Description: Pedro Benjamin Mateo continued talking about education, specifically the cost of higher education. He stressed how having a free k-12 school system in the United States of America is something that every young mind should take advantage of in order to maximize their ability to become scholarship recipients. The cost of higher education keeps going up and if a student can take full advantage of the opportunity to apply for scholarships, they should. He also mentioned that if a student doesn't have the grades outright, they have the option to get their associates degree at a community or technical college and then transfer to four-year college and apply for scholarships, using the grades they obtained at the technical/community college. The target audience is the community's youth and the objective is to teach morality with hopes to impact this generation.
