Dear Affiliate Partner:

To assist you in complying with the reporting requirements for children's television and the requirement that stations air "core" children's programming, we are providing you with episode-specific descriptions (the 'NBC Kids' educational and informational programming block) as set forth in the attached Community Relations Quarterly Children's Programming Report for the 4th quarter of 2013. The report includes information to help prepare FCC Form 398. Please note that we have not included the specific dates and times for each of the programs as that may be station-specific.

This report is divided into the following categories:

1. Educational Objectives: NBC Kids for both 4th quarter 2013 and 1st quarter 2014.
2. Core programming: Regularly scheduled programming furnished by the NBC Network that is specifically designed to serve the early educational and informational needs of children 16 and under. Each of these programs is identified on-air as educational and informational with the "E/I" icon, and is similarly identified to the national listing services. To assist stations with the preemption report section of FCC Form 398, we have added specific episode numbers. Please note that the age target for NBC Kids programming is identified as 2-5 years old.
3. Other programming: Programming furnished by the NBC Network that contributes to the educational and informational needs of children 16 and under, but is not specifically designed to meet the educational and informational needs of children.
4. Public service announcements targeted to children 16 and under.
5. Non-broadcast efforts that enhance the educational and informational value of NBC Network programming to children.
6. Network on-air promotional efforts, which include a schedule of NBC on-air promos for NBC Kids programming.

Except as set forth below, the regularly-scheduled children's programming and promotional content furnished to you by the NBC Network during the 4th quarter of 2013 complied with the commercial limits of the Children's Television Act, and 47 C.F.R. §§ 73.670(a)-(d), provided that you broadcast and distributed such programming as furnished to you by NBC, and did not add any promotional or advertising content thereto other than as directed by NBC via weekly postings on APT.

On October 12, 2013, the closing credits for "Lazytown," an educational and informational program supplied to the NBC Network by Sprout for the "NBC Kids" Saturday morning E/I block, inadvertently included a fleeting (one-half second) display of the URL for a web site ([www.lazytown.com](http://www.lazytown.com)) that did not conform to the FCC's commercial limits rules for web site displays in children's programming. Even though the display of the URL was fleeting, and therefore barely discernible by viewers, it is possible that the FCC would consider this a violation of the commercial limits rules.

The NBC Network takes precautions to avoid any potential violations of the FCC's web site rules. Specifically, each episode of the "NBC Kids" Saturday morning E/I block is reviewed by

Sprout, whose policy is to remove all URLs from program materials. In this case, however, the display of the URL in the closing credits was so fleeting it was missed during the review process. The NBC Network is working with Sprout to develop and implement additional procedures to minimize the possibility of a re-occurrence of this isolated incident.

If you have any questions about these reporting requirements, please feel free to call us.

## 4th QUARTER 2013 EDUCATIONAL OBJECTIVES

In compliance with the Children's Television Act regulations that became effective January 2, 1997, the **NBC kids** programming block features an on-air icon (E/I) indicating that each program is "educational and informational" for children. **This icon is displayed throughout each program.** Also, in compliance with the regulations, the following document, which includes "early educational and informational" objectives of **NBC kids**, must be placed in your public file.

The **NBC kids** programming block also meets the requirements for video described content, as established by the Twenty-first Century Communications and Video Accessibility Act, effective October 8, 2010. Full-power affiliates of NBC that are located in the 25 television markets with the largest number of television households must provide video-described content at any time they are providing children's programming. Each episode of content can be aired no more than twice in the calendar year.

Each of the programs listed below, which make up the three hour **NBC kids** programming block, is specifically designed to serve the early educational and informational needs of children ages 2-5. All of the programs have educational objectives and messages that are core to the content and appropriate for the program genre.

From October 5, 2013 – December 28, 2013, **NBC kids** aired five shows returning from the 3rd Quarter 2013. These are: **Justin Time, Lazy Town, Pajanimals, The Chica Show and Tree Fu Tom.** The sixth show, **Make Way for Noddy** premiered October 5, 2013.

All six shows were developed specifically for a target audience composed of children ages 2-5. All of the shows have a narrative format. Four use elements of fantasy and imagination to develop the educational content. These shows are **The Pajanimals, Justin Time, The Chica Show** and **Tree Fu Tom.** **Tree Fu Tom** and **The Chica Show** combine live action with animation; **Lazy Town** is live action with puppets, and the remainder of the schedule is animation.

