AMERICAN LIFE LEAGUE

3-1-14, 3-10-14, 3-15-14

3 Min

Michael Hichborn ; American life league

Planned Parenthood has come under fire by those who seek to federally defund the program. The Hyde Amendment, passed in the 1970s, makes it illegal for the federal government to pay for abortions except in the cases of rape, incest, and life endangerment. This is not to say that Planned Parenthood does not receive money from the federal government. In 2010 the organization reported receiving \$363.2 million in federal grants and contracts. Title X federal funding and Medicaid reimbursements regularly go to Planned parenthood to cover its expenses for condoms, birth control pills and sex education programs. Critics argue that this money frees up non-federal money so that it can be used by Planned Parenthood to perform more abortions.

Almost all of the world's false religions began at the tower of Babel and almost all of them have a few things in common that include the mother/son cult of Semiramis (the queen of Babylon) and Tammuz (her son that is said to also be her reincarnated husband Nimrod). This mother/son cult also is the source of Mother Earth and Gaia worship or feminism. Brannon explains how Feminist Gnosticism and Patriotic Gnosticism have infiltrated America and many churches. All of these movements can be traced right back to Babylon cults that are today building the Mother of Harlots and false church of Revelation 17.

According to Jeff Godwin, rock and roll music traces its origins back thousands of years. Its rhythms were written by Satan and his demons and have a subliminal power to control a listener's mind. He further believes that "Christian Rock" is a satanic diversion. According to him, most Christian Rock performers are either explicitly in league with Satan or unwittingly duped by him. Godwin says, "In the years we've been involved in this ministry, my wife and I have had the privilege of meeting many hundreds of Christian teens and young adults at our Rock music seminars and other speaking engagements across the country. When the total hypocrisy behind Christian Rock is revealed to them, four reactions usually follow: Anger, Confusion, Denial, and Delusion."

Dr. Faulkner explores the existence of black holes, dark matter and dark energy. He separates the issues of physics and good science from evolutionary musings! He shows that there is a good case for black holes without any evolutionary involvement. Black holes and dark matter quite literally take our understanding physics to its breaking point, and they illustrate how God's Creation holds many mysteries, while pointing undeniably to the Creator and Savior Himself!

Don DeYoung Ph.D. discussed: Where the Moon came from, How Old it is, and What its Purpose is. He elaborated on some of man's theories of how the Moon came to be. Some thought it was formed through Fission, Capture, Nebula, or Collision. These all have their own fallacies. Some were good until 1969 when our astronauts landed on the Moon and took samples.

Creation seems to be most logical because of its orbit and placement in relationship to the Earth.

However, if you had a little-bit-of-luck in one generation to the next, you could work up to complexity all you need is 'time'! Dr. Michael Denton stated that Darwinism cannot explain the transformation of simple life forms into complex creatures by random processes!

The Bible says, "For in Six Days, the LORD made Heaven and the Earth, the sea, and all that in them is, and rested the Seventh Day." What does the word 'day' mean? 24 hours? Millions of Years? Does it matter What a Christian believes? Ken Ham addressed these questions. For those 'believing in evolution,' they must have millions of years to satisfy their theory! Some argue that the word 'Day' can mean a period of time, but can it also mean 24 hours too? In Genesis, the Creation Days are always prefaced by the phrase, "The Evening and Morning were the '# Day.'" Thus, signifying a 24 hour day..

3-14-14, 3-15-14, 3-15-14, 3-17-14

55 min Dr. John Morris and Steven Austin

Dr. John Morris and Steven Austin told how the forming of the Grand Canyon could best be explained as result of a global flood. Both evolutionists and creationists see the same rock layer data. The evolutionist interprets its formation through a uniformitarian perspective of which oceans covered the area and receded over millions of years. Creationists interpret it through a catastrophic perspective that a worldwide flood laid down and cut through the layers. Marine fossils at the 7,000 foot level give evidence that an ocean covered the continent; Intact fossils of soft bodied organisms indicate rapid burial and widespread strata of horizontal continuity with thin layers can be followed for 200 miles indicate a widespread flood depositing a layer of sand.

Conditions after the Great Flood were conducive for creating glaciers: great upheavals with cold summers and abundant snowfall. There is no credible evidence for multiple Ice Ages in the past or for another in the future.

