

CUMULUS

KGGO/KWQW/KJY/KHKI/KBGG

Chief Operator Designation

It is herein posted that Tigran Grant is the designated interim Chief Operator of KGGO, KHKI, KBGG Des Moines, Iowa; KJY West Des Moines, Iowa; and KWQW Boone, Iowa licensed to Cumulus Media Inc., herein referred to as the stations, as defined under 47-CNFR-73-1870. The designated Chief Operator is herein charged with maintaining the operation of the stations within the terms and conditions of all the corresponding FCC Licenses, and to maintain all technical operations of the stations within the requirements of the Federal Communications Rules and Regulations. The Chief Operator is empowered with the necessary authority, in cooperation with the Vice President/Market Manager of the stations, to carry out this charge.

During times when the Chief Operator is unavailable to perform the assigned duties, Jonathan Monk will act as Chief Operator with the same responsibility and authority as the Chief Operator. In the event that both the Chief Operator and the Alternate Chief Operator are unavailable to perform the assigned duties, the designation of an interim Chief Operator will be made and posted on the Employee Bulletin Board.

This designation is made on November 16, 2016 and supersedes any previously made designation.

Craig R. Hodgson

Vice President/Market Manager
Cumulus Media Inc. – Des Moines

The undersigned herein acknowledges the designation of Chief Operator and Alternate Chief Operator effective the date noted above.

Tigran Grant

Jonathan Monk

FEDERAL COMMUNICATIONS COMMISSION
ANTENNA STRUCTURE REGISTRATION**

NOV 21 REC'D

Owner: Citadel Broadcasting Company

FCC Registration
Number (FRN): 0001595214

Citadel Broadcasting Company 7201 W. Lake Mead Blvd., Suite 400 Las Vegas, NV 89128	Antenna Structure Registration Number: 1061891
	Issue Date: 11-14-2003
Location of Antenna Structure: NW 100TH STREET, 1.4 KILOMETERS NORTH OF INTERSTATES 35 & 80 GRIMES, IA	Ground Elevation (AMSL): 296.6 meters
	Overall Height Above Ground (AGL): 152.4 meters
Latitude 41-39-53.0N	Longitude 93-45-25.0W NAD83
Overall Height Above Mean Sea Level (AMSL): 449.0 meters	
Painting and Lighting Requirements: FCC Paragraphs 1, 3, 4, 13, 21.	
Special Conditions:	

This registration is effective upon completion of the described antenna structure and notification to the Commission. **YOU MUST NOTIFY THE COMMISSION WITHIN 24 HOURS OF COMPLETION OF CONSTRUCTION OR CANCELLATION OF YOUR PROJECT, please file FCC Form 854.** To file electronically, connect to the antenna structure registration system by pointing your web browser to <http://wireless.fcc.gov/antenna>. Electronic filing is recommended. You may also file manually by submitting a paper copy of FCC Form 854. Use purpose code "NT" for notification of completion of construction; use purpose code "CA" to cancel your registration.

The Antenna Structure Registration is not an authorization to construct radio facilities or transmit radio signals. It is necessary that all radio equipment on this structure be covered by a valid FCC license or construction permit.

You must immediately provide a copy of this Registration to all tenant licensees and permittees sited on the structure described on this Registration (although not required, you may want to use Certified Mail to obtain proof of receipt), and display your Registration Number at the site. See reverse for important information about the Commission's Antenna Structure Registration rules.

OBSTRUCTION MARKING AND LIGHTING SPECIFICATIONS FOR ANTENNA STRUCTURES
It is to be expressly understood that the issuance of the below specifications is in no way to be considered as precluding additional or modified markings or lighting as may hereafter be required under the provisions of Section 303(q) of the Communications Act of 1934, as amended.

- 1 Antenna structures shall be painted throughout their height with alternate bands of aviation surface orange and white, terminating with aviation surface orange bands at both top and bottom. The width of the bands shall be equal and approximately one-seventh the height of the structure, provided however, that the bands shall not be more than 30.48 meters (100 feet) nor less than .46 meters (1 1/2 feet) in width. All towers shall be cleaned or repainted as often as necessary to maintain good visibility.
- 3 There shall be installed at the top of the structure one 300 m/m electric code beacon equipped with two 620- or 700-watt lamps (PS-40, Code Beacon type), both lamps to burn simultaneously, and equipped with aviation red color filters. Where a rod or other construction of not more than 6.10 meters (20 feet) in height and incapable of supporting this beacon is mounted on top of the structure and it is determined that this additional construction does not permit unobstructed visibility of the code beacon from aircraft at any normal angle of approach, there shall be installed two such beacons positioned so as to insure unobstructed visibility of at least one of the beacons from aircraft at any normal angle of approach. The beacons shall be equipped with a flashing mechanism producing not more than 40 flashes per minute nor less than 12 flashes per minute with a period of darkness equal to approximately one-half of the luminous period.
- 4 At approximately one-half of the overall height of the tower one similar flashing 300 m/m electric code beacon shall be installed in such position within the tower proper that the structural members will not impair the visibility of this beacon from aircraft at any normal angle of approach. In the event this beacon cannot be installed in a manner to insure unobstructed visibility of it from aircraft at any normal angle of approach, there shall be installed two such beacons. Each beacon shall be mounted on the outside of the tower at the prescribed height.
- 13 On levels at approximately three-fourths and one-fourth of the overall height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in an aviation red obstruction light globe shall be installed on each outside corner of the structure.
- 21 All lights shall burn continuously or shall be controlled by a light sensitive device adjusted so that the lights will be turned on at a north sky light intensity level of about 35 foot candles and turned off at a north sky light intensity level of about 58 foot candles.

Call sign: KGGO

This license expires 3:00 am.
local time: February 01, 1990

License File No.: BMLH-870212KB

This authorization re-issued to reflect a call sign change from KGGO-FM to KGGO effective 1/24/94.

Subject to the provisions of the Communications Act of 1934, subsequent acts and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions set forth in this license, the licensee is hereby authorized to use and operate the radio transmitting apparatus herein described.

This license is issued on the licensee's representation that the statements contained in licensee's application are true and that the undertakings therein contained so far as they are consistent herewith, will be carried out in good faith. The licensee shall, during the term of this license, render such broadcasting service as will serve the public interest, convenience, or necessity to the full extent of the privileges herein conferred.

This license shall not vest in the licensee any right to operate the station nor any right in the use of the frequency designated in the license beyond the term hereof, nor in any other manner than authorized herein. Neither the license nor the right granted hereunder shall be assigned or otherwise transferred in violation of the Communications Act of 1934. This license is subject to the right of use or control by the Government of the United States conferred by Section 606 of the Communications Act of 1934.