**The Chica Show** features a five-year-old "baby" chick who spends her days with her parents in their costume shop, the Coop. The shop's one employee, Kelly, doubles as Chica's nanny and the ensemble is rounded out with Bunji, a large floppy eared rabbit and Stitches, a straw mannequin that sits in the window. In each episode Chica develops or encounters a problem that she cannot immediately resolve. Usually her issues involve impulse control, distractibility, judgment, and inter-personal behaviors. She and Kelly usually work on the problem through an adventure—a fantasy transformation to animation-- where Bunji and Stitches come alive and join Chica and Kelly for the problem solving process. The core educational content is primarily socio-emotional development, and Chica learns how to express herself properly, think before she acts, and interact with others effectively. She often learns that it takes hard work and practice to become proficient at different skills.

**Pajanimals** are a group of four preschool aged puppets that live together in a house with their off-screen mother and father. They reside primarily in their bedroom, a dormitory of sorts, where they complete their nighttime routine of brushing teeth and conversing quietly before falling to sleep. The quiet time always turns into a discussion that results in a dream-like adventure to solve a problem, such as overcoming shyness, making a new friend, or dealing with a bully. The adventure takes place in several nighttime dream locales where special friends help them work through the social/emotional problem of the day. Specific approaches to managing the problem are demonstrated and practiced throughout the adventure.

The children return home in time to get ample rest, confident about-facing their issues when they awaken the following day.

**Justin Time** features a little boy, Justin, who wants very much to master his destiny, have great adventures, and solve problems. He begins with a problem that vexes him and daydreams his way into an adventure that takes him to different places around the world, providing him with an experience to help solve his problem when he returns home. Justin is accompanied by two imaginary friends throughout his adventures; Olive, a knowledgeable playmate, and Squidgy, the morphing flying sponge, who provides commentary and comedy along the way. Some examples of Justin's lessons involve learning that it takes focus to achieve success, our failures can teach what we need to do to succeed next time, or when one path to solve a problem doesn't work, you can find an alternative way to achieve your goal. Justin promotes self-directed learning from the young child's perspective and imagination.

**Tree Fu Tom**, is a live action/animated series about a little boy who lives in a rural area and has a rich fantasy life in the woods behind his home. Tom uses specific movements to summon up magic powers that permit him to morph into an animated hero and fly around in Treetopolis, the fantasy version of his woods. While in Treetopolis, Tom and his friends, Ariella, Twigs, Squirmturn and Zigzoo will invariably run into a problem or disaster that needs fixing. Tom calls upon the audience to practice original dance moves that will bring him "Big World" magic so he and his friends can resolve their challenge of the day. Educational messages reinforce positive socio-emotional content, with examples that model: being loyal to good friends, knowing how to ask for help, doing the right thing instead of what is convenient, making the effort to share rather than being selfish or relying on teamwork in order to accomplish a goal.

**Lazy Town** encourages fitness and healthful habits for preschool children. In the imaginary setting of Lazy Town, characters' eating and fitness habits are linked to problem solving in their world. The lead character is Stephanie, a young girl who guides the audience through the story as she and her friends ("human" puppets) and her Uncle (Mayor Milford Meanswell) navigate life within Lazy Town. Robbie Rotten, the underground spy and influencer who personifies the ethos of Lazy Town, is determined to ruin the health and fitness practices of Stephanie and her friends. When the kids have difficulty with Robbie Rotten, Sportacus, a gymnast/athlete prepared to answer any call for help, comes to the rescue from his home in a zeppelin-like aircraft that hovers over earth. The underlying themes of Lazy Town stress the importance of eating "sports candy" (aka fruits and vegetables), always obtaining sufficient sleep, and going outside to engage in a wide range of physical activities including playing games, competing athletically, and even building forts and play structures.

**Make Way for Noddy** is based on a recurring character in the Enid Blyton book series for very young readers. Noddy, a boy doll, lives in a little cottage in the village of Toyland. He tools around in his sporty convertible, delivers the mail, and is a friend to all. Because he is very kind to others, he invariably is asked to help solve problems. But because he doesn't know everything, he also has a lot to learn. In each episode Noddy actively finds a way manage a project, soothe hurt feelings, settle arguments, or learn how to do something new by following directions. The examples in each episode are age appropriate challenges for children in the target audience and model clear and concrete solutions to problems.

## 1st QUARTER 2014 EDUCATIONAL OBJECTIVES

Noodle and Doodle will be returning to the schedule for Q1, 2014, replacing Pajanimals.

Noodle and Doodle, an instructional series, features creating art projects and cooking projects around a specific theme. Host, Sean, drives around in a double-decker bus fully equipped with art supplies and a kitchen, ready for any assignment. The projects encourage parent engagement and often feature families working together to make something to display within the child's home. Sean's side-kick, Doggity, is an ever-faithful beagle who transforms into an animated character during interstitial trips to a parallel universe, set in a kitchen full of prank playing animated characters. The art projects typically promote utilizing recycled materials in order to demonstrate that creativity can transform something intended for one purpose into something that achieves a completely different goal.

