	<b>Sojourner TRUTH Radio w/ Margaret Prescod</b>	As a child, journalist Nikole Hannah-Jones didn't hear much in school about the role of Black people in U.S. history. "Black people are largely treated as an asterisk in the American story," she says. But Hannah-Jones' awareness changed in high school when she signed up for a Black studies elective. Among the things she learned was the date 1619, significant because it's the year that the White Lion, the first ship carrying enslaved Africans, arrived in the British colony of Virginia " one year before the Mayflower landed at Plymouth Rock. "Every American child learns about the Mayflower, but virtually no American child learned about the White Lion," Hannah-Jones says. The omission, she says, is "symbolic of how history is shaped by people who decide what's important and what's not.	05/19/2023	11:00 AM - Noon	58 Minutes

<b>Sojourner TRUTH Radio w/ Margaret Prescod</b>	Every day and in every emergency, unwaged or low waged caregivers, urban and rural, mostly women, often immigrant women, struggle to protect and care for people of every age and condition. But this work is kept invisible and therefore there is never a relief package from governments for caregivers, only more work, especially with the advent of Covid-19. In 1980, the ILO estimated that women did 2/3 of the worlds work for 5% of its income. Today women and girls do more than three-quarters of all unpaid care work " a total of 12.5 billion hours a day. The coronavirus pandemic came on top of the climate pandemic, the poverty pandemic, the war pandemic and the rape and domestic violence pandemics which have hit single mother families, ill, disabled and older people hardest. It is exposing weaknesses in our ability to resist and survive physically and financially " from immune systems already compromised by poverty, discrimination, pollution, war, occupation, displacement and other violence to inadequate healthcare and inadequate incomes, especially in the Global South, in communities of colour in the North, and among refugees everywhere. In response to the virus, country after country has been shut down " from workplaces to schools and transport " and proposals to replace lost wages are being debated. These drastic measures show that governments can take swift action and find money to deal with emergencies " if they want to. At this critical moment, we must insist collectively on what we need. We fear that governments may use increased emergency powers to transfer wealth from taxpayers to corporations, and even impose further controls, surveillance and restrictions on our movements and our lives well after this pandemic is over.	06/05/2023	11:00 AM - Noon	58 Minutes

**History and Politics**

<b>Politics Done Right</b>	Call in Show featuring special guest Marianne Williams, Candidate for the Presidency of the United States of America. According to the Rand Corporation, over \$50 trillion has been redistributed from the bottom 90 percent of Americans to the top one percent over the last 48 years. The average working American now makes, in real dollars, less money for the same work, while CEOs and stockholders have grown enormously rich from a system that increasingly exploits both people and planet. Trickle-down economics has not lifted all boats, as its propagandists promised; it has sunk millions of them, leaving many without even a life vest. An aberrational chapter of American history – in which neoliberal economic philosophy has replaced democracy with short term corporate profits as America’s new bottom line – has thrown our country into a period of social, political and economic decline.	04/03/2023	noon - 1:00 P.M.	58 Minutes

**Law, Punishment & Incarceration**

<b>The BradCast</b>	On today's 'BradCast': Republicans are pro-murder and anti-democracy. It's just that simple. And we've got much more evidence of that today. It's an election year in Virginia, with the entire state legislature up for grabs, so the state's Republican Gov. Glenn Youngkin has unilaterally rescinded a bipartisan policy used by previous governors to vastly expand the restoration of voting rights to former felons. Youngkin will instead use a secret process and will personally decide, on a case-by-case basis, who he will allow to vote. Voting rights and justice reporter ALEX BURNES of Bolts Magazine explains Youngkin's new appalling, anti-democracy policy, and how it harms communities, public safety, and those trying to return to civil society after completing their sentences in Virginia. Arkansas GOP Gov. Sarah Huckabee Sanders signed a law erecting new barriers to absentee voting and the ability of voters to place citizen initiatives on the statewide ballot. Also today: Rep. Andy Ogles (R-TN), who represents the Nashville district where a school shooter killed six on Monday, ran away from a reporter asking Ogles why he deleted his gun-filled Christmas card, and why he favors guns and murder over the lives of children. Comedian Jon Stewart exposes the rank hypocrisy of a Republican Oklahoma lawmaker who wants to 'protect children' from drag shows but not from being murdered by guns. Big Government Republicans in Kentucky voted to over-ride the Democratic governor's veto of a law that bans health care for trans kids, bans all discussion of sexual orientation or gender identity in all grades K-12, and more.