ANSWERS CREATION HOUR # Death the Enemy

3-17-14, 3-18-14, 3-18-14, 3-19-14

58:30

Ken Ham

The meaning of anything is tied up in its 'origin.' Our origin was 'perfect and good' as described in Genesis. Genesis describes the reason for the 'first death' when God killed at least one animal to provide 'coats of skin' for Adam and Eve as an 'atonement' for sin. Death is an Enemy to Man's World. Man now 'lives' in a 'fallen world.' Death is an intrusion and repulsive to Man's World. Evolution puts Death and Time together. The Fossil Record displays the Death of many living things as a result of a world-wide flood. Such a flood is described in Genesis during Noah's Time. Evolution teaches that 'Death' is part of the 'evolutionary process.' After 'millions of years of Death, Man evolved. It is a 'Tree of Death.' Is 'Death' the 'End?' The Evolutionist says, "YES!" The Creationist says, "God Created Man with 'LIFE' and Sin brought the Judgment of Death, The Bible puts 'Sin and Death' together, and the Giving of His Son for Sin's Payment as the Restoration of Eternal Life.

Dr. Paul A. Nelson examined what 'the simple cell' is made up of. Scientists who are Evolutionists attempt to build 'the simple cell' from the 'Bottom-Up,' from nothing to something. Scientist that are Creationists will examine a cell from the 'Top-Down,' beginning with the created cell itself. They will 'take-away' its components one item at a time to see if it is needful for life. s. The Simple Cell require a multitude of proteins to function. It requires Proteins: to build a cell envelope to live in; to metabolize energy, convert raw materials to energy; to translate DNA; to turn DNA into RNA; for cellular processes, like dividing; DNA replication, making copies of DNA; and transport regulatory functions.

ORIGINS #0651- The Hearing Ear

3-30-14

28 Min

Dr. David Menton, PhD

Dr. David Menton, PhD. Discussed the 'Hearing Ear' that we all possess. He described its ability to receive sound waves and convey those into information. The Ear is composed of the Outer, Middle and Inner sections. The opening of the ear is smaller than our finger, otherwise we would have our eardrums punched out before 6-months old! The tympanic membrane is located in the Middle Ear. When air pressure hits this membrane and the 3 tiny bones connected to it, it transfers that movement into bone-movement that is attached to the Inner Ear fluid canals. It eventually moves tiny hairs along cells up to 20,000 times a second, the highest frequency that most people can hear! An evolutionist has a difficult time with these intricacies, but the Bible informs us that God Created us.

THE BIBLE & SCIENCE # 2-4 The Flood & The Fossil Record

3-4-14, 3-5-14, 3-6-14, 3-8-14, 3-9-14

58:30

Dr. John C. Whitcomb

Dr. John C. Whitcomb considered what the effects a Genesis World-Wide Flood would have on the Earth. He pondered several questions: Where did all the water come from for the Flood? Where did all of the water go after the Flood? And How long did it take? The Bible answers all three. Now can we find sources of flood erosion over the whole earth? Can we find evidence of creatures being buried alive or shattered to pieces as a result of flood waters? The answer is found in Rock and Soil Erosion, Canyon formation and Fossil beds around the whole earth. Modern floods and volcanic eruptions show how plants and animals can be petrified or fossilized in matter of days.

Atty. Mat Staver and Steve Crampton analyzed how the homosexual agenda in America threatens traditional values and causing good people a lot of grief. In Ocean Grove, N.J. a church owns a pavilion that in some way must have been 'open to the public'. The church said that they would not allow 'civil unions' of same-sex couples to use. New Jersey has a 'Public Accommodations Law' that requires any public place to be 'available' for anyone to use. Vermont has a law that says Civil Unions are legal and Virginia has a law that says we will recognize only a marriage between a man and a woman. Isabella is a 5-year-old girl that is caught in between her mother in Virginia and a Lesbian partner of her mother in Vermont. She is having to live with both 'moms' and during the school year is being tugged by the two laws!

