

PROGRAM / ISSUES REPORT SUPPLEMENT

Second Quarter 2013

I, Stuart Muck, as Chief Engineer of WIWN (TV) DTV Channel 5.1, Fond du Lac, Wisconsin, hereby certify that for the period of April 1, 2013 to June 30, 2013 that WIWN (TV) aired a total of 15 minutes per hour, every hour, of every day, specialized local weather forecasts. These local forecasts were video presentations of the weather forecasts for the Milwaukee designated market area, and, in addition, these forecasts included the current temperatures of the Milwaukee area, the forecasted temperatures, radar imagery, wind speeds, air quality, UV indexes, and 7 day extended forecasts. These occurred on the "fives" of each hour: :05, :15, :25, :35, :45 and :55 (except for the three (3) hours per week when Children's Programming aired). Moreover, any and all weather reports, announcements and warnings for the Milwaukee area from the National Weather Service were broadcast over WIWN to its Milwaukee area viewers (Winter Storm Warnings, Severe Thunderstorm Warnings, Tornado Watches, etc).

Confirmed on January 13 2014.