## 4th QUARTER 2013 SHOW SUMMARIES

The Chica Show features a five-year-old "baby" chick who spends her days with her parents in their costume shop, the Coop. The shop's one employee, Kelly, doubles as Chica's nanny and the ensemble is rounded out with Bunji, a large floppy eared rabbit and Stitches, a straw mannequin that sits in the window. Chica's parents were formerly entertainers in the vaudeville tradition and they regale the audience with stories and songs from their theatrical past. They enjoy and indulge Chica, who sometimes acts younger than her age and gets into all kinds of predicaments. Kelly uses fantasy play to transform herself, Chica, Bunji and Stitches into animated characters in another universe, who are struggling with a problem similar to the one Chica experienced in the Coop. Without fail, they find the problem can be solved and they carry that knowledge back to the Coop to use on another day.

Pajanimals focuses on teaching bedtime routines and practicing them consistently so children can get a good night's sleep. In each episode one of the main characters—Apollo the dog, Squacky, the duck, Sweetpea Sue, a horse, and Cowbella, a purple and white cow—has difficulty sleeping or faces a problem. They all pile onto one of the beds and are whisked off to a land of adventure that offers solutions to their problems. Each bed travels to a specific place for the adventure: Squacky's bed goes to Ellie the octopus who lives in the Big Blue Sea and to Coach Whistler who lives in Land of Play; Cowbella's bed goes to Edwin, who lives in Storybook Land and to Jerry Bear, who lives in the Big Friendly Forest; Apollo's bed goes to the Moon who is in the Night Sky, and Sweetpea Sue's bed goes to Mr. Happy Birthday, a porcupine who resides in Birthday Land, and Bedtimes Bunny who lives in the Land of Hush. Each show ends with the problem resolved and the Pajanimals tucked into their beds for a good night's rest.

Justin Time is an animated show specifically directed to the preschool audience and always conveys an embedded lesson; it is possible to understand and manage any problem you have by thinking about it creatively. Justin is a little boy who has two imaginary playmates, **Olivia** (who meets him on his travels) and **Squidgy** the sponge (who also lives in Justin's bedroom). When Justin has a problem or doesn't want to do something his mother has suggested he daydreams his way into an adventure that takes him to places all around the world. On these adventures, he meets Olivia who guides him through an experience that demonstrates to Justin how he can solve his problem. The show provides many facts about the context the characters visit while on the adventure, but the central point is to teach a lesson about a social/emotional dilemma universally experienced by preschool children.

**Tree Fu Tom** focuses on the amazing adventures of a young boy called Tom who, with the power of ‘movement magic’ called ‘Tree Fu’, can transform into a tiny but mighty magical super hero and travel to a wondrous enchanted kingdom called Treetopolis that exists in a tree in his backyard woods. During each program he calls upon the audience to follow his moves to send him the “Big World” magic he needs to solve a problem encountered by Tom and his friends. These include Ariella, a butterfly who is also a rancher and has rope lassoing skills; Twigs, an acorn sprite who folds himself into an acorn when he’s frightened, Squirmturn, a pill bug who looks like a large and imposing coal miner but is often timid and fearful, and Zigzoo, a green tree frog and the resident genius inventor. In each episode there are an action adventure sequences that are key to resolving the challenge of the day.

**Lazy Town** is a show featuring the importance of health, fitness, and being good friends. Set in a fantasy world known as Lazy Town, which is populated by inactive residents, we meet a visitor named Stephanie who is determined to coax her friends and relatives into adopting a healthful, active life style. She wins over her new friends, Ziggy, Stingy, Trixie and Pixel, convincing them to leave their gaming consoles and candy stashes at home so they can go outside and play. She persuades her uncle, Mayor Milford Meanswell, and his friend Ms. Busy Body to support her efforts. Robbie Rotten, who lives underground, and is determined to return Lazy Town to its former state of inactivity and quiet, constantly foils the characters’ efforts. Coming to the rescue is the athlete Sportacus who lives in a zeppelin-like aircraft and receives signals from the kids or the Mayor whenever they need help. Sportacus has two goals, to keep the peace and to promote healthful, positive living. When Robbie Rotten is discovered and contained through comic pratfalls, he returns to his underground lair and all is well in Lazy Town, until another day and another time when Robbie will rise again.

**Make Way for Noddy** is based on a recurring character in the Enid Blyton book series for very young readers. Noddy, a boy doll, lives in a little cottage in the village of Toyland. He tools around in his sporty convertible, delivers the mail, and is a friend to all. Noddy is surrounded by a large cast of other toy characters some of whom are mentors, and a few others who are mischief makers in Toyland. In every episode of Noddy, there is a challenge experienced by Noddy or someone else in Toyland that lends itself to a humorous and lighthearted resolution. Whether it’s Martha the monkey getting her undoing for her selfish ways, Mr. Wobblyman learning to play soccer with no legs, or Noddy trying to assemble a kite, the characters in Toyland work out their issues and live together in harmony.

