# Quarterly Issues Programs List WBCK and WBXX

Q2 2023 (April 1 – June 30, 2023)

#### **Section I. Issues**

The stations have identified the following issues as significant issues facing our community in this quarter:

- A: **Public Health Impact of Sugar in Processed Foods:** Battle Creek is recognized as a national leader in the manufacture of many staple processed foods being the home of Kellogg and manufacturing plants for both Kellogg and Post. With that in mind, we explored the impact of sugar on the American diet and the future of alternative sweeteners.
- B: **Battle Autoimmune Diseases:** The University of Michigan Hospital is home to one of the nation's top top programs treating people with Lupus. The practice provides patients with access to the latest treatments and clinical trials. We focused on this little known and understood disease and its impact on the community.
- C: **The Impact of Children's Hospitals:** With the nearby Bronson Children's Hospital in Kalamazoo serving the healthcare needs of the youngest in our community, we spotlighted the magic of children's hospitals and the work they do with venerable populations.
- D: **Low Impact Sports:** As the sport of pickleball has grown in popularity, the Battle Creek community saw the formation of city's own Pickleball Club and dedicated courts to the sport at Kellogg Community College. We explored the impact of the sport and how lifelong practice of low impact sports can improve health.

#### **Section II. Responsive Programs**

Public Affairs Program, Radio Health Journal, airs every Sunday at 6 am on both WBCK and WBXX.
