state 2016 budget and outlook of the 2017 budget and Legislative session in January of 2017. He stated that because of the downturn in the oil and natural gas industries, the state of New Mexico lost ONE BILLION dollars in the last budget year and had to make drastic cuts in the 2016 budget year along with many transfers from one department to another to adjust the budget. He stated the 2017 budget will be dealt with during the January 2017 State Legislative Session. Our community is heavy in state jobs and thus may face hard times in the state job market. I asked him if our state should not think about diversifying itself in job creation so we don't have to depend so heavy on the oil and gas industry for our state budget, like further developing the sun and wind energy industry and perhaps discussing the possibility of legalizing recreational marijuana which has been discussed in recent years as a way of raising the state's budget.
