HEALTH	UniMás News Briefs	10/7/15	2:31 PM	:30	Research published in recent years indicates that millions of people might have been better off had they stuck with consuming whole milk as opposed to low-fat milk. Scientists who tallied diet and health records for several thousand patients over ten years found that contrary to the government advice, people who consumed more milk fat had lower incidence of health disease. The following is a list of some of the significant issues responded to by Station KTFD-DT, Denver, Colorado along with the most significant programming treatment of those issues for the period of October 1, 2015 through December 31, 2015. DESCRIPTION OF ISSUE	PROGRAM SEGMENT	DATE	TIME	DURATION	NARRATION OF TYPE/ DESCRIPTION OF PROGRAM SEGMENT
House Denver/AD COUNCIL-HUNGER PREVENT	PSA	Dec	7	:30	The United States Department of Agriculture (USDA) recently announced that nearly 16 million children, or one in five children in America, face hunger. The new Child Hunger PSAs highlight how food banks work collaboratively with their communities to bring surplus food to children and families in need, including working with farmers, grocery workers, food bank employees and volunteers
House Denver/AD COUNCIL-RECYCLING	PSA	Dec	13	1:00	Since 2010, 63 percent of the population has had access to curbside recycling; yet recycling rates are still surprisingly low. In fact, only 34.5 percent of the 251 million tons of trash Americans generated that year was recycled or composted. And in an Ad Council survey, 62 percent of Americans admitted they were not avid recyclers. To improve these rates, the Ad Council teamed up with Keep America Beautiful and San Francisco-based ad agency Pereira & O'Dell to launch the I Want To Be Recycled campaign. This playful—and powerful—campaign personifies everyday recyclable objects, allowing plastic bottles, steel cans and more to share their dreams of a different life.
SAFETY					
House Denver/AD COUNCIL-FOOD SAFETY	PSA	Oct/Nov/Dec	141	:30	To help families-especially parents-learn the practical steps they can take at home to help reduce their risk of getting sick, the Ad Council and the U.S. Department of Agriculture's Food Safety and Inspection Service, in partnership with the U.S. Food and Drug Administration (FDA) and the CDC introduced the Food Safe Families campaign.
House Denver/AD COUNCIL-SEAT BELT	PSA	Oct/Nov/Dec	184	:30	The new Seat Belt Safety campaign pulls from the insight that as a parent, sometimes you have to let your kids have their way. But your kid's safety should never be up for negotiation, no matter how much they push back on the seat belts being uncomfortable, unnecessary for just a "short drive" or any other excuses. The campaign utilizes the concept that "life as a parent is full of compromises, but seat belt safety for my children is not up for negotiation." - See more at: http://www.adcouncil.org/Our-Campaigns/Safety/Seat-Belt-Safety#sthash.qn26kvhF.dpuf
House Denver/AD COUNCIL-EMERGENCY PREP	PSA	Oct/Nov/Dec	242	1:00	From hurricanes and floods to wildfires and earthquakes, Americans have experienced natural and man-made disasters, yet only 20% claim to be very prepared for the next. PSA's to help everyone ensure they have and effective household emergency plan for preparedness.
House Denver/AD COUNCIL-PROJECT ROADBLOCK	PSA	Oct/Nov/Dec	138	1:00	To raise awareness around the dangers of impaired driving this holiday season, The Ad Council, the National Highway Traffic Safety Administration (NHTSA) and the Television Bureau of Advertising (TVB) teamed up for the tenth year of "Project Roadblock." Between December 26th and January 1st, broadcast TV stations across the United States will air our Buzzed Driving PSAs. The PSAs underscore the financial consequences of impaired driving - up to \$10,000 in fines, legal fees and increased insurance rates - and also emphasize for all viewers that buzzed driving is drunk driving.
House Denver/AD COUNCIL-TEXTING & DRIVING	PSA	Oct/Nov/Dec	71	:30	One million people chat and text while driving each day. People feel pressure to remain in constant contact, even when behind the wheel. What drivers do not realize are the dangers posed when they take their eyes off the road and their hands off the wheel, and focus on activities other than driving.
