CIVIC ISSUES:

5/03/15 5:00AM 00:10:20

VIEW POINTS: SEGMENT 2: When we learn about the Bill of Rights in school, we often look at it as ten separate amendments to our Constitution instead of as a single, well-structured work, like a poem or symphony. Our guest didn't see this either, until he needed a document to type while practicing his word processing program. We'll hear about his realization that the Bill of Rights is, indeed, a cohesive and carefully plotted document, how it captures the essence of democracy that our forefathers fought for, and how, in modern cases, he thinks some Supreme Court decisions undermine the founders' intentions. Host: Marty Peterson. Guests: Burt Neuborne, Norman Dorsen Professor of Civil Liberties at NYU Law School, former National Legal Director of the ACLU, author of the book, *Madison's Music: On reading the First Amendment*. **COMPLIANCY ISSUES COVERED:** Law; War & Military; Judicial System; Government; American History

5/10/15 5:00AM 00:11:29

VIEW POINTS: SEGMENT 2: The Atomic Age is credited mostly to men like Einstein, Oppenheimer and Fermi. Although there's no question that these eminent scientists were leaders in the development and understanding of nuclear power, there were also many women who contributed knowledge and sometimes their health and lives, but who are overshadowed by the men. We talk to two authors whose books give these women the recognition they deserve. Host: Marty Peterson. Guests: Craig Nelson, author of "The Age of Radiance: The epic rise and dramatic fall of the Atomic Era." Denise Kiernan, author of the best-selling book, "The Girls of Atomic City," now in paperback. **COMPLIANCY ISSUES COVERED:** Women's Issues; Science; War; Education; Health

5/10/15 5:30AM 00:06:54

RADIO HEALTH JOURNAL: SEGMENT 1: Many people will have to deal with a natural disaster at some point in their lives. Two civil defense experts discuss how to be ready before it comes. Host: Nancy Benson. Guests: Jonathan Jones and Kylene Jones, co-authors, *The Provident Prepper: A Common Sense Guide to Preparing for Emergencies* **COMPLIANCY ISSUES COVERED:** natural disasters; emergency preparedness; public safety and public health

6/07/15 5:00AM 00:11:58

VIEW POINTS: SEGMENT 1: We've heard a lot about climate change and global warming over the past 20 years or so, but ironically people care about it *less* now than they did a decade ago! We talk to a researcher and author about how the framing of climate change can skew

VIEW POINTS: SEGMENT 2: After World War I there was a great conflict in Turkey and many Christians and others were killed. The city of Smyrna was set ablaze and even more people had to run to the beaches just to escape the flames. Refugees poured into the city from towns and rural areas and soon there were tens of thousands stranded on the shore with nowhere to go. We'll hear how governments and diplomats in the West all but ignored their plight, and how the efforts of one brave relief worker and a Navy commander finally brought the victims to safety. Host: Marty Peterson. Guests: Lou Ureneck, Professor of Journalism at Boston University, author of *The Great Fire: One American's mission to rescue victims of the 20th century's first genocide*. **COMPLIANCY ISSUES COVERED:** International Politics; Military; Religion; Business; Refugee Relief

VIEW POINTS: SEGMENT 2: There has been a debate going on for decades over Social Security and it's future. Sometimes we hear that it's going to go bankrupt; other times politicians want to scrap part of it and have workers find commercial financial instruments for their retirement; still others want to cut money paid out to retirees, their survivors and the disabled. We talk to an author and researcher about his ideas on why Social Security is important, isn't going broke, and how it can be expanded and funded with modest increases in the future. Host: Gary Price. Guests: Eric J. Kingson, Prof. of Social Work, Syracuse University, N.Y., author with Nancy J. Altman of the book, *Social Security Works! VIEW POINTS: SEGMENT 1: Many ecologists, farmers and members of the public are worried that non-native plants and animals are invading the U.S. and preventing native species from thriving. Much money and time is spent trying to rid the land of these aliens – often to no avail. But are these species present because they're the only ones that can thrive in an area? Are they multiplying because of something bad we're injecting into their environment? Are these aliens actually helping nature create a diverse and robust environment? And are those so-called native species of plants and animals *really* native? Our guests have some surprising answers to those questions. Host: Gary Price. Guests: Fred Pearce, science journalist, researcher, and author of *The New Wild: Why invasive species will be nature's salvation*. Tao Orion, permaculture educator, author of *Beyond the War on Invasive Species: A permaculture approach to ecosystem restoration*. **COMPLIANCY ISSUES COVERED:** Environment; Agriculture; Public Safety

VIEW POINTS: SEGMENT 2: Bringing a new baby into the home is a wonderful – and chaotic – experience, and it's often made more chaotic when mom and dad have to rush back to work shortly after the child is born. Financial reasons and the stigma of staying home if you're a man, keep parents away from their children at a time in their lives when they're needed the most. We talk to an author – and a dad who fought for his rights – about why it's important for employees to receive paid family leave to take care of new babies, sick relatives and elderly parents. He also explains why paid leave is good for business and the economy. Host: Marty Peterson. Guest: Josh Levs, journalist,
