New numbers from the Census Bureau show the U.S. population is older than it's ever been, with the nation's median age over 38. William Brangham spoke with Philip Bump and Wendy Edelberg about how an older America could pose significant challenges for the economy, workforce and social programs in the years to come.

America was introduced to Morrie Schwartz nearly 30 years ago when he spoke with Ted Koppel about his battle with ALS, sharing his unflinching and thoughtful reflections on dying. In the years after Schwartz's death, his son found a manuscript. Rob Schwartz edited his father's words into "The Wisdom of Morrie: Living and Aging Creatively and Joyfully." He discussed the new book with Geoff Bennett.

More than 90 percent of deaf children in the U.S. are born to hearing parents. For them, the path forward can be difficult and also controversial. The advent of cochlear implant technology has the opportunity to change lives, yet many deaf advocates say not teaching sign language is a risky proposition. Rhode Island PBS Weekly's Pamela Watts reports on the stark choices some parents face.

Episode Title: Episode 1
Length: 60 minutes
Airdate: 4/17/2023 3:00:00 PM
Service: PBS
Format: Documentary
Segment Length: 00:00:00

A Yellowstone winter is a brutal one. With temperatures that plunge down to minus 40 degrees Fahrenheit the wildlife has to find strategies to survive. Some animals leave, some hide and some tough it out. Grizzlies hunker down and hibernate, but this winter the temperatures have been erratic and some bears are emerging early. Finding food is a huge challenge, but our camera crews follow one male who's lucky enough to hit the jackpot and find a bison that's been released from its icy tomb down in the valley. But he has to hang onto it whilst the scavengers hassle him. Great Gray owls suffer as their prey hides under an icy layer of snow that proves almost impossible to break through. Will this lack of food affect their mating and ability to raise a family in the Spring? Cameraman Jeff Hogan is following them to find out. And top wolf biologist Doug Smith explains why he's concerned about the number one predator. With a winter that's had less snow than usual it's favored the prey and the wolves are starving hungry. Host Kirk Johnson who's the Sant Director of the National Museum of Natural History in Washington, visits this unique wilderness to unravel the story of this particular winter in Yellowstone.

Segment Length: 00:00:00

Our cameras continue to follow the wildlife dramas in Yellowstone, and Spring brings many new challenges. Whilst the brutal cold temperatures and deep snow of winter have gone, the weather is still erratic and there's the impending danger of the Thaw. When temperatures are high enough to melt the snowpack, millions of tonnes of water will cascade down the mountain, bulldozing everything in its path. Wildlife cameraman Jeff Hogan discovers a nest of Great Gray owls. There are three chicks, but one is a runt, significantly smaller than its siblings and at risk of starvation. And when the worst storms for years hit the Beartooth Mountains, Jeff wonders whether it can hang on. Down on the Snake River the family of beavers is busy making the most of the Spring vegetation. Infra red cameras give Jeff and host Kirk Johnson a secret view of life inside the lodge, as the beavers squabble over food. Kirk also dons a dry suit to head underwater to admire the engineering skills of these rodents. Massive boulders and branches are there to strengthen their dams, but will they be enough to withstand the Thaw. When the torrent of water begins to hit, Kirk joins a hydrologist to help measure the water flow in the rivers and work out how this year's weather has affected the Thaw. And bear expert Casey Anderson follows a mother grizzly and her cubs - and explains that the biggest dangers come not from other predators, but surprisingly from their own kind.

The year is 2013; the location, Guatemala. A fisherman struggling to feed his family is forced further offshore in a search for food. In an act of desperation, he guns his small boat straight out to sea and into dangerous waters. With no land in sight, the sun blazing, the fisherman cuts his engine and peers over the side of his boat. His expression transforms to utter disbelief. He is sitting atop a coral reef no one knew existed, and the reef is massive, five times the size of Manhattan and teeming with life. It is like a window back in time when Caribbean corals were thriving. The discovery is part of an even bigger story, marking an exciting new chapter in understanding corals, the fish that need them and the battle to save coral reefs all over the world.

Waterholes are vital to the African ecosystem; bustling oases where elephants, lions, leopards and hundreds of other species meet and compete for water. But little is known about how they support so much life. Now the BBC Studios Natural History Unit and PBS are working with Mwiba Wildlife Reserve and local communities in Tanzania, to build the world's first waterhole with a built-in specialist camera rig. With half-submerged and weather-proofed remote cameras, Dr. M. Sanjayan leads a team to uncover the complex dynamics of the waterhole for the very first time. Filming will take place across 3 dramatic periods: the middle of the dry season, the hottest time of year and the height of the first rains to gain unique insights into the lives of some of Africa's most iconic animals. As warthogs, giraffes, monkeys and big cats all jostle for position at the new waterhole the team uncovers the increasingly important role of water in Africa as its wildlife faces the growing impact of climate change.