## **1st QUARTER 2014 SHOW SUMMARIES**

**Noodle and Doodle** will be returning to the schedule for Q1, 2014, replacing **Pajanimals**

**Noodle and Doodle** is a live-action show hosted by Sean Roach that also blends animation and puppetry into the overall format. **Sean** drives a double-decker bus into various communities to meet children who have written to him with a problem that they would like to solve using an art and/or a food experience. Sean is accompanied by **Noodle**, a puppet character and **Doodle**, a digital character that lives inside a tablet computer, and **Doggity**, a faithful beagle. Doggity has a mini-show of his own through an animated alter ego that appears during diversionary segments set in a restaurant kitchen. The show demonstrates how recycled materials can become art and how food, art, and problem solving can be combined to create a fun experience in everyday life. Every episode can be replicated at home with ease by parents and children playing together.

Series Review

Title: *Taste Buds*

Episodes reviewed: Episode 103 – “Foods That Grow” and Episode 105 – “Foods That Fuel”

Program length: 30 minutes

*Taste Buds* is a hands-on series that encourages children to think about what they eat, be creative in the kitchen, and explore cool foods from the world around them. After reviewing several episodes, it is apparent that *Taste Buds* works as an educational tool for children 13-16 years of age by communicating a positive message about healthy eating, kitchen safety, and environmental responsibility. Providing teens with a deeper understanding about the foods they eat will lead them to make healthier and smarter decisions as they learn to make food choices for themselves. Each episode imparts different educational and nutritional lessons ranging from foods that smell, to foods that grow, and foods for the brain (to name a few).

In “Foods That Grow,” viewers learn how greenhouses sustain vegetable growth during winter, common misconceptions about foods, and how to make healthy meals and snacks like veggie burgers and dip. This episode has educational value as it teaches children about where their food is coming from, as well as important facts about fruits and vegetables that we commonly misunderstand - for example: that avocados are actually berries.

“Foods That Fuel” is a useful educational tool as the episode is a great lesson in healthy eating through illustrating the importance of making smart choices with food. Topics covered include why sugary sports drinks do not provide as much energy as homemade power smoothies and fuel bars, and why our bodies need food in order to perform properly. Viewers are introduced to an Olympic gold medal hockey player who reiterates the importance of a balanced diet. As teenagers begin to make their own food and diet decisions, this episode illustrates the importance of healthy eating habits for active children.

In addition to educating teens, *Taste Buds* provides information and tools for parents to use with their children by fostering an open attitude to new experiences, expanding cooking vocabulary, and increasing food knowledge. The show extends the cooking experience beyond the couch and into the home kitchen.

## Taste Buds – Show Synopses

### **101 - Foods That Smell**

Lily and Avery follow their noses to find out what gives foods their amazing aromas. Avery enjoys a super garlicky Caesar salad, then tries to sniff out a cure for his ghastly garlic breath. Lily makes a splash at the fish market where she gets to the bottom of seafood's suspicious smells. Together, they take on the ultimate olfactory challenge: recreating Matt's Amazing Seafood Chowder, by sense of smell alone!

### **102 - Foods That Melt**

Watch foods melt before your eyes! Chill out as Lily tries to solve the mystery behind Baked Alaska, a frozen dessert that *doesn't* melt in the oven. On the hunt for a simple snack, Avery visits a local cheese shop and discovers there's more to cheese than just cheddar! Back at the kitchen with Matt, Lily and Avery use a variety of cheeses and fresh veggies to see who can make the best twist on an ooey-goey melted favorite: grilled cheese sandwiches!

### **103 - Foods That Grow**

Ready Set Grow! With a garden's worth of greenery, Avery grills up a batch of veggie burgers. Lily heads into the field to unravel a mystery: how do greenhouses help veggies grow in winter (Psst. The secret is *right under your feet*). Then our duo discovers a funny thing about tomatoes – they're actually fruit! And avocados are actually berries! Turn them into dip and discover a delicious treat.

### **104 - Foods That Stick**

Lily's coming unglued! Can Matt help her find the fix for chicken fingers that stick to the pan? Avery tackles the art of making Japanese sticky rice at a sushi restaurant. But, when the octopus sushi gives him the willies, will he be able to stick to the task? Our hosts really bond when they compete to see who can make the stickiest snacks. With all this fun, you'll want to stick around!