Modern American's are woefully ignorant of our Christian Heritage. It has been left out of our school textbooks for the last 100 years. He reviews the Christian Principles that are woven throughout our Constitution and explains the false issue of the separation of church and state that it was to keep anyone church from becoming the state church like all the European countries consisted of. He concludes on how to begin restoring America by praying and confessing our nation's sins before God so that Revival might begin among the Christian believers. Then becoming knowledgeable on candidates for public office and voting for those candidates that honor and respect our godly heritage and principles!

"All over America and the world at this hour there are churches that are drifting into New Evangelicalism without the remotest knowledge that they are doing so. They are being carried along with the shifting winds of compromise and have long since departed from the solid biblical position established by their predecessors. Young pastors, many without firm doctrinal underpinnings, have led their churches to believe that in order to reach the masses they must abandon the strict biblical principles of yore and embrace more fluid and attractive positions. Many saints, firmly indoctrinated by former pastors in clear and uncompromising positions, are now bewildered and drifting from church to church seeking some stability. "Perhaps nothing precipitates a slide toward New Evangelicalism more than the introduction of Contemporary Christian Music. ... This inevitably leads toward a gradual slide in other areas as well until the entire church is infiltrated by ideas and programs alien to the original position of the church."

The life span of Noah and the Healthy environment would enhance the 120-year construction process as well. Tim Lovett inquired of Naval Engineers further details that would benefit the Ark's steadiness. With a Fin on the front deck and a low stable rudder on the rear, it would line itself with the wind. In fact as Tim built his experimental models he noticed that the ancient Greeks had these same features! Perhaps that was something cared down from Noah?

"Speechless: Silencing the Christians," is how liberals and homosexual activists are outlawing Christianity and Judaism to force their sexual agenda on America . Christians are being silenced all across America: in political debate, in the public square, in the school, the workplace, even in their own churches. Claiming they only want "tolerance," a coalition of liberal secularists, homosexual activists, and Fortune 500 companies have waged war for years on Christians. In fact, they want Christianity itself to be redefined as a form of bigotry. Christian churches are being ordered by the government to perform gay marriages, despite the fact that such ceremonies violate their core teachings. Christians have been threatened with prison for exercising their First Amendment right to protest. So-called anti-bullying programs actually explicitly promote homosexuality in public schools. Proposed federal laws would make discrimination against Christian charities, including child adoption services, illegal. Christians throughout America are being harassed and intimidated and discriminated against by individuals, corporations, even by the federal government.

DNA was discovered by two scientists in 1953. They observed a 'Language of Code' in the Human Cell. Dr. Warner Gitt says a code System is always the result of a Mental Process (it requires an Intelligent Origin or Inventor.) Matter as such is unable to generate any Code. DNA is a language system and an information system, it could not come from matter on its own. This 'Information' The Bible talks about Noah bringing 'Kinds' of animal not every 'specie.' Gene combinations can be changed over time to form a variety of species 'within their kind.' The 'Information' has always been there previously, just altering within the 'Kind.' Erosion of canyons by mud-flow and water have been seen to take place within days at Mt St. Helen's. Eruption, thus demonstrating that the Grand Canyon may not have taken 'billions of years' to form. 'Intelligent Design' was examined with Dr. Richard Dawkins who thought if that could happen, it had to come from another planet in space, etc. (Not God). It comes to where you place 'your faith' in. Logic does not make sense in a world of evolution which supports everything by chance..

Atty. Mat Staver and Steve Crampton

Atty. Mat Staver and Steve Crampton discussed the role of the church on the Social Conscience of its community. The emphasis on separation of church and state today ignores influence of the church in our nation since its founding! Preachers preached political sermons when America was founded and it shaped our nation's character! Our nation was founded for a religious people. Religion gives a nation morality. Without morality, you have anarchy!

David Prentice PhD and Charmine Yost PhD discussed the two types of stem cell research. One with embryonic human beings and the other with adult human beings. Stem cells are the building blocks of the body. They replace or heal damaged tissues and cells. Certain stem cells are found in embryonic life, but destroy that life when harvested. After 35 years of embryonic stem cell research on humans and mice, there is very little evidence in effectively treating disease. Adult stem cells are found in bone marrow, skin, nose, and cord blood. Jackie Raybon is a high school student that was in a car accident and told that she would never walk again. Doctors took her own stem cells from her nose and healing in her spine has enabled her to walk with special equipment.

