is reporting about 350,000 homes
and businesses are without power currently. The final
current count for those without power across the whole
of the South however is already almost a million
customers. Restoring power could take crews several
days. As you'd imagine weather watchers are expecting
an increase in rainfall. Areas from Norfolk to Roanoak
could get between one to three inches, but once you get
closer to Richmond the numbers get closer to between
three and twelve inches of additional rain depending on
where you are. New England can also expect between
one and three inches of rain as well. Tropical Storm
warnings are in effect in South Carolina from Myrtle
Beach to Greenville, in North Carolina from out past
Charlotte to New Bern and Hatteras. Those warnings are
also in effect for Raleigh-Durham. There is also a flash-
flood emergency the National Weather Service issued
for Roanoak County in Virginia, including the city of
Roanoak. Swift-water rescues are already underway.
Rescues are also underway in Florida, FEMA says, and
Florida Highway Patrol has shut down an 80-mile stretch
of I-10 so crews can clear debris from the road. That
closure runs from Tallahassee to Lake Seminole.
Additionally, Tyndall Airforce Base's command reports
the base has suffered extensive damage but were able
to follow that up with the news that no injuries were
reported. Command had ordered an evacuation of base
personnel ahead of the storm and they say on their
Facebook page that evacuees should plan on being away
racesoon page that evacaces should plan on being away

					for an outondod paried of time Michaella material and
					for an extended period of time. Michael's projected path takes it through Raleigh this evening and into Norfolk. Once we get into tomorrow morning it should be headed out into the Atlantic and pick up a fair bit of speed but stay headed away from the US mainland. 9:00pm: The latest from the National Hurricane Center has Michael 15 miles NE of Norfolk, VA. The storm winds are at 50 mph, moving NE at 25 mph. Michael is just about to move off the Virginia coast, and once again over water, it's expected to intensify as a sub-tropical system. As Michael moves to sea, the northern Mid- Atlantic and Southern New England get in on the rain, but only in the 1-3-inch range. Estimates of \$8 billion in insured losses to property is expected. This is only insured losses. There will be billions more in un- uninsured losses. Hundreds of thousands remain without power, and cellphone service is limited in much of the Southeast. Windy conditions will continue through Friday for Virginia and the southern Mid- Atlantic, so damage from winds and rain will continue as Michael moves into the Atlantic. In Florida, thousands of National Guard troops, law enforcement officers and medical teams are working their way into damaged communities. In Mexico Beach, the devastation is massive. Teams are searching for survivors as many homes is the community were washed away. Officials say nearly 300 people refused to leave when evacuation orders were issued. On that note, please be safe. Evacuees in Florida have been asked to wait a little longer while roads are cleared, and power is restored. Downed trees and power lines and flooded roads continue to make travel hazardous throughout the