### **105 - Foods That Fuel**

Fill 'er up! When Avery needs to up his energy, he discovers that sugary sports drinks can't beat the boost he gets from his home made Power Smoothies and Awesome Fuel Bars. Lily hits the ice with an Olympic gold-medal hockey player and finds out what happens when you try to run on empty. Will the right snack get her back on track? Lily and Avery head back to the kitchen for a batch of the ultimate, high-octane meal: a new take on traditional spaghetti & meatballs.

### **106 - Foods That Crunch**

It's crunch time! Lily fights soggy cereal with a crunchy batch of her very own granola and learns the history behind crunchy breakfast cereals with History Buff.

Avery visits an apple orchard, where he meets an apple expert and learns how apples get from the tree to your local grocery store. Avery and Lily team up to make homemade oven-baked chips, and use their Crunch-o-meter to find out which kind of healthy chip is the King of Crunch!

#### **107 - Foods That Are Flat**

The Taste Buds get the skinny on their favorite flat foods. Lily and Matt make two mouthwatering kinds of mandarin orange crepes and discover that one of the flattest foods is also the most versatile. Avery visits an Ethiopian restaurant, where they skip the cutlery and try different toppings on the deliciously flat *injera* bread. Then Lily & Avery make a selection of slim and healthy sandwiches to find out which is their flat-out favorite.

#### **108 - Foods That Are Sweet**

When Chillbot alerts Lily that her root beer float will have her floating in sugar, can she find a way to beat the heat with something that's not too sweet? Avery taps into the secrets of an authentic sugar shack, and finds out how oh-so-slow maple sap becomes oh-so-sweet maple syrup. Then Lily and Avery flip for their own fabulous flapjacks – and discover that fresh fruit is the perfect pancake companion. *Sweet!*

#### **109 - Foods That Are Purple**

Purple powers activate! Avery and Matt cook up some freaky purple mashed potatoes with a side of purple coleslaw and then get artistic when they realize their plates need a little more color. Lily ventures out to a gelato emporium to sample their rainbow-colored flavors, learn how gelato is made, and find out if color can affect a food's taste. Then it's blackberries versus blueberries as our hosts ask which fruit contains the most purple-staining action!

#### **110 - Foods That Sizzle**

Avery makes some noise when he and Matt create chicken & veggie fajitas with that classic restaurant sizzle. Lily gets cooking right at her table when she visits the sizzle experts: a Korean barbecue restaurant. Then it's a sizzle showdown as the Taste Buds cook up a traditional Greek feast... and see which skewered delight is the loudest on the grill. These foods have something to say!

#### **111 - Foods That Rise**

Rise and shine! The Taste Buds expand their food horizons! Avery tries to see how high he can make a strawberry shortcake rise, and the result towers above anything he's made before. Lily tours a bakery to find out if the rumor is true: that bread rises because of gases given off by – yuck – fungus! Back at the kitchen, Matt helps Lily and Avery stack up some new uses for day-old bread, with delicious results.

### **112 - Foods That Stretch**

Can you make your food streeeeetch? When Matt and Lily make pizza dough that breaks instead of stretches over the pizza pan, Science Whiz shows them how kneading the dough is the key to the science of stretch. At an authentic noodle restaurant, Avery watches a professional noodle puller hand-stretch 1000 strands of noodles. Back at home base, Avery and Lily stretch out the noodle dough for their own take on Italian ravioli!

### **113 - Foods That Crack**

When her store-bought taco shells crack into a gazillion pieces, Lily cooks up a batch of homemade taco shells that crunch without cracking. Meanwhile, Avery investigates how chickens lay eggs without cracking them, and makes a trip to see some of the biggest eggs

of all – at an ostrich farm! Then our hosts take a crack at cooking each other's favorite omelet, and the results have Matt cracking up!

### **201 - Foods That Flow**

Looking for ways to have a meal in a cup, Avery visits a juice bar to make fresh fruit smoothies. Lily tries her hand at goat milking at a goat dairy farm. Back in the kitchen, Matt demonstrates how to taste two delicious soups in the same bowl.

### **202 - Foods That Ooze**

To win gold in the "Ooze-lympics" Avery goes to Chef Dufflet's kitchen to make Molten Chocolate Lava Cake, Lily gets fresh honey at a bee farm. For the final event, Matt challenges them to make extra-oozy, stuffed pizzas.

### **203 - Foods That Are Hot**

The Taste Buds are spicing up their lives! Lily drops in on Chef Lily Pottinger to make a classic spicy Jamaican dish, Jerk Chicken. Avery tests his tolerance for hot peppers at a hot sauce store. Then it's back to the kitchen to see whose fiery wings will bring Matt to tears.

### **204 - Foods That Make You Pucker**

In this sour half-hour, Avery and Chef Winlai Wong make Pork Pot Stickers with a sour vinegar sauce. Lily follows a cucumber's journey to becoming a sour pickle at a pickle factory. In the kitchen, Matt challenges them to make fruity ice pops with serious pucker power.