Many consider Putin and Russian power to be growing, but Russia is imploding. Overall population is declining while the Muslim population is growing, creating internal stresses and affecting foreign policy. Russian Muslims are demanding more mosques, creating conflicts with non-Muslims who fear they are taking over. The recent Iran nuclear deal approved by Pres. Obama allows Iran to continue its nuclear program and intercontinental ballistic missile development another six months without hindrance.

Palestinians who commit acts of terror against Israel receive generous monthly payments from the Palestinian Authority, which receives money from the U.S. government (American taxpayers) and other donors. Other humanitarian organizations also encourage terrorism; for example, by providing cameras (New Israel Fund) to groups which harass and provoke Israeli soldiers to capture photos for propaganda purposes, even putting their own children in danger. Americans need to use discretion in their personal donations and pressure congressmen not to fund terrorism.

He comes to school with an allegiance to our institutions, toward the preservation of this form of government that we have - patriotism, nationalism, and sovereignty. All that proves that children are sick, because a truly well individual is one who has rejected all of those things and is truly the international child of the future! PROGRAM DESCRIPTIONS

Air Date / Week Of:	The Foundations - The Relevance of Genesis (Ken Ham)
2/9 to 2/15/2014	Why is Genesis so important? Ken Ham uses news stories of recent events combined with Scripture to address today's most pressing issues. Includes scores of photos and illustrations, plus a mini-interview that reveals his passion for helping Christians to truly understand the distressing impact of disregarding the authority of Scripture.
Air Date / Week Of:	The Foundations - Revealing the Unknown God (Ken Ham)
2/16 to 2/22/2014	American culture has changed substantially, but our approach to evangelism has not. The key is to "de-Greekize" our families and our churches, beginning with ourselves! To truly reach today's culture we have to help them understand that God's Word is true as we spread the seed of the gospel.
Air Date / Week Of:	The Foundations - One Blood One Race (Ken Ham)
2/23 to 3/1/2014	Understanding what happened at the Tower of Babel is key to understanding the origin of nations, "races," prejudice, and much more! On the lighter side, this video uses Ken Ham's comical perspective on poodles to teach on natural selection and speciation.

PROGRAM DESCRIPTIONS

Air Date / Week Of:	1/5 to 1/11/2014	The Great Delusion (Ken Ham) Ken Ham shares why he believes that America is now under judgment—the wrath of God described in Romans 1. -Why have so many Americans turned their backs on God? -What are the ramifications of not believing the Bible and not submitting to the teachings of the Lord Jesus Christ? -How should we view our leaders (including the U.S. president) that govern this nation? It is vital for everyone to understand the delusion—the great lie against God and His Word that has swept the nation and is sweeping the world.
Air Date / Week Of:	1/12 to 1/18/2014	The Homosexual War (Todd Friel) For years Christians have been waving the American flag. Today homosexuals are victoriously waving the rainbow flag. Some would suggest it is time for us to raise the white flag. Perhaps there is a better, more biblical option. How should we discuss homosexuality at church? How do we respond to a child who "comes out"? How should we talk about gay people in the public realm? Join Todd Friel as he challenges all of us to reconsider how we should engage in the homosexual war that has been thrust upon us.
Air Date / Week Of:	1/19 to 1/25/2014	Rescuing Our Kids From The Lie (Ken Ham) This powerful presentation challenges Christians to help launch a new Reformation. Share it with your family, your friends, and your Sunday school leaders. Discover why Ken is convinced that like America, the church is under judgment, as well. Two-thirds of our children are now rejecting the faith of their parents. You can help rescue them from the faith-shattering deceptions of the Evil One!
Air Date / Week Of:	1/26 to 2/1/2014	Things That Go Bump in the Night (Dr. Danny Faulkner) Astronomer Dr. Danny Faulkner explores the existence of black holes, dark matter and dark energy. He separates the issues of physics and good science from evolutionary musings. Do black holes exist? What about dark matter? Dark energy? Weren't these things just made up to salvage evolutionary ideas? You'll learn that there is a good case for black holes with no need of evolutionary involvement. There's a good case for dark matter, too, while dark energy is a bit more speculative. Black holes and dark matter quite literally take our understanding of physics to its breaking point, and they illustrate how God's creation holds many mysteries, while pointing undeniably to the Creator and Savior Himself!
