

CALM CERTIFICATE

Baby Network Limited certifies it is in compliance with the Federal Communications Commission's Commercial Advertisement Loudness Mitigations ("CALM") Act rules in 47 C.F.R. Section 76.607 as of January 30th 2013.

Dated January 30th 2013.

Liran Talit
Managing Director
Baby Network Limited

CALM Act Certification

This is to certify that: **Big Ten Network and associated alternates**

1. As required by Section 76.607 of Title 47 of the Code of Federal Regulations, all commercial advertisements embedded in programs carried on the FOX network are in compliance with the loudness control practices contained in Advanced Television Systems Committee (ATSC) A/85: Recommended Practice: Techniques for Establishing and Maintaining Audio Loudness for Digital Television ("ATSC A/85 Recommended Practice") at the point of distribution by the FOX network to authorized reception equipment of downstream multichannel video programming distributors.
2. Compliance with the ATSC A/85 Recommended Practice is determined by the FOX network through the use of equipment and associated software that is installed, utilized and maintained in a commercially reasonable manner.

C1414BNC

Dear Hernan,

This communication is to confirm that the Utilisima network's operational system includes a two channel Miranda software solution that is ALC activated on the Miranda HCO-1822 protect switch at the end of the air chain, which is fully integrated into both the primary and back up signal paths of Utilisima's network origination system.

This system has been configured with a target value of -24 LKFS dialnorm and has been tested with a Dolby LM100 loudness meter, to confirm that the Utilisima network signal conforms to the Calm Act's technical guidelines under the ATSC's "Recommended Practice: Techniques for Establishing and Maintaining Audio Loudness for Digital Television" ("A/85 RP"). This testing, performed within the Encompass environment, demonstrated that the Utilisima signal has effective loudness control at the demarcation point of the Encompass system. Please note that downstream processing, such as may happen with distribution systems providing commercial insertion, are not under the control of Encompass and may affect the solution as implemented at Encompass.

Encompass has implemented this loudness mitigation system at Utilisima's request, in order to assist Utilisima in its CALM Act compliance efforts. As the service provider for Utilisima's network playout and signal distribution, Encompass is confident that the design of the network origination system provided by Encompass for the distribution of the Utilisima signal meets the current CALM Act compliance requirements.

Per your request, we will also provide an annual 24 hour compliance recording. Additionally, we understand that you may have additional documentation requests related to confirming CALM Act compliance; please send any such documentation for our review.

Should you have any further questions, do not hesitate to contact John Halpin in our business affairs department at 323-344-4747, jhalpin@encompass-m.com.

Sincerely,

ENCOMPASS DIGITAL MEDIA

CALM Act Certification

This is to certify that: **YES Network, LLC and associated alternates**

1. As required by Section 76.607 of Title 47 of the Code of Federal Regulations, all commercial advertisements embedded in programs carried on the YES Network are in compliance with the loudness control practices contained in Advanced Television Systems Committee (ATSC) A/85: Recommended Practice: Techniques for Establishing and Maintaining Audio Loudness for Digital Television ("ATSC A/85 Recommended Practice") at the point of distribution by the YES Network to authorized reception equipment of downstream multichannel video programming distributors.
2. Compliance with the ATSC A/85 Recommended Practice is determined by the YES Network through the use of equipment and associated software that is installed, utilized, and maintained in a commercially reasonable manner.

Executed this 5 day of July 2013