### **205 - Foods That Make You Smile**

Some foods just put a smile on your face! For Avery, it's mini carrot cupcakes with Chef Morag Cleevely. Lily is all smiles while visiting a chocolate maker.

Then it's cooking time with Matt, where they make three kinds of delicious fries that are actually good for you!

#### **206 - Foods That Are Super-Powerful**

Avery whips up a power-packed dinner with Chef Robert Bartley, who makes meals for Toronto's top sports teams. Lily visits a butcher shop to make super-charged chicken and veggie sausages. Things heat up in the kitchen for the big chilli cook-off.

#### **207 - Foods That Are Wrapped**

Can a meal be wrapped like a present? Lily finds out with Chef John Klianis when they prepare Spanakotiropita. Avery makes authentic Mexican tacos at La Tortilleria. Together with Matt, they create meals wrapped in paper, or "En Papillote" as the French say.

#### **208 - Foods That Start With Q**

Can you name a food that starts with Q? Avery makes Quiche with Chef Jean-Jacques Texier. Lily visits a sheep farm to check out a creamy, little-known cheese called Quark. Back in the kitchen, they take on Matt's Quirky Quesadilla Challenge.

#### **209 - Foods For the Brain**

Lily knows the smartest way to start the day is with a good breakfast, and meets Chef Donna Dooher to make Green Eggs and Ham. Avery finds out why fish is called "brain food" at an aqua-culture centre. Matt keeps score as the two make some "berry" good-for-your-brain deserts.

#### **210 - Foods That Are Fancy**

Lily goes uptown and discovers the secret to making the perfect Crème Brûlée with Pastry Chef Joanne Yolles. Avery gets dressed up for some fine dining. Together with Matt, they turn leftover mashed-potatoes into a fancy soufflé.

#### **211 - Foods That Are Raw**

No stoves allowed as our hosts learn the art of un-cooking. Avery makes a raw, veggie lasagna with Chef Jennifer Italiano. Lily checks out a rooftop garden in the middle of the city. Together with Matt, they prepare two cold soups: one fruit and one vegetable. Raw-some!

#### **212 - Foods That Are Ooey-Gooley**

Avery satisfies his ooey-gooley craving by making mac & cheese with Chef Bonnie Stern. Lily visits a bubble gum factory. Back in the kitchen with Matt, they throw together an extra ooey-gooley plate of nachos.

### **213 - Foods For Dudes**

Some foods just make you say "dude!" For Lily, it's Mini Falafel Burgers which she makes with Chef Stuart Betteridge. Avery visits a renowned steakhouse to grill the perfect steak. Then it's back to the kitchen with Matt to make the craziest dude-serve ever: Chocolate Salami. Dude!

### **301 - Foods That Zing**

### **305 - Foods That Are Colorful**

Lily and Avery explore the artistic side of food, but it all starts with colors (like carrots that are purple!) and visiting a food stylist to learn the art of plating. Chef John Cirillo and Chef Miriam Streiman appear.

### **306 - Foods For A Party**

Tyler's having a birthday party and is he ever the "birth-diva" with rules and exceptions! The Taste Buds are learning from an events and catering expert, and getting some great ideas for party foods, like samosas, curried potato wedges, and gourmet mini party pizzas! Chef Preena Chauhan appears.

Dear George:

I want to commend you for the impressive educational work you have done and continue to do for young people through your Aqua Kids show.

It hardly seems possible that it is three years (or is it four?) since my son Zach worked with you and your crew on location. He loved the experience and it had a role in affirming for him the importance of educating young people about the environment and encouraging good stewardship of resources. Nowadays, he pursues a degree in Landscape Architecture, driven to care for the ways we interact with the landscape by the example of his teachers here at John Carroll and the influence of educators like you from beyond the walls of school.

I am happy to recommend the Aqua Kids programming to students from middle school through high school. We teach courses in Environmental Science, Marine Biology and Chesapeake Bay Studies here at John Carroll and much of the content of Aqua Kids would prove a valuable supplement to classroom instruction.

On behalf of everyone at John Carroll, I wish you continued success in your mission to motivate young people to take an active role in preserving aquatic environments and wildlife, by showing how others just like them can do the same.

Sincerely,

Paul G. Barker

Dear Ms. Yde:

As an experienced mental health counselor, whose entire career has been spent with the education and developmental needs of teenagers, I am pleased to endorse and recommend the program Real Life 101.

I have viewed Real Life 101 and believe that the program provides a provocative learning experience for teenagers. The program is straightforward contemporary resource for teenagers looking to learn about the myriad careers that are available to them if they apply themselves and set realistic goals for themselves. Unfortunately, too often our youth are not exposed or given information in high school about various career opportunities available to them and hence are too often set to fend for themselves to a less than optimum end. Real Life 101 helps to fill this void and I would recommend it to be available to the mass market. The program also has a web link available to follow up on the information presented to them that they can view at their leisure. This is a very positive aspect of the program.

