New information this morning as Mulvane takes another step toward hosting a state-owned casino. Late last night the Mulvane Planning and Zoning commission passed a recommendation to re-zone property along the turnpike to allow a Harrah's Casino. The commission came to the agreement after hearing from more than thirty Sumner County residents. The commission's recommendation now goes to the Mulvane city council that has the final decision. Both the cities of Mulvane and Wellington are fighting for the Sumner County casino. Last week Sumner County filed suit against Mulvane for how the town annexed the land for the casino. Ultimately the State Lottery board will decide which city gets the casino. A law passed last year allows four state-owned casinos across the state.

Sports may come to a halt at one Kansas school. Earlier this month Saint Mary's Academy told a female referee she wasn't allowed to officiate a boy's game. That's because the school doesn't believe in women being in a position of authority over boys. The ref is now working at another school. The Kansas High School Activities Association has scheduled a hearing on the issue. It could remove Saint Mary's from its list of more than 300 approved schools.

State lawmakers also get an update on rebuilding Greensburg. Yesterday they were given an update on the progress since last May's devastating tornado. State funds will play a big part in rebuilding Greensburg. With plans to re-build environmentally friendly, officials say the cost will be higher than first expected. 95 percent of the town was destroyed by the tornado. Right now the city says rebuilding has begun on 100 homes and several businesses on Main Street.

Wichita's fixing more than 350 a day, but crews can barely keep up with all the potholes. A rough winter has potholes popping up all over the city. The potholes form as water gets into the pavement, freezes and thaws. All the bumps along the way are irritating area drivers. City crews have fixed more than 20-thousand potholes this year over 18-hundred miles of pavement; that's up 15-hundred from this time last year.

The list is long and the price to fix everything is high. Last night the Wichita school board learned major upgrades to facilities will cost half a billion dollars. And to pay for it the board will probably look to you for a bond issue. Here's what the bond issue would cost you. The district is asking for more than 300 million dollars to do everything it needs. On a hundred thousand dollar home that would increase your property taxes about 32 dollars a year. A 200 million dollar bond would increase your taxes 23 dollars a year. A 100 million dollar bond would raise taxes 11 and half dollars a year. The board is expected to vote next month.

The city of Hutchinson has a big mess to clean-up; it's been left behind by the increasing pigeon population. With growing property damage and health concerns, local businesses brought in pest control experts to attack the problem with toxic corn. Cameras are used to make sure only pigeons get the feed. They've not trying to eliminate pigeons just limit the number in certain areas.

Clean-up continues in Hutchinson from December's ice storm. A North Carolina company started cleaning up limbs and branches around the city on Monday. They only reached people's homes yesterday. Residents say they've had the debris piled up in front of their yards since the storm but waited for the city to haul the piles away. The total cost of the clean-up will be nearly one million dollars. The federal government will cover all but 15-percent of that.

It was a rainy start to the week and now some home restoration companies have a lot of work. All the rain left some basements under water. The rain saturated the ground and caused sump-pumps to work extra, and some failed. We caught up with restoration workers who say clean-up is not easy. Experts say prevention is always better than clean-up. This damage will cost about 5-thousand dollars to repair. But buying a good sump-pump with a battery back-up wouldn't have even cost half that.

Forecaster said these floods could be a preview of what may happen this spring when snow in the Rockies begins to melt. Snow-levels in Colorado are at a ten-year high. When snow melts there the National Weather Service predicts rivers including the Arkansas will rise; just how quickly and by how much remains to be seen. But if there is flooding the Adjutant General's office says the National Guard is ready. A spokeswoman says the Guard has more helicopters and Humvees available than last year. But she says Kansas is short on trailers used to haul heavy equipment. Some raised doubts about the state's ability to respond to repeated disasters after last year's Greensburg tornado and flooding in central Kansas.

It's a simple click that can save your life and now it can save your teen some cash. Starting today Wichita teens between 14 and 17-years-old could face a 60-dollar ticket if they're not wearing a seat belt. That can be the primary reason they're stopped. The state law went into effect last summer. Until now, officers have handed out warnings. Today Wichita Police say those will turn into tickets. Teens think it will have an impact. The driver is ticketed if the passenger not belted in is under 14-years-old or if the driver themselves is not wearing a seat belt.

