Guys	dominating the final weeks of the 2016 campaign, we're taking a look at the history of political debate in America. Do Americans like to argue with –or past – each other? From the popularity of amateur debate clubs among young men in the late 18th century, to the famed Lincoln-Douglas debates in 1858, and Gerald Ford's infamous gaffe in the 1976 presidential debate, Ed, Brian, and Peter unpack the central role of debating in American democracy. Both Donald Trump and Hillary Clinton have talked about loss of manufacturing jobs, and the importance of having things "Made In America." From 18th century colonists struggling to produce that most coveted of items -- porcelain -- to the invention of nylon stockings and the TV picture tube in the 20th century, Peter, Ed, and Brian explore the surprising history behind five inventions and innovations. Rooted in legend and culture, American horror plays on our fears while often providing a distraction from the real sources of anxiety. to be nostalgic for the consistently high voter turnout in the late 19th century, until you consider all the people who weren't eligible to vote back then. In this episode of BackStory, the History Guys look at voting trends - from the changing mechanisms of voting to how the electoral college system maintained racial hierarchies in the South.