The capsules are quick, crisp and informative with the presenters dressed in "Real Life" clothing. It is just one more excellent resource to help our youth.

Sincerely,

  
Diane Phillips, MS.

Subj: **Letter of Appreciation, Teach-In Day, West Orange High School**

Your participation in my seven English classes on our annual Teach-In Day on November 17 was an outstanding success. My students are still talking about your career guidance show "Major Decision" and how much they enjoyed the enthusiasm and wealth of practical knowledge. Your guidance to my students on career selections fits perfectly into the start of the assignment of the student's assigned research paper. Each of my students is required to research interested career fields, select a potential career and prepare a research paper with a career field as the primary topic. Your enthusiastic show motivated the students and gave them a jump start on their project assignment. I expect to see them apply information from "Major Decision" in their research papers.

I am sharing your efforts with our Principal, James Larsen and his Guidance Staff. Your "Major Decision" show is innovative, exciting and addresses today's challenges. Thank you sincerely for taking a day out of your career guidance business schedule to extend your wealth of experiences with my students at West Orange High School. My students and I personally enjoyed your show.

MAJOR DECISION-CAREER VIDEOS

Dear Mr. Botha:

This past April, I had an opportunity to view some educational materials entitled "Major Decision". These videos are designed to provide insight into a select group of careers, helping students gain important information that can help guide them into making a more informed career plan. I found the ones I viewed to be very entertaining, from a student viewpoint. The student-friendly hosts spoke to the audience in words they could understand. What I found even more beneficial were the interviews with actual people in each profession. It provided real information and a look at exactly what each career was about. It had the right mix, interspersing actual professionals in the field with entertaining and personable hosts. It was something, I think, that can hold student's interest and at the same time, educate, without preaching to them. I feel it would work with either middle or high school students. The teachers who used it in our Upper School found the students really liked the videos. I have informed all the Upper School teachers of their availability and plan to keep them in our Career/College Center for their use. I believe "Major Decision" to be a valuable resource not only for career planning but also if one just wants to learn more about a specific career. I recommend this series to any school needing to supplement their career education curriculum.

Sincerely,

**Series Review**  
*August 2012*

**Program:** Animal Atlas  
**Episodes reviewed:** "To Tell The Truth (Ep. 910)"  
"Living Dinosaurs (Ep. 912)"  
**Program length:** 30 minutes

**Summary:**

**Animal Atlas** continues its long series life by using technology to consistently improve the essential visual component of the episodes. The high definition video of the arresting animals and animal elements is well used to engage viewers and lead them through a sequence of valued and meaningful insights. One of the series strengths continues to be that it does not just present a list of animal facts but links a wide variety of information into sequences that make knowledge of the animal kingdom both simpler and easier to remember. The interstitial quizzes have become not just summaries of previous information but a lead-in to the next organized sequence of information. The tone of credited narrator Eric Schwartz is perfect for the target group of 13-16 year-olds. It is non-professorial and faux flip—again, ideal for the target mindset of self-confident adolescence. Yet the vocabulary is rich. It presumes the understanding of the words like "behemoth" and "adaptation" but gives enough context to add that word to young viewers' vocabulary without getting pedantic. Great information in a rich visual context

**Episode: "To Tell The Truth" (910)**

**Animal Atlas** is able to move nimbly between television idioms. Here, the tone masquerade as a game show ("To Tell The Truth") allows the examination of a variety of contradictory, confounding, and misunderstood characteristic of animals. These include why whales aren't fish, frogs aren't reptiles, spiders aren't insects and why octopi are closer to snails than fish. Like the series in general, the episode goes beyond listing of facts when, in a sly answer to the interstitial quiz, it states that snakes may have warm blood. When it explains that snakes are not warm-blooded but simply can have warmed blood from exposure to the sun (like all cold-blooded animals), it sneaks deep into the difference between temperature and a temperature-maintenance biological mechanism which is the real differentiator for animals. Facts like the 18 hours a day koala sleeps are blended into a look at nearly everything called a "bear", whether they are truly related or not—and then explains why not. The reviewed episodes offer excellent information on analogous traits in animals without touching on convergence. Finally, the explanation of why the camels' hump is not for water storage is another great use of misconception to explain the marvels of animal adaptation.