Segment Length: 00:55:40

The year is 2013; the location, Guatemala. A fisherman struggling to feed his family is forced further offshore in a search for food. In an act of desperation, he guns his small boat straight out to sea and into dangerous waters. With no land in sight, the sun blazing, the fisherman cuts his engine and peers over the side of his boat. His expression transforms to utter disbelief. He is sitting atop a coral reef no one knew existed, and the reef is massive, five times the size of Manhattan and teeming with life. It is like a window back in time when Caribbean corals were thriving. The discovery is part of an even bigger story, marking an exciting new chapter in understanding corals, the fish that need them and the battle to save coral reefs all over the world.

Length: 60 minutes
Airdate: 5/3/2023 8:00:00 PM
Service: PBS-NPS
Format: Documentary
Segment Length: 00:56:46

David Attenborough presents seven of the most remarkable animal songs found in nature and explores the significance of these songs in the lives of their species. Each one

- from the song of the largest lemur to the song of the humpback whale to the song of the lyrebird - was recorded in his lifetime. But will they soon be heard no more? Contrary to Charles Darwin's theory of sexual selection, a new generation of scientists have discovered that animal song is not just the preserve of males. Females sing too. But there are also fears that we do not have much longer to hear them. Because as humankind gets noisier, the rest of the planet is falling silent. Joyous, surprising and poignant, this story of pioneering research and astounding insight is a chorus of wonder and a wake-up call.

In this episode we see why marine species are drawn to the coasts of Australia and discover that the country's three surrounding oceans - the Southern Sea, the Pacific and The Indian Ocean create a unique environment for ocean voyagers of all types. In the clean waters of Pearson Island off South Australia Sealions, once a rare sight are now protected from hunting and are thriving. Meanwhile in the shallows of Spencer Gulf, June is the time for a midwinter gathering of spectacularly colourful giant cuttlefish who battle for mates. The cold Southern Ocean also brings humpback whales from Antarctica to give birth and triggers the breath-taking spectacle of thousands of Australian spider crabs, the largest crustaceans in the world, congregating under the piers of Port Philip Bay to moult. It's a grisly time as the first to reveal their soft shells are cannibalised by their neighbours. Still, there's safety in numbers as bigger predators, smooth stingrays, sweep over the congregation sucking them from the seabed.

Floods are inundating vast swaths of southern Ukraine and rescue and salvage efforts are underway as the waters keep rising. Tuesday's dam collapse unleashed a humanitarian and ecological disaster in a nation already suffering from 16 months of war. Geoff Bennett discussed the ongoing rescue and relief efforts with Ewan Watson of the International Committee of the Red Cross.

In 1961, segregation seemed to have an overwhelming grip on American society. Many states violently enforced the policy, while the federal government, under the Kennedy administration, remained indifferent, preoccupied with matters abroad. That is, until an integrated band of college students ? many of whom were the first in their families to attend a university ? decided, en masse, to risk everything and buy a ticket on a Greyhound bus bound for the Deep South. They called themselves the Freedom Riders, and they managed to bring the president and the entire American public face-to-face with the challenge of correcting civil-rights inequities that plagued the nation.

Episode Title: The Murder of Emmett Till

Length: 60 minutes
Airdate: 4/15/2023 8:00:00 PM
Service: PBS
Format: Documentary
Segment Length: 00:00:00

In August 1955, a 14-year-old black boy from Chicago whistled at a white woman in a grocery store in Money, Mississippi. Emmett Till didn't understand that he had broken the unwritten laws of the Jim Crow South. Three days later, two white men dragged him from his bed in the dead of night, beat him brutally and shot him. Although his killers were arrested and charged with murder, they were both quickly acquitted by an all-white, all-male jury. Soon after, the defendants sold their story, including a detailed account of how they murdered Till, to a journalist. The murder and the trial horrified the nation and the world. Till's death was a spark that helped mobilize the civil rights movement. Three months after his body was pulled from the Tallahatchie River, the Montgomery Bus Boycott began.

