Any leftover money will go toward helping the police department and senior center also buy machines.</p> | 02/02/09       |

| Digital Transition   | <p>The federal government mailed out \$40 coupons to help people purchase their converter boxes, but because so many people requested the coupons, the government has run out of funding to cover the vouchers. Anyone who applied after January 4<sup>th</sup> will be put on a waiting list until more funds become available.</p>   | 01/06/09 |
|  | <p>Viewers have found that after hooking up their converter box, getting the stations has been unreliable. With analog, a weak antenna reception will give a fuzzy picture. But with digital, a weak antenna reception causes the picture to either freeze or not show up at all. The solution is to change your rabbit ears antenna with a rooftop antenna that is more sensitive and less affected by obstructions.</p>            | 01/07/09 |
|  | <p>KECI-TV will be running a digital transition test on January 14<sup>th</sup> from 9:55-10am and 6:55-7pm. If you see static you will be urged to stay tuned for an upcoming report because you are not ready for the digital conversion.</p>  | 01/13/09 |
|  | <p>The House and the Senate have both passed a measure today to delay the digital transition to June 12 in order to give some breathing room to the 6.5 million Americans who are not quite ready for it. The bill now heads to the White House where President Obama is expected to sign it.</p>  | 02/04/09 |
|  | <p>Now that the government has pushed the digital transition date forward to June, television stations have the choice to make the transition now or to wait. KECI-TV has made the choice to wait until June 12<sup>th</sup> to do the full conversion.</p>  | 02/05/09 |
|  | <p>Neilson surveys tell us that more than 15% of Montana viewers aren't ready for the digital transition, which made the decision for KECI-TV to wait until June 12 to finish the conversion. For those who aren't ready, the decision needs to be made between buying a new digital TV, a low cost converter box, or signing up for cable or satellite. For viewers who are ready, we already offer a low-power digital signal.</p> | 02/06/09 |

The program allows people to get a job in a field where they have little or no training. They get paid a full wage, but the employer only provides 50% of it, while the government picks up the rest of the tab. It is an enticement for employers to hire someone who may have no experience but does have basic skills that can be built on.</p> <p>Some Montana cities have a special loan program called revolving loans and the programs want Montana businesses to take advantage of them.