**Episode: "Living Dinosaurs" (912)**

A strong characteristic of **Animal Atlas** is consistently relating exotic animals to more familiar animals and locations to make them more understandable. In "Living Dinosaurs", the wingspan

of an Andean condor is measured ground-to-rim against a basketball goal—an ideal image for 13-16 year-olds to sense how large a ten-foot wingspan really is. Colorful images of dinosaurs are juxtaposed against those of barnyard chickens, making those exotic drawings of never-seen animals seem much less fanciful. The excellent exploration of birds of prey and their probable relationship to dinosaurs is compelling. Facts about these always-fascinating raptors include the eagle's 7,000 feathers, the reason for baldness in vultures, and the note that raptor talons can be stronger than the hand and arm of a man. These facts are all wrapped around the defining characteristics of birds of prey. The episode, like the series, has the very good sense of when to define a word and when to rely on context. "Paleontologist" and "apex predator" are defined by the narrator while "omnivorous," "herbivorous", and "omnivorous" and "predation" are left to be defined by the visual context which the program provides well. Balancing information and the viewer's own inferences is one of the enduring qualities of the program,

#### **Education Summary:**

Animal Atlas covers a range of educational enrichment when matched against the Common Core standards. The emergence of Common Core as the education blueprint for 45 states and 3 territories has made it easier to align content again standards taught in school. Common Core is an outgrowth of common state standards and is generally compatible with all states in the larger details. The match of Animal Atlas with Common Core builds on the standard met since last season.

#### **Target audience (13-16 year-olds) for tone, program content, and learning concepts:**

- Middle and high school (ages 13-16)

#### **General Category of Learning:**

- Life Sciences
- Biological sciences
- Thinking skills

#### **Content Standards Applicable in the Animal Atlas series: Common Core and Single State**

There are no science content standards yet in the Common Core Content Standards (to be adopted by all but four states). However, Animal Atlas addresses the standards below, which were pulled from the Common Core State Standards Initiative for English Language arts & Literacy in History/Social Studies, Science, and technical Subjects (<http://www.corestandards.org/>), published in June 2010 by the National Governors Association and the Council of Chief State School Officers. Following the Common Core correlations are correlations to a typical state science standard (in this case, Illinois).

#### ***Reading Standards for Literacy in Science and Technical Subjects 6–12 (condensed)***

*Key Ideas and Details> Determine the central ideas or conclusions; provide an accurate summary distinct from prior knowledge or opinions. Grades 6-8*

Series Review

Series: Nature Adventures

Program Reviewed: 402 Grand Lake, Co: Gateway to Rocky Mountain National Park

Episode Length: @24 minutes

In Nature Adventures, Terri Lawrenz and Todd Magnuson take viewers with them as they explore nature. Just the two of them, and their camera man, Tom Orton. In the Episode: Grand Lake, Colorado: Gateway to Rocky Mountain National Park, Terri, Todd and Tom take us on an adventure throughout Rocky Mountain National Park.

Within this show, viewers will learn about the vegetation at the high altitudes in Rocky Mountain National Park. What adaptations the plants need to survive? There are many shots of the beautiful wildflowers that grow on the mountain sides and along the trails. Terri and Todd introduce us to elk and discuss the adaptations that allow them to survive in the harsh environment of the mountains. We learn about Prairie Falcons, Yellow Bellied Marmots, American Pikas, Gray Jays, Stellar Jays, Mule Deer, Moose and Osprey. There is also information about the Rocky Mountain Big Horn Sheep. Viewers will be fascinated by the fact that the Rocky Mountain Big Horn Sheep is the Colorado State Animal, even though they are outnumbered by Elk.

At higher elevations, Terri and Todd sit for lunch and point out to viewers that the food that they brought with them has changed a bit. Due to the lower air pressure, the food packages expanded! This will bring up some really good questions! Why does this happen?!? What a great way to introduce air pressure to students!

Terri and Todd mention that they are in the Rocky Mountains in August. Viewers may be surprised to see snow still on the mountain side in many of the shots seen throughout the show. As Terri and Todd travel to different elevations, the video footage of the scenery is breathtaking. It will make viewers want to take a vacation to Rocky Mountain National Park.

This show brings up a lot of important information that students need to know when it comes to ecosystems. It also addresses many of the new National Science Standards (NSS) for Middle School and High School. Examples of standards it covers are:

Life Science/Middle School: MS-LS2-2. Construct an explanation that predicts patterns of interactions among organisms across multiple ecosystems.

MS-LS1-5. Construct a scientific explanation based on evidence for how environmental and genetic factors influence the growth of organisms.

Life Science/High School: HS-LS2-7. Design, evaluate, and refine a solution for reducing the impacts of human activities on the environment and biodiversity.

HS-LS2-8. Evaluate the evidence for the role of group behavior on individual and species' chances to survive and reproduce.

This program is educational and is appropriate for grades 6 through 9. As a teacher, I especially like the use of scientific terms like flora, ecosystems, adaptations, and diverse. These are terms that every student in a science classroom needs to know.
