Segment Length: 01:30:00

Bing Crosby was, without doubt, the most popular and influential multi-media star of the first half of the 20th century. His remarkable appeal, which continues to this day, was in his seemingly effortless ability to pull an audience in to his intimate, laid-back voice. For over three decades, through radio, film and records he reigned supreme. A brilliant entrepreneur, Crosby played an important role in the development of the postwar recording industry. As one of Hollywood's most popular actors, he won the Oscar for 1944's *Going My Way* and starred in the iconic "Road" films with Bob Hope. Crosby recorded nearly 400 hit singles, an achievement no one -- not Sinatra, Elvis or the Beatles -- has come close to matching. Thirty-seven years after his death, he remains the most recorded performer in history. This documentary explores the legend of an iconic performer, revealing a personality far more complex than the public persona he so carefully cultivated. Narrated by Stanley Tucci.

the 1965 murder of an estimated one million people honored as a patriotic act, but the killers remain in power. Format: Documentary
Segment Length: 00:02:00

Combative, provocative and searingly blunt, Admiral Hyman G. Rickover was a flamboyant maverick, a unique American hero. When few thought it possible, then-Captain Rickover undertook to harness the power of the atom to drive the first nuclear-powered submarine, the USS Nautilus, whose trip under the polar ice pack was one of the great adventure stories of the 1950s. Later, Rickover built the world's first commercial nuclear power plant at Shippingport, PA. Rickover's achievements made him into a national celebrity, and he appeared on the cover of Time magazine. Many questioned Rickover's goal of an all nuclear navy, and others questioned his creation of a technocratic elite, his own navy within the Navy. However, few contested that he had transformed the Navy and changed the course of America's technological development. Today, questions about nuclear power have arisen again, in the wake of the disaster

in Japan, yet nuclear power remains one of the main alternatives to fossil fuels. Many wonder whether America can maintain its technological pre-eminence and whether we can still build and manage large-scale projects. To understand these issues, we would do well to consider the story of the man who created the nuclear navy as well as the civilian nuclear power industry: Hyman G. Rickover.