The fact that our country is divided isn't new. In many respects, it can be traced back to the founding of a nation on the promise of freedom while dependent on slavery, a time when many couldn't participate in the democracy being created. Judy Woodruff examines how that founding contradiction has evolved and what it means for our challenges today. It's part of her series, America at a Crossroads.

Throughout the pandemic, Asian Americans have endured racist and physical threats. As our country celebrates Asian American and Pacific Islander Heritage Month, new research is calling attention to this rise in anti-Asian sentiment and the toll it's taking on Asian American communities. Amna Navaz discussed this with Norman Chen, CEO of the Asian American Foundation.

A pair of new studies from the Journal of the American Medical Association found that the toll of racial disparities in health for Black Americans is even starker than we knew. From 1999 to 2020, Black Americans experienced 1.63 million excess deaths compared to white Americans and COVID widened the gap even further. Amna Nawaz discussed the significance of this data with Dr. Lisa Cooper.

Even before the Civil War, African Americans, both slave and free, were settling in Oklahoma. By the turn of the century, the territory was dotted with all-black communities, but none as extraordinary as Greenwood, in Tulsa. Segregation kept blacks apart from white Tulsans, but black Greenwood thrived. Black residents built and supported two movie houses, two newspapers, 15 grocery and drug stores, 13 churches, and a number of restaurants, funeral parlors, clubs and hotels. In 1921, angry whites looted and burned Greenwood to the ground in one of the most vicious race riots the nation had ever seen. But tough, enterprising black citizens rebuilt a new Greenwood from the ashes, making it stronger and more alive than ever. By 1936, the neighborhood boasted the largest concentration of black business in the United States. But the Greenwood that fought its way back from racial violence of the 20s couldn't survive the progressive policies of integration and urban renewal of the 60s. In a nostalgic celebration of old-fashioned neighborhood life, the black residents of "T-Town" relive their community's remarkable rise and ultimate decline. Ossie Davis narrates.

Episode Title: Stonewall Uprising
Length: 90 minutes
Airdate: 6/10/2023 8:00:00 PM
Service: PBS
Format: Documentary
Segment Length: 00:00:00

"Stonewall Uprising" explores the dramatic event that launched a worldwide rights movement. Told by those who took part, from drag queens and street hustlers to police detectives, journalists and a former mayor of New York, and featuring a rich trove of archival footage, this film revisits a time when homosexual acts were illegal throughout America, and homosexuality itself was seen as a form of mental illness. Hunted and often entrapped by undercover police in their hometowns, gays from around the U.S. began fleeing to New York in search of a sanctuary. Hounded there still by an aggressive police force, they found refuge in a Mafia-run gay bar in Greenwich Village, the Stonewall Inn. When police raided Stonewall on June 28, 1969, gay men and women did something they had not done before: they fought back. As the streets of New York erupted into violent protests and street demonstrations, the collective anger announced that the gay rights movement had arrived.

In 2006, under the neon lights of a gay-friendly neighborhood in New York City, a group of African-American lesbians were violently threatened by a man on the street. The women fought back and were later charged with gang assault and attempted murder. The tabloids quickly dubbed them a gang of "Killer Lesbians" and a "Wolf Pack." Three pleaded guilty to avoid a trial, but the remaining four—Renata, Patreese, Venice and Terrain—maintained their innocence. The award-winning *Out in the Night* examines the sensational case and the women's uphill battle, revealing the role that race, gender identity and sexuality play in our criminal justice system.

Length: 90 minutes
Airdate: 6/24/2023 8:00:00 PM
Service: PBS-NPS
Format: Documentary
Segment Length: 00:00:00

This program is an in-depth portrait of James Baldwin, one of the greatest American authors of the 20th century. Using archival material that reflects Baldwin's worldwide influence and appeal, the film includes interviews with family members, friends and notable colleagues, including Maya Angelou, Toni Morrison, William Styron, Amiri Baraka, Richard Avedon, and Bobby Short, among others. Segments were filmed in France, Turkey, and Harlem, all places where Baldwin lived. Through Baldwin's work as a writer (ever since his first book in 1953, "Go Tell It On The Mountain"), he has helped mobilize the civil rights movement, brought new awareness and compassion to both black and white readers, and shed light on what it is like to be black in America.

The PGA Tour is merging with the Saudi-backed LIV Golf. The stunning announcement ends months of bitter legal fights between the rival groups. The PGA says the move will unify the game of golf, but critics and human rights activists argue the merger will stain the legacy of the tour, given LIV's ties to the Saudi royal family. Amna Nawaz discussed the move with Brendan Quinn of The Athletic.
