

Laura 1

MEH

8/25 (Tues PM & Wed AM)

After coming ashore near the Louisiana-Texas border, Hurricane Laura is forecast to bring severe weather to Arkansas. The National Weather Service says the outer bands of the storm will begin impacting the state tomorrow (Wed), with the core of the storm moving through late Thursday. Meteorologist Dylan Cooper says Arkansans should expect potentially dangerous weather.

News15 0:24 "...have we have."

The storm track has it entering Arkansas from the southwest, moving to the northeast. Laura became a hurricane today (Tues) in the Gulf of Mexico and is expected to strengthen into a category three storm before coming ashore.

Laura 2

MEH

8/25 (Tues AM & Wed AM)

The remains of Hurricane Laura are expected to bring potentially damaging winds and heavy rain to Arkansas. The storm – which is intensifying in the Gulf of Mexico – is forecast to make landfall near the Louisiana-Texas border late tomorrow (Wed) or early Thursday. National Weather Service Meteorologist Dylan Cooper says the outer bands of the storm will begin impacting Arkansas well before that.

News16 0:24 "...then isolated tornadoes."

Power outages are possible. Cooper says most of the state can expect at least four inches of rain, which some areas could see up to eight inches, bringing the potential for flooding.
