| Date Time: Duration: | 11/3/2017 4pm 60m | crowded? For years, we have been warned about the looming danger of overpopulation: people jostling for space on a planet that's busting at the seams and running out of oil and food and land and everything else. It's all bunk. The "population bomb" never exploded. Instead, statistics from around the world make clear that since the 1970s, we've been facing exactly the opposite problem: people are having too few babies. Jonathan Last is here to explain why the population implosion happened and how it is remaking culture, the economy, and politics both at home and around the world. Because if America wants to continue to lead the world, we need to have more babies. |