A north Wichita bridge is set to close for the better part of the year. City crews begin a 10-month reconstruction project of the Minisa Bridge on 13th Street in the morning. The bridge will have new structural support and slightly wider lanes. For ten months, the bridge will be closed to drivers and foot traffic. Riverside café sits a few feet from the bridge and is always filled with regular customers. So, owner Paul Cohlma says he's not worried. The project will cost the city two-point-six million dollars to complete. For a map of the city's detour visit www.kwch.com

We could know Monday if Boeing will build the next generation of refueling tankers for the Air Force. If Boeing wins the contract it could mean thousands of new jobs for Kansas and some 40-thousand jobs nationwide. Boeing is competing against Northrop Grumman and Airbus to build the plane. So what's at stake? The initial contract will be for 179-planes. There's also the possibility of 3-hundred more in the years to come. The contract is valued at about 40-billion dollars. The new tanker will replace the KC-135. Many of those planes are based at McConnell Air Force base here in Wichita.

02/25/08

Today the Pentagon discussed the deal. Tomorrow it's expected to announce the winner of the refueling tanker contract. Boeing is considered the front runner for the project; under which Boeing Wichita would modify the plane into a tanker. Spirit Aerosystems would also build part of the plane bringing at least 300 new jobs to Wichita. Last summer Wichita workers held this rally for the contract. It would be a 40 billion dollar deal to replace 179 aging tankers and make the U.S. Air Force Boeing's largest customer. Boeing would build it's tanker from a modified 767. Airbus is the other contender. If it wins, the tankers would be assembled in Mobile, Alabama from the A 330. The Pentagon is expected to make the announcement tomorrow afternoon at four Kansas time.

Besides Boeing several hundred area businesses are watching to see who gets the tanker contract. Belger Cartage Services has worked with the major aviation companies and sub-contractors for more than 50 years. The company moves large machine tools, does crane work and welding across the Midwest. It says a Boeing Wichita tanker contract would force them to add jobs and knows it will have a ripple effect on the Air Capital. This week the tanker contract is expected to be awarded. Eyewitness News will let you know when it happens.

You're not the only one watching grocery prices; the government is too. And it projects what you pay for food will go up 3 and a half to 4 and a half percent this year. The higher cost of fuel is a big reason. But so is the price of feed for cattle, hogs and poultry. All are up from last year-eggs are more than 30 percent higher. Milk is one component of the dairy products group that's up 12.8 percent. Fresh fruit and vegetables are higher than last year and cereals and bakery goods are up 5.7%.

The longest winter break for one Kansas school district ends. An ice storm December 11th knocked out power to Lost Springs and the five other communities served by Centre Schools. The elementary and high schools were without electricity for several days. Power was restored just before the scheduled holiday break. But the schools were left with frozen pipes and other problems that resulted in a 23 day lay-off. Their spring break will be two days shorter but school officials say the school year will still end on the same day as originally scheduled, barring more stormy winter weather.

The Wichita school district holds its first meeting on a proposal to end forced busing. For nearly 40 years the district has bused students based on their race. Now Superintendent Winston Brooks has a plan to end it. Tonight parents attended a meeting to see how the change will affect their children's education. They broke into small groups where several issues were brought up -- including how to stay involved in the child's education. Norwood says tonight's information will help her think about what questions she wants to ask at the next meeting.

A Wichita teacher says if you want proof another bond issue is needed, visit her classroom. Melissa Bloom says 20 students would be ideal but she has 29 in her math class. She's at Seltzer Elementary one of 20 schools the district considers overcrowded. Building more schools to reduce class size is one of many reasons the Wichita school board is considering a new bond issue. Bloom is in favor of paying for new schools because she says students are suffering from the over-crowding. The school board will decide next month if it wants another bond issue.

Technology is also helping Wichita parents keep in touch with their schools. USD 259 is implementing Parent-Link; a way schools can email and telephone parents to alert them to upcoming events, unexcused absences, or emergencies. Principals say this will not replace the letters and notes they send home to parents it'll just be a new addition. The alert system for elementary schools started today. Middle and High school parents can expect the phone calls and emails beginning in February.

