

:

Good day to you. I'm Jennifer Andrews with your Minute Magazine. The Washtop Harris District Attorney's Office has announced a six-week traffic amnesty program. It's for people who received tickets before February 1st but didn't pay on time. Through the program, ending April 30th, the DA's office will waive late fees and recall warrants. A unique experience at the Beedenhaard Museum and Gardens. Thirty students from Sallie Humble Elementary took part in a plant scavenger hunt. Members of the school garden club were given a list of plants to find. It helped them recognize different species and understand the shared environment of a garden. And congratulations to Louisiana Tech doctoral student Mohammed Bappi. His research may help NASA create habitable environments on the moon and Mars. His project will cut down on possibly dangerous disease-carrying microorganisms. Experts say astronauts' immune systems can become compromised, so capturing possibly dangerous material in the vent of the suits and shuttle is critical. I'm Jennifer Andrews with your Minute Magazine.
