Dear Affiliate Partner:

To assist you in complying with the reporting requirements for children's television and the requirement that stations air "core" educational and informational children's programming, we are providing you with episode-specific descriptions ("**The More You Know**" educational and informational programming block) as set forth in the attached Quarterly Children's Programming Report for the 2nd quarter of 2023. Please note that **we have not included the specific dates and** times for each of the programs as that information may be station-specific.

This report is divided into the following categories:

1. Educational Objectives and Show Summaries: **The More You Know** both for programs broadcast in the 2nd quarter of 2023 and those planned for the 3rd quarter of 2023.
2. Core Programming: Regularly scheduled programming furnished by the NBC Network that is specifically designed to serve the educational and informational needs of children ages 13-16. Each of these programs is identified on-air as educational and informational with the "E/I" icon and is similarly identified to the national listing services. Please note that the target age range for **The More You Know** programming is identified as 13-16 years old.
3. Other Programming: Programming furnished by the NBC Network that contributes to the educational and informational needs of children 16 and under but is not specifically designed to meet the educational and informational needs of children.
4. Public service announcements targeted to children 16 and under.
5. Non-broadcast efforts that enhance the educational and informational value of NBC Network programming to children.

The regularly-scheduled children's programming and promotional content furnished to you by the NBC Network during the 2nd quarter of 2023 complied with the commercial limits of the Children's Television Act, and 47 C.F.R. §§ 73.670(a)-(d), provided that you broadcast and distributed such programming as furnished to you by NBC, and did not add any promotional or advertising content thereto other than as directed by NBC via weekly postings on APT.

Despite the recent revisions to the Children's Television Programming Rules, we will continue to provide this report on a quarterly basis. Please consult your legal counsel with any questions.

If you have any questions about this report, please feel free to call us.

**EARTH ODYSSEY WITH DYLAN DREYER**

**COMING OUT OF THE SHELL WITH CRUSTACEANS [EDD512]**

Today on Earth Odyssey, host Dylan Dreyer takes us under the sea to explore the alien world of crustaceans. First up, we'll learn about a fascinatingly deceptive crustacean, the spider crab. These elegant crabs owe their feathery appearance to anemones on their bodies. Spider crabs have developed a unique behavior of allowing different anemones to graft to their bodies. We'll witness how this camouflaged lifestyle takes on many and varied forms for these crustaceans. We'll see that there are no creative limits

as each crab takes on its own unique and totally wild look. We'll also learn that the Japanese species of spider crabs are the largest crab species on Earth and can reach up to twelve and a half feet from one claw to another. Next, we'll discover how other crustaceans use their environment, and even the animals living alongside them, as a form of protection. We'll witness how some crustaceans have chosen the nomadic life living on the backs of sea cucumbers. Crustaceans such as crabs and shrimp will use a host sea cucumber as protection to hide from potential predators. We'll also learn about a specific predator that feeds on crustacean larvae, the pipefish. We find out that pipefish can devour great amounts of larvae at once, sucking them into their mouths like a straw.

**[Educational Message: The way each animal adapts and thrives in the wild is entirely unique to the species. But crustaceans take their individuality to extremes. Adapting and even becoming a part of their environment has ensured their survival on our planet for millions of years.]**

**WILD CHILD**

**CITY SAFARI [WLC312]**

Today on Wild Child, host Sheinelle Jones takes us on a tour of cities to find the baby animals that love the urban lifestyle. First up, we'll visit the gardens of the urban jungle to learn about the lifecycle of a fascinating insect, the praying mantis. Females will carefully lay between 100 to 400 eggs on a sturdy leaf or branch. When conditions are warm enough, the egg cases crack, and babies begin to hatch. As they develop, praying mantis babies go through up to six molting stages before they reach maturity. A praying mantis can molt to change its color depending on the season. We'll also discover that a praying mantis is the only known insect with 3-D vision like in mammals. Next, we'll meet an animal that's wholeheartedly embraced the urban lifestyle, the Canada goose. Baby Canada geese, known as goslings, can dive up to forty feet deep at just one day old. We'll also learn that Canada geese are monogamous and will typically mate with just one partner for life. Canada Geese usually forage in groups and on land, where they mostly feed on a variety of plants including grass, seeds, and berries. We'll discover that Canada geese can eat up to three pounds of grass each day.

**[Educational Message: In this episode, we took a safari into the cities to reveal the wild animals living in urban environments. While they might have ancient wild backgrounds, these crafty creatures have expertly adapted to the man-made world around them using their natural instincts and some modern modifications.]**

**GONE SKYDIVIN' [HGL112]**

Today on Harlem Globetrotters: Play it Forward, host Craig Robinson takes us to the lake to go fishing with the team, then shows us how the Globetrotters have some friendly competition with a group of champion little leaguers. First up, Coach Lou, Wham, Hammer, TNT, and Torch head to the outdoors for a fishing excursion. We'll find out that being in nature generates calmness, joy, creativity, and better concentration. Here we'll learn that fishing requires the five essentials of rod, line, bait, hook, and reel. With an average length of sixteen inches, the longest largemouth bass on record is just over thirty-eight inches long. We'll discover that fishing is a great outdoor activity that can teach you to have more patience and dedication. Next, we'll join Jet, Bulldog, and Hot Shot when they head to D.C.'s Ward 8 to play a classic playground game with champion little leaguers, the D.C. Kings. We'll find out that American baseball may have derived from an English sport called Rounders. Also, we'll learn that the first official baseball game was played in 1846 while the first basketball game was played in 1891.