01/29/08

Forced busing is over for Wichita schools. Last night the school board voted to end the 38 year old policy. That means starting next fall students who are bused can begin attending school in their neighborhood. They also have the option to stay in the current schools they're bused to. Now here's what's next. Letters explaining the change will go out to parents of the two-thousand kids affected. School officials will then call or do home visits with those parents to help them weigh their options. A committee of citizens will oversee the transition.

Five years, 30-thousand gallons. Administrators say that's how much water leaked from a heater at McPherson High School since 2002. The school found the leak earlier this month after an unusually high water bill. So how did workers find leak so small it went un-noticed for all this time? The floor around the leak was hotter than the surrounding area because the water was about 120-degrees. Workers have fixed the leak, ripped up flooring around it and will now look for any structural damage caused by years of standing water.

Supporters of the Wichita school bond issue hope tornado safety will help convince you to vote for the money. New at ten tonight, the district says, the bond issue will build new safe rooms. Three Wichita schools were hit by tornadoes in 1999. The twister that hit Jefferson Elementary damaged the building and destroyed a portable classroom. Right now, 36 schools have safe rooms. The bond issue would build 60 new storm shelters.

03/07/08

Part of May's school bond issue could build 60 new storm shelters for Wichita school buildings. The shelters or safe rooms are designed to withstand an E-F-5 tornado. Jefferson elementary was the first Wichita school to get a shelter after a tornado hit the building in 1999. The room can hold more than 700 people and has 10-inch-thick concrete walls and ceiling. Teachers who were at Jefferson when the tornado hit say more shelters are important. 36 Wichita schools already have safe room storm shelters. The crash happened about 60-miles east of Denver near the town of Deer Trail. That's where state police say the family's van crashed into the back of a truck being towed. Investigators say the van then went over a median and into the eastbound lanes of I-70 where it was hit by a semi. The impact completely crushed one side of the van. Three other people inside the van were air-lifted to Denver hospitals. 46-year-old Kenneth Schoenwald died in the crash. His 18-year-old daughter Janna-Lea and son 13-year-old Jace also were killed. Janelle Schoenwald and the couple's twin daughters Alyssa and Avery survived. The twins are in critical condition while their mother is in fair. Tonight police are looking into whether Kenneth Schoenwald fell asleep or was distracted at the time of the crash.

The government announces the biggest beef recall in American history. Details in this ConsumerWatch alert. The 143-million pound recall involves meat from this slaughterhouse in Southern California. The government says the Westland-Hallmark meat company abused crippled and sick animals and used them in its products. Federal regulations ban the sale of meat from sick animals because of possible E-coli, salmonella and mad cow contamination. The company supplies meat to the federal school lunch program and some fast-food chains. No illnesses have been linked to the meat and the USDA says the health threat is small.

Too sick to walk but still taken to slaughter; it's the largest beef recall ever, 143 million pounds. Video shows just how far a California company went to make a profit. You can see downer cows brutalized to get them to their feet for slaughter. The USDA bans such animals from human consumption because they are more likely to have diseases like mad cow. The plant is now shut down. Two workers face jail time. But Congress wants an investigation because the u-s-d-a didn't discover the abuse. It was an undercover humane society investigation. The California company sold meat in 36 states including many school lunch programs.

What's it worth to protect the planet from a satellite crashing to earth and spewing toxic rocket fuel? At least 40 million dollars. More than a year ago, the U.S. Government launched this spy satellite only to discover it's faulty. Tomorrow the Navy plans to shoot it down with a missile. The missile alone costs 10 million dollars, the entire process 40 million. But chances of a direct hit the first time are slim so a second missile will probably be needed. If the satellite falls to the earth, its full tank of fuel could be a deadly hazard.

Wesley Medical Center is monitoring nine newborns with MRSA. The babies aren't infected or sick by the bacteria it's only present on their skin. The hospital tests all babies weekly for the staph bacteria. They do it as a precaution because MRSA is becoming more prevalent in the community. And if a baby were to become sick it would need special antibiotics. Right now the nine babies are kept separate from others. Hospital staff and visitors wear gowns and wash their hands frequently to keep it from spreading. It spreads through direct contact and many people carry it but never know it. We checked with Via Christi they do not currently test all babies for MRSA. The hospital plans to start testing all new patients sometime this year.
